

Curtis Bay Medical Waste Services works hard to ensure that we provide our valued customers with the most service friendly, cost effective and environmentally sound medical waste disposal in the area. We take pride in delivering great value to you. Over the years we have found ways to control our costs through the utilization of more fuel-efficient vehicles, computerized routing, managing the cost for processing & disposal, and the utilization of the most advanced technologies in the market. Rest assured we will continue those efforts, however, we are unable to control fuel and other petrochemical costs.

The Fuel Surcharge is our standard charge meant to help recover these costs and achieve an acceptable operating margin. It is tied directly to the national average price of diesel fuel as reported weekly by the Energy Information Administration of the U.S. Department of Energy ("EIA/DOE") in its Retail On-Highway Diesel Prices Index. This index is objective, publicly available, and widely recognized in the trucking, transportation, and logistics industries. This will ensure that you, our valued customer, will pay a Fuel Surcharge that is currently adjusted, easy to calculate, and equitable to you and your Company.

The Curtis Bay Fuel Surcharge Table, shown below, displays what the Fuel Surcharge percentage would be based upon the national average price of diesel as reported by the EIA/DOE for a given month. For example, if the reported monthly <u>EIA/DOE</u> national average diesel price is \$2.90 per gallon, your fuel surcharge would be 13.46%. The fee is charged on all applicable services and is based on the overall cost of fuel and other petrochemical expenses incurred by Curtis Bay and its affiliates on a nationwide basis and is designed to achieve an acceptable operating margin. This includes both direct and indirect fuel and petrochemical costs associated with our collection, transfer, disposal, landfill and material recovery facilities.

We thank you for your business and we appreciate your continued support of our efforts to remain a leader in environmental protection and compliance.

## **Frequently Asked Questions**

Q: Why do you charge a Fuel Surcharge?

**A**: This charge helps us keep up with the changing costs of diesel, natural gas and other hydrocarbon-based fuels and products that we use on a company-wide basis. Fuel surcharges are common in the transportation industry and are charged by other waste haulers, trucking companies and airline carriers.

Q: If the price of fuel goes down, will my fuel surcharge component go down too?

**A**: Yes, if the Department of Energy's National Average price falls, your fuel surcharge component will come down as well. If the cost of diesel fuel decreases, this will affect your fuel surcharge component.

Q: If I am tax exempt will I still be charged the Fuel Surcharge?

**A:** The Fuel Surcharge is not a tax or fee mandated/imposed by or remitted to any governmental or regulatory agency; it is our charge. The Fuel Surcharge does not fall into any exemption and cannot be changed to a fixed rate.

Q: How can I access the value of the EIA/DOE Monthly Retail On-Highway Diesel Prices Index?

A: Here is the link to the EIA/DOE. This site is updated every Monday evening.

**Q**: How often does the Fuel Surcharge change?

**A**: The Fuel Surcharge percentage will fluctuate on a monthly basis and will increase/ decrease as the peak weekly diesel price as reported by the applicable EIA/DOE website index changes.
