

NEW METAL LEVER

The eye-catching metal lever is our next evolutionary step in our patented mechanism.

ITALIAN ARTISANSHIP

For the Premium Collection we use the highest quality of leather from our Italian partners.

CO2 NEUTRAL

We are committed to actively reduce our impact on the climate. We are CO2 neutral by compensating our impact and aim to become CO2 positive.

SECRID

EVOLVED IN ALL SECRID DETAILS PREMIUM

Meet the Premium Collection; the iconic Secrid wallet, evolved in all details. For those who want the best, for themselves and the planet. For those who want the highest standards of design, craftsmanship and sustainability.

FIRST METAL LEVER

Our eye-catching metal lever is made from durable stainless-steel metal and especially crafted for this collection. It is the next evolutionary step for our patented Secrid mechanism. The metal lever also magnifies the iconic Secrid click as your cards are revealed.

ITALIAN ARTISANSHIP

Every leather wallet is refined by Italian leather artisans. The family companies we partner with combine the latest research with traditional methods. In cooperation with these partners a bespoke design was created for the Emboss Lines. The remarkable deep colours and a subtle shine on our Dusk wallets are the effect of the vegetable tanning process.

DIAMOND DETAIL

The Premium Collection features a diamond pattern at the bottom of the mechanism, reminiscent of the design of high-end Japanese and German cameras. This tactile detail perfectly complements the metal lever.

CLOSURE BUTTON

A new closure button was custom designed for the Premium Collection. Inspired by luxury bags, the new button has a flat surface, creating a sleek profile.

GLOBAL WARRANTY

**5 YEAR
GUARANTEE**

All our products of the Premium Collection come with a five-year warranty for the end user.

LEATHER CARE

EMBOSS LINES

- The combination of the custom design, quality sheep leather and finish ensure the embossing will stay soft over time.
- If needed wipe with a soft, dry cloth.

DUSK

- The vegetable-tanned leather uses natural tannins that are extracted from vegetable origins to ensure that the leather ages with character.
- Showing signs of usage is normal and part of the aging process; a process which creates a soft sheen on the leather and deepens the colour over time.
- If needed wipe with a soft, dry cloth.
