

50 COMBINATIONS

COLOR MIXING GUIDE

INSTRUCTIONS:

This guide indicates the number of drops to color 1 cup of **Meringue (2.25 oz)**, **Fondant (14.1 oz)**, **Buttercream (7.05 oz)** or **Royal Icing (10.6 oz)**.
To color 1 cup of Whipped Cream (2.60 oz) just multiply the Number of drops by 1.25.

TIP:

To apply the drops faster and of the same size, when exerting the pressure, we recommend sticking the tip of the bottle to the frosting. Remember that more color is required when using a mixcombination color than using the direct color.

EQUIVALENCES:

1 drop of Gel Color equals 0.0044oz
1 bottle of 1.41oz yields approx. 320 drops
