

HOMEPLUS FURNITURE

— est. 1990 —

WILL IT FIT?

We want to ensure your new furniture fits comfortably into your home, so we've put together a helpful checklist to run through before purchase.

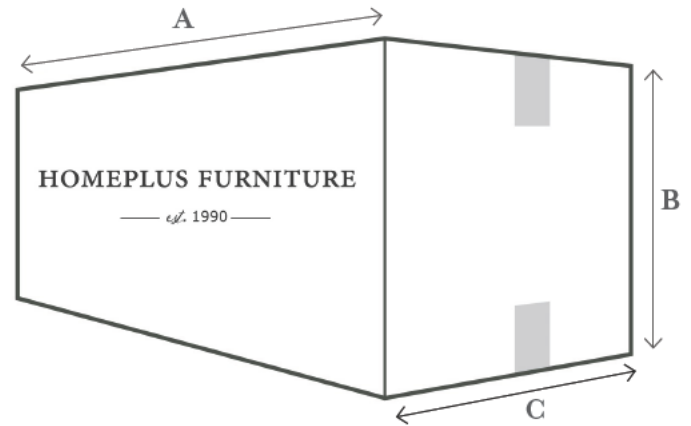

STEP 1: Your Furniture

Firstly, take down the box dimensions of your purchase. These can be found on our website. Simply search for your item and click 'Product Information'.

A. Box Width:

B. Box Height:

C. Box Depth:

Certain items, such as dressers and beds, are delivered in parts and assembled in situ, so always check with us what the dimensions of each box are.

STEP 2: Your Route

Track the journey your new furniture will take - starting from the delivery van to your chosen room. Plot any potential pinch points, such as the garden gate, front door or stairwell. To mitigate unnecessary damage, remove any obstacles that could get in the way, like furniture, mirrors/artwork on the wall or stair gates.

DOORWAYS

Narrowest doorframe width:

.....

Narrowest doorframe height:

.....

STAIRS

Narrowest stairway width:

.....

Height between banister & ceiling:

.....

Any tight corners?

.....

HALLWAYS

Narrowest hallway width:

.....

Narrowest hallway depth:

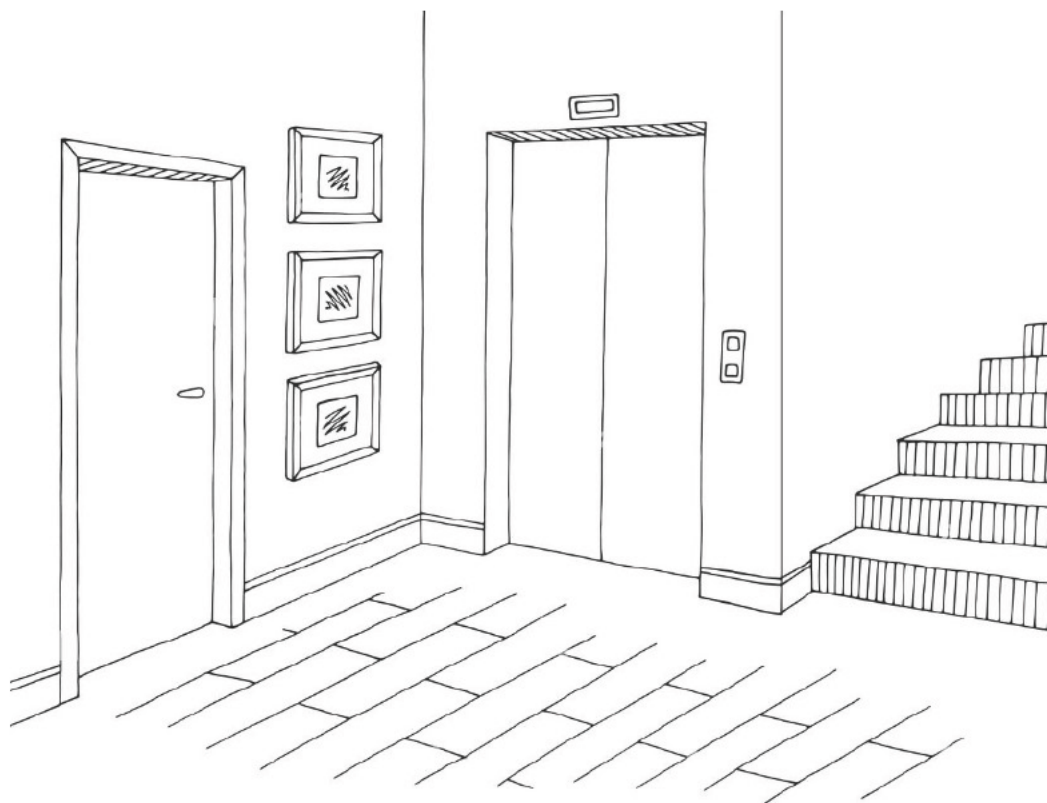

.....

Narrowest hallway height:

.....

POTENTIAL PROBLEM AREAS:

- | | |
|----------------------------|-------------------|
| 1. Doorways | 5. Internal doors |
| 2. Obstructions | 6. Hallway |
| 3. Stairways & tight turns | 7. Clear Path |
| 4. Obstacles | 8. Outdoor area |

POTENTIAL PROBLEM AREAS

DOORWAYS

Take the narrowest measurement of the inside of the doorframe, along with the height. The box can be rotated to fit the gap, so please check whether:

- The depth of the box is smaller than the width of the gap.
- The height of the box is smaller than the height of the gap.

OBSTRUCTIONS

For tighter spaces along the route, it's important to open the doors as far as possible and then measure the smallest internal gap. Be mindful of radiators, shelves and items on the stairwells that can cause obstructions. You'll also need to take any door handles, handrails or wall fixtures into account when measuring.

STAIRWAYS & TIGHT TURNS

If your route includes any awkward corners and stairwells, check the following:

- Firstly, make note of the width of your stairs at their narrowest point. Refer to the height of your box and ensure it is smaller than the measurement of your stairs.
- If you have a banister that the box needs to be lifted over, please check that the height between the top of the banister and the ceiling allows enough space for the depth of your item.
- If your box has to turn a tight corner or pivot in a small space, please ensure that the height from the floor to the ceiling in this area is bigger than the width of your item.

OBSTACLES

Note down the measurements of any fixed obstacles which may interfere with your delivery. This can include light, wall or floor fixtures.

INTERNAL DOORS

Measure all internal doors and doorframes to ensure the items can fit into the room of choice. Be sure that every hallway has enough room to manoeuvre your item.

HALLWAY

Measure the height, width and depth of the hallway, making sure the shortest measurement of your item is less than the width of the hallway.

CLEAR PATH

Plan and clear your path. The quickest route may not always be the easiest, so prepare for any awkward turns. Don't forget to clear your room of choice and make space to position the new furniture. To protect your floor from any accidental scrapes or scuffs, cover them prior to delivery.

OUTDOOR AREA

Don't forget to measure the area outside your front door. Be aware of any gates, porches, flower beds, pathways etc. This also includes building lobbies, lifts and hallways if you are in an apartment building.

OTHER HELPFUL MEASUREMENTS

IS THERE A LIFT?

If our delivery team will need to use a lift to get to your property, this will also need to be measured. Check if there is a weight restriction in the lift and compare it to the weight of your new furniture.

IN THE ROOM

You might find it helpful to mark out the measurements of your new furniture on the floor with masking tape to check you're happy with its size and proportions.

Don't forget, you can also order free wood samples and fabric swatches online.
