WHAT IS IN THE PACKAGE?

Step 1:

Remove the OEM Visor

Step 2:

Gently push the windshield studs in the rubber housing

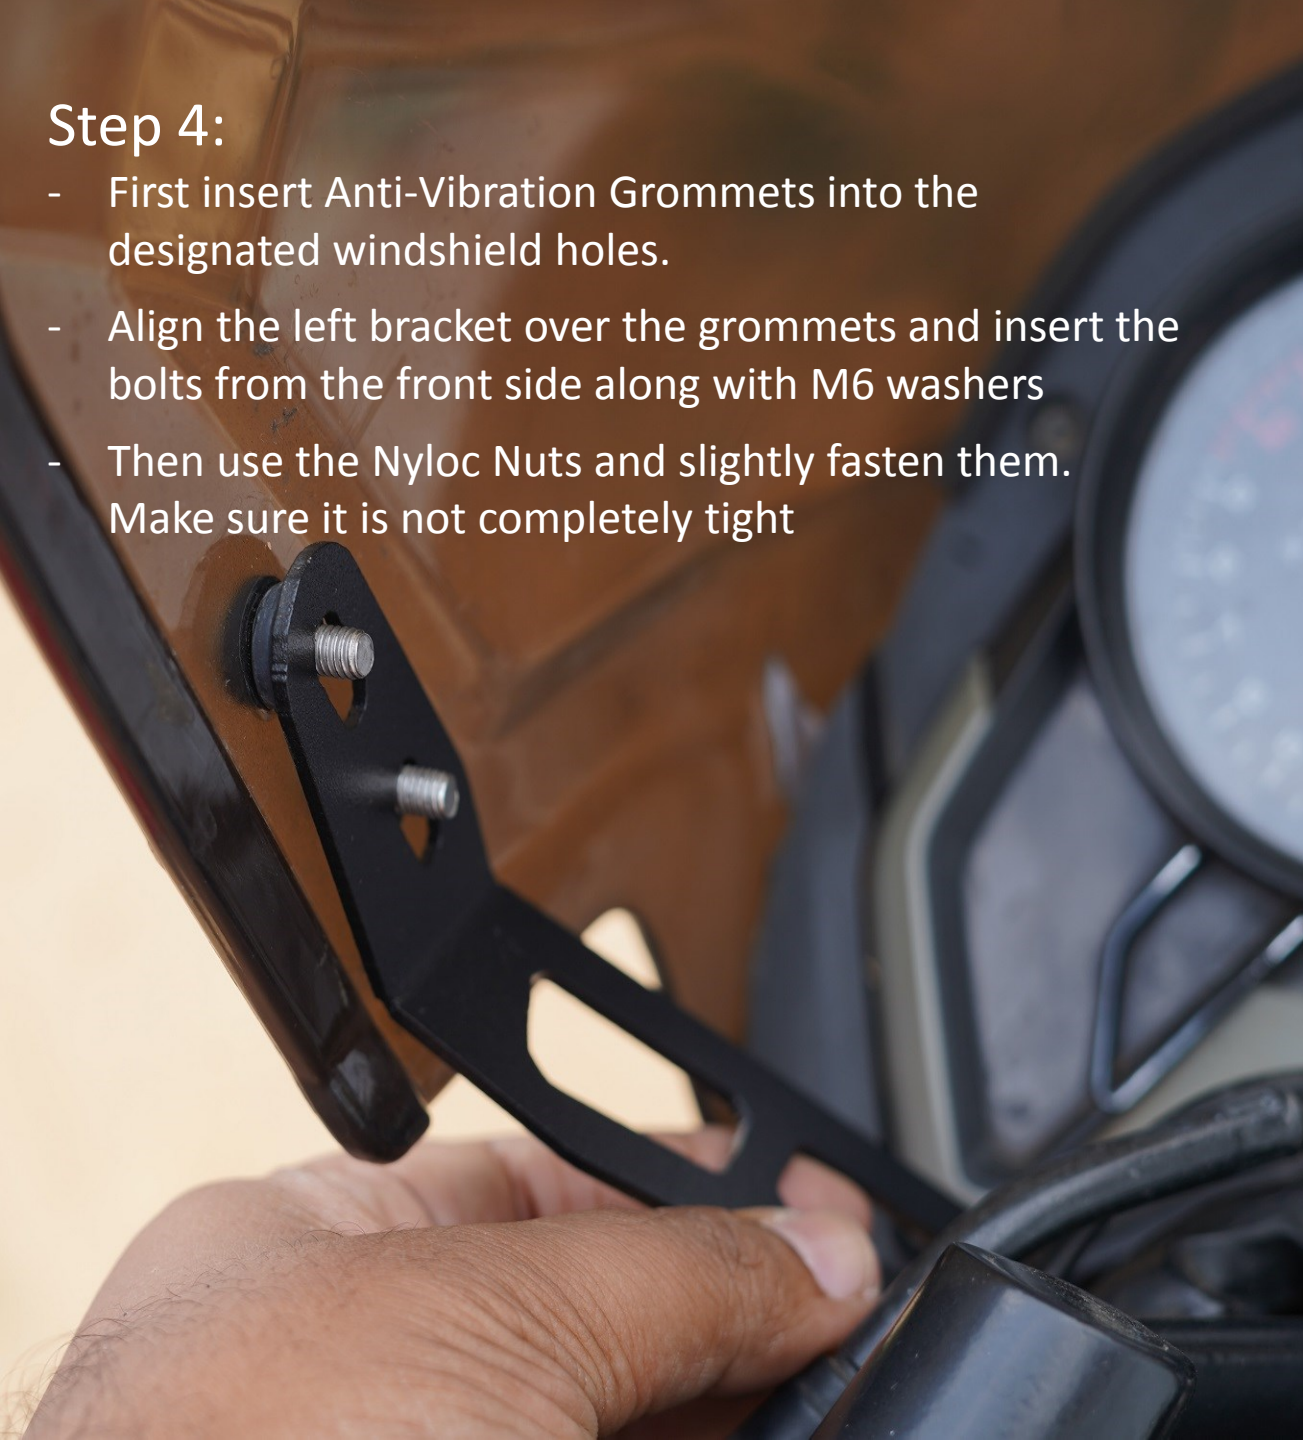

CARBON RACING

Step 3:
Fasten the stock screws

Step 4:

- First insert Anti-Vibration Grommets into the designated windshield holes.
- Align the left bracket over the grommets and insert the bolts from the front side along with M6 washers
- Then use the Nyloc Nuts and slightly fasten them. Make sure it is not completely tight

Step 5:

- Remove the stock Fork Bolts.
- Align the left bracket over the fork bolt hole and use the replacement fork bolt from the package.
- Slowly tighten the fork bolt and then completely tighten the windshield bolts.
- If installed right, there wont be any stress on the windshield or the forks.
- Repeat the steps on the right bracket.

Step 6:

- Slowly tighten the fork bolt and then completely tighten the windshield bolts.
- If installed right, there wont be any stress on the windshield or the forks.
- Repeat the steps on the right bracket.

That's All.....

Be ready to experience the long journeys
Like never before

The image features a dark, textured background with a grid of small, glowing red dots. Two prominent, glowing red, curved lines sweep across the frame, one from the top left and one from the bottom right, each ending in a bright, multi-pointed starburst light. The text 'CARBON RACING' is centered in a bold, red, sans-serif font. Below it, the tagline 'Experience The Quality' is written in a smaller, white, sans-serif font.
