## OFYR® MANUAL WOOD STORAGE BENCHES & HERB GARDEN BENCH

THANK YOU SO MUCH FOR BUYING AN OFYR® PRODUCT. THIS MANUAL CONTAINS SETUP INSTRUCTIONS, WARRANTY CONDITIONS, AND ADDITIONAL INFORMATION ABOUT YOUR WOOD STORAGE HOCKER, BENCH, AND/OR HERB GARDEN BENCH

### Wood Storage Hocker, Bench and Herb Garden Bench

The wooden boards on the OFYR® Benches must be cleaned by hand and must not be treated with any corrosive substances or cleaned in the dishwasher. After you clean them, we recommend that you store them inside, in a dry place with low humidity. Large temperature differences may cause the wood to warp. We strongly advise against leaving these wooden boards outside. Please note that wood is a natural product and is always liable to warp somewhat. We are not liable for any wood warping that may occur. The wooden boards on our Wood Storage Hocker and Bench are equipped with magnets, ensuring that the wooden board stays in place and yet can be easily removed. The Herb Garden Bench's board is simply resting on the edges of the Herb Garden Bench. If the surface is not entirely level, you can use the adjustable feet of the Wood Storage Hocker, Bench or Herb Garden Bench to make sure that it is level. Once they have been set up, they must not be shifted. Shifting them could cause damage to the adjustable feet or the rivet nuts with which the adjustable feet are attached. We do not accept warranty claims or liability for any damage resulting from shifting the Wood Storage Hocker, Benches and Herb Garden Bench.

Please note that if the adjustable feet are extended too far, the Hocker, Bench and Herb Garden Bench may become unstable. We recommend a maximum difference in level of 10 mm. If the level difference exceeds 10 mm, we recommend levelling the surface before setting up the OFYR® products.

## Disclaimers

### CORROSION

With the exception of the cooking plates, adjustable feet, hinges, screws, and the magnets underneath the wooden planks, all steel elements of the OFYR® collection are made of weathered steel. Weathered steel is a type of steel that corrodes very rapidly, and it is precisely this corrosion that protects it against rust perforation. If you allow nature to take its course, it will take 6-12 months for these weathered steel elements to corrode, depending on their location and the humidity level. Unlike many manufacturers of weathered steel products, we provide buyers of our products with an additional service by making sure that the corrosion process has already started by the time our products are delivered. Depending on their location and the humidity level, it will take another 3-6 months for this superficial corrosion to turn into a proper layer of corrosion. However, this does not guarantee an entirely smooth layer of corrosion. Therefore, any weathered steel elements that are less corroded than others upon delivery are not eligible for replacement. After all, they will corrode naturally over time under influence of the weather. While the corrosion is still superficial, the weathered steel elements may cause orange stains on clothes, skin, and the surface they stand on. When it rains, corrosive water may also run off these elements, which may permanently stain light-toned stone or wooden surfaces. Under normal circumstances, the weathered steel will gradually develop a smooth, dark brown layer of corrosion that will not chip. However, this layer may chip in locations near the sea or the shore due to the high levels of salinity in such locations. The chipping will not cause any damage, but the chipped corrosion must be removed to prevent corrosion from forming on the surface the OFYR® unit is placed on.

### WOODEN BOARDS

Some OFYR® products include wooden boards to be used as seating surface. None of those should be left outside for extended periods of time. Humid weather may cause them to warp and/or crack. We therefore recommend that you store these boards inside in a dry place after each use. We do not recommend leaving them outside at night, as the weather tends to be humid then. We do not accept liability for any damage resulting from incorrect use of wooden boards.

Please note that you should not place OFYR® products with wooden elements directly next to any heat source, including any of our cooking units, because the heat may cause damage to the wood or cause it to warp.

## Warranty terms per element

A limited lifetime warranty applies to the material and construction of all steel elements of all OFYR® units for the original buyers or owners, provided that they purchased their unit from an authorised dealer and registered their warranty in the required manner.
