

Thank you for your purchase!

Please read all instructions (or at least try to:) before assembling your Fish Stalker Universal Marine Cooler Tie Down Straps.

These universal straps are designed not only for the Fish Stalker but any paddleboard with a 15" x 15" D-ring configuration.

If you attempt to use these straps with any configuration (other than 15" x 15") you do so at your own risk.

Parts List

2x Tie down straps

Tools needed

Just your fingers.

Installation Instruction

Ensure all parts are present. If any parts are missing or if you have any questions, please contact us at info@lxvoutdoor.com or 866-699-8207.

Note: if you ordered the straps for soft sided coolers, please skip to the end of these instructions (page 6).

1. Disassemble the strap and attach the upper strap to your cooler

- Unclip the quick release buckle from the bungee cord end
the male end of the buckle has no reflector
the female end of the buckle has red reflector
- Remove the strap from the male end of the buckle

try to remember how the strap was fed through the buckle

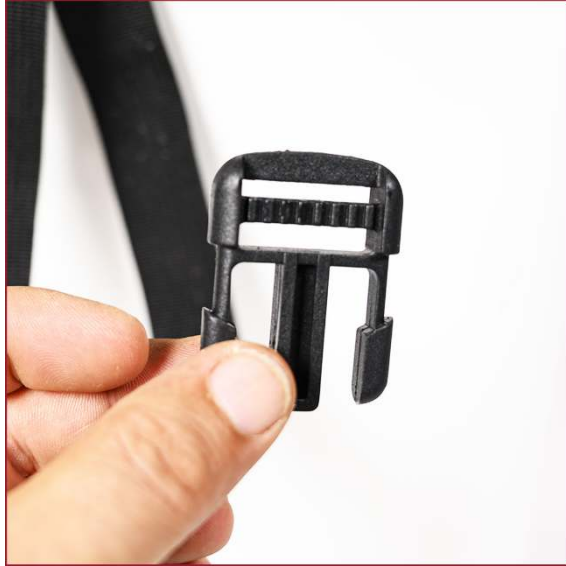

- Loop one end of the strap through the tie-down points of your cooler

- Identify the front and the back of the male end of the buckle

the front of the buckle has a smooth surface on the top of uppermost slot

Front

Back

- Slide both ends of the strap through the lower slot from the back of the buckle

- Loop the two ends of the strap back through the upper slot in the front of the buckle

- Repeat for the other side of the cooler

2. Place the cooler on your board and attach the straps

- Attach the two snap hooks of the bungee to the D-rings on your board
make sure the reflector faces out
- Place your cooler on the board, centered about the D-rings
- Clip the quick release buckle together on each side of the cooler

- Pull on the ends of the strap on the male end of the buckle to tighten the cooler down
- Trim the ends of the strap one inch past the buckle (if you like)

3. Finished Product

If all went well, it should look like this:

Installing the cooler tie down straps for soft sided coolers

No disassembly required, just attach the two snap hooks of the long bungee to the D-rings on your board and attach the two snap hooks on the shorter bungee to the loops on your soft sided cooler as shown below.
