

7TH GRADE COMMON CORE MATH

TABLE OF CONTENTS

CHAPTER ONE—RATIOS & PROPORTIONAL RELATIONSHIPS

TOPIC A: Computing Unit Rates Associated With Ratios of Fractions	5
TOPIC B: Proportional Relationships Between Quantities	
PART 1: Recognizing Equivalent Quantities in Proportional Relationships	7
PART 2: Identifying the Constant of Proportionality (Unit Rate)	14
PART 3: Representing Proportional Relationships With Equations	20
PART 4: Understanding the Concept of Proportional Relationships and Unit Rate in Graphs	23
TOPIC C: Using Proportional Relationships to Solve Multi-step Ratio and Percent Problems	
PART 1: General Percentage Problems	35
PART 2: Tax Percentage	38
PART 3: Percent Increase and Percent Decrease	39
PART 4: Simple Interest Rates	40
PART 5: Sale Price	43
PART 6: Commission	45
PART 7: Gratuities	46
PART 8: Population Size	48
PART 9: Multi-Step Problems	49

CHAPTER TWO—THE NUMBER SYSTEM

TOPIC A: Addition and Subtraction of Signed Rational Numbers	
PART 1: Describing Situations in Which Opposite Quantities Combine to Make Zero	57
PART 2: Adding Signed Rational Numbers	
Section a: Adding Signed Rational Numbers Using a Number Line	60
Section b: Adding Signed Rational Numbers Horizontally	62
Section c: Adding Signed Rational Numbers Vertically.....	65
Section d: Adding Signed Rational Numbers Verbal Problems.....	70
PART 3: Subtracting Signed Rational Numbers	
Section a: Subtracting Signed Rational Numbers Using a Number Line	74
Section b: Subtracting Signed Rational Numbers Horizontally	75
Section c: Subtracting Signed Rational Numbers Vertically	79
Section d: Subtracting Signed Rational Numbers Verbal Problems	85
TOPIC B: Multiplication and Division of Signed Rational Numbers	
PART 1: Multiplying Signed Rational Numbers	
Section a: Multiplying Rational Numbers Using Models	87
Section b: Multiplying Signed Rational Numbers Horizontally.....	88
Section c: Multiplying Signed Rational Numbers Vertically.....	89
Section d: Multiplying Signed Rational Numbers Verbal Problems	92
PART 2: Dividing Signed Rational Numbers	
Section a: Dividing Signed Rational Numbers Horizontally	95
Section b: Dividing Signed Rational Numbers Vertically	97
Section c: Dividing Signed Rational Numbers Verbal Problems.....	100
PART 3: Conversion of Rational Numbers to Decimal Form	102
TOPIC C: Properties of Numbers and Order of Operations With Signed Rational Numbers.....	105
TOPIC D: Real-World and Mathematical Problems Involving Operations With Rational Numbers.....	111

CHAPTER THREE—EXPRESSIONS & EQUATIONS

TOPIC A: Operations on Linear Expressions With Rational Coefficients	
PART 1: Addition of Linear Expressions	121
PART 2: Subtraction of Linear Expressions	123

PART 3: Factoring Linear Expressions.....	125
TOPIC B: Relationships of Quantities in Equivalent Expressions.....	127
TOPIC C: Arithmetic Strategies to Solving Multi-step Real-life and Mathematical Problems.....	130
TOPIC D: Algebraic Strategies to Solving Multi-step Real-life and Mathematical Problems	
PART 1: Algebraic Equations.....	139
PART 2: Algebraic Inequalities.....	145

CHAPTER FOUR—GEOMETRY

TOPIC A: Proportion of Scale Drawings to Actual Dimensions.....	155
TOPIC B: Drawing Geometric Shapes According to Specified Conditions.....	160
TOPIC C: Two-dimensional Figures Resulting From Slicing Three-dimensional Figures.....	167
TOPIC D: Area and Circumference of Circles	
PART 1: Circumference of a Circle.....	174
PART 2: Area of a Circle.....	179
TOPIC E: Supplementary, Complementary, Vertical, and Adjacent Angles	
PART 1: Supplementary Angles.....	184
PART 2: Complementary Angles.....	194
PART 3: Vertical Angles.....	199
PART 4: Adjacent Angles.....	211
TOPIC F: Area, Volume, and Surface Area of Two- and Three-dimensional Figures	
PART 1: Area of Two-dimensional Figures	
Section a: Area of Rectangles.....	217
Section b: Area of Triangles.....	222
Section c: Area of Parallelograms.....	227
PART 2: Volume of Right Prisms and Cubes	
Section a: Volume of Right Prisms.....	232
Section b: Volume of Cubes.....	237
PART 3: Surface Area.....	241

CHAPTER FIVE—STATISTICS & PROBABILITY

TOPIC A: Statistical Questions and Methods of Sampling Unbiased Data.....	249
TOPIC B: Making Inferences About Data and Using Data to Make Estimates or Predictions.....	252
TOPIC C: Overlap and Comparison of Two Similar Numerical Data Distributions.....	257
TOPIC D: Describing a Data Set Using Center, Spread, and Shape	
PART 1: Determining the Mean (Average).....	263
PART 2: Determining the Median.....	269
PART 3: Determining the Mode.....	274
PART 4: Determining the Range.....	280
TOPIC E: Likelihood of an Event Occurring.....	287
TOPIC F: Predicting the Frequency of an Event Using Experimental Probability	
PART 1: Predicting the Outcome of an Experiment.....	289
PART 2: Experimental Probability of an Event.....	297
TOPIC G: Using Probability Models to Find Probabilities of Single Events	
PART 1: Analyzing Probability of Events With Equal Probability Outcomes.....	305
PART 2: Determining Theoretical Probability by Observing Frequencies in Data Generated	
From a Chance Process.....	309
TOPIC H: Probabilities of Compound Events	
PART 1: Interpreting Compound Probability Using Sample Spaces and Tree Diagrams.....	322
PART 2: Determining the Probability of Compound Independent Events.....	324
PART 3: Determining the Probability of Compound Dependent Events.....	335
PART 4: Designing and Using Simulations to Determine Probability for Compound Events.....	342
