

Selleys Liquid Nails Instant Hold / Hold Up / Soudal T Rex Power Fast Grab

Instructions for use

How to use the product

1. Ensure surfaces are clean and free from grease or loose particles
2. Use a high thrust caulking gun and the supplied V-notch nozzle to apply in vertical stripes. Ensure the V shape is angled upward when applying.
3. Position materials and press together firmly. Due to the high initial hold of the product support during curing is not necessary.
4. Holds instantly but must not be disturbed until cured (up to 48 hours).
5. Adjustable e.g. can be straightened for up to 15 minutes

Handy Tips

- Clean up with turps before the adhesive cures
- Safety Information
- KEEP OUT OF REACH OF CHILDREN.
- Avoid skin and eye contact and breathing vapours.
- Use in a well-ventilated area.
- Wash hands after use.
- If on skin: Wash with soap and water.
- Product releases methanol during cure. Refer to Safety Data Sheet.

Storage & re-use

- Cure product before disposal
- Store in a cool place.
- The adhesive should be used within 6 months after opening.
- If the adhesive is going to be used again within a few days, leave the nozzle on and merely extrude approximately 2cm of product before storing the cartridge upright. This will cure to a plug which can easily be pulled out when required.
- For longer storage periods, leave the nozzle on and place a piece of plasticine or Blu Tack over the end of the nozzle. Tightly tape a piece of aluminium foil over the whole nozzle to exclude any air.
- When you want to re-use the product, simply take off the foil and plug from the old nozzle pull out the excess adhesive from the nozzle with a corkscrew, then re-pierce any cure at the tip of the cartridge and re-use.
- If cure has taken place into the cartridge, the product is unlikely to be in a useable state and should be disposed of
