

An infrared electric heater blending aesthetics with function

about infrared energy

Infrared or radiant energy is the most practical way to add warmth to spaces like patios, terraces, verandas, enclosed areas, or any indoor or outdoor setting where heated air cannot easily be contained and re-circulated.

A heated quartz element emits a safe, clean wavelength of light that is only absorbed by solid objects, transferring heat directly to a person, table or floor rather than heating the air. For this reason, infrared heat can be distributed very evenly, and will not simply “blow away” in windy or drafty conditions.

Infratech medium wave quartz element heaters emit a pleasing glow that will not affect the ambience of your gathering- unlike competitive halogen electric heaters that produce a very harsh glare or bright-colored light.

why infratech for your business?

Alfresco dining rooms. Poolside patios. Nightclub courtyards. Kerbside seating. In each setting, customizable comfort is as important as style. With infratech heaters, you can offer your patrons the best of both worlds. Infratech is the largest selling electric radiant heater in Australasia, providing the most efficient and aesthetically pleasing units in the market. Whether it's an exclusive restaurant in Auckland's Viaduct or the local pizza joint in Waipu, our clients appreciate the advantages Infratech heaters offer to their business.

- 

efficient heat
Infratech heaters are the most efficient on the market converting over 90% of electricity to heat compared to gas at 50% efficient. In addition they can be installed with low capital expense and minimal labour.
- 

cleaner, greener heat
Today protecting our environment is a top priority. Infratech heaters create no CO2 emissions unlike gas-fired heaters, meaning you can heat your space without negatively impacting the environment.
- 

aesthetic heat
With crisp styling, an anodized aluminium housing, brushed stainless face and very low profiles the new Slimline heater can virtually disappear into your surrounding decor, emitting only a subtle orange glow.
- 

durable heat
Made with anodized aluminium and 304 stainless steel, Infratech heaters feature an architectural finish that is capable of withstanding years of use. With no moving parts heaters require minimal maintenance.
- 

heat with options
Infratech offers the widest array off products and possibilities compared with competitors. Heaters are available in different lengths, many outputs and can be wall mounted, ceiling mounted, or recessed.

our clients
