

HOW TO MEASURE YOUR WIG SIZE

Before beginning, flatten your hair. Use a tape measure to ensure accuracy. Start at your natural hairline for all of the measurements.

Please enter these measurements into the instructions box when placing your order or send them by email. Please number them in the same order as shown above.

We look forward to creating your wig for you.

Circumference

Front to nape

Ear to ear across forehead

Ear to ear over top

Temple to temple round back

Nape of neck
