

Persnickety Valance

9348

For large windows, repeat as many center sections as needed. Select section sizes of 12" or up to 20" wide. Using the patterns (as shown), a 48" valance is the smallest. For small windows, consider using two side sections and no center. 33" will be the smallest. Alter the depth of the valance at the top. The width of the side and center sections can be altered but you would have to reshape the curves.

Fabric Suggestions: Use light to medium weight fabrics that are not too stiff. Add interlining to light weight fabrics. Nothing has to be self lined or contrast lined. Drapery lining can be used. However lining may tend to show at the bottom edge if a trim or cord is not used.

YARDAGE

The center pleats pattern should be used at each side of a center section. The side pleats (and return) should be used beside the side section. The pattern pieces are all separate but can be overlapped at the seams (if desired), to eliminate some (or all) seams, if the fabric allows.

To determine your center and side sections size, subtract 3" for each group of pleats needed (see drawing above). Then divide into equal units. The patterns give you a choice of 12" to 20" wide. Side and center sections do not have to be the same amount.

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.

Upright cut

Each 12" Center Section	16" wide x 20" deep
Each 16" Center Section	20" wide x 20" deep
Each 20" Center Section	24" wide x 20" deep
Each 12" Side Section	16" wide x 24" deep
Each 16" Side Section	20" wide x 24" deep
Each 20" Side Section	24" wide x 24" deep
Each Center Pleats	13" wide x 17" deep
Each Side Pleats (plus return)	17" wide x 24" deep

Lengthwise Cut: Pattern can be overlapped for a seamless cut. The width measurement of the pattern pieces will run with the selvage. Fabric measurement will be same as pattern width.

Same amount of lining and (optional) interlining needed for all items. Lining and interlining can be cut seamless even if the valance is not.

TRIM

Trims must be able to curve. Fringe should be soft. Cord should be soft and small.

Each 12" Center Section	17"
Each 16" Center Section	21"
Each 20" Center Section	25"
Each 12" Side Section	18"
Each 16" Side Section	22"
Each 20" Side Section	25"
Each Center Pleats	13"
Each Side Pleats (plus return)	17"
