

8TH GRADE COMMON CORE MATH

TABLE OF CONTENTS

CHAPTER ONE—THE NUMBER SYSTEM		
TOPIC A: Rational and Irrational Numbers		
PART 1: Properties of Rational and Irrational Numbers	1	
PART 2: Converting Fractions to Decimals		
Section a: Fractions Resulting in Terminating Decimals	4	
Section b: Fractions Resulting in Repeating Decimals.....	6	
PART 3: Converting Decimals to Fractions		
Section a: Converting Terminating Decimals to Fractions.....	8	
Section b: Converting Repeating Decimals to Fractions.....	10	
TOPIC B: Approximating the Value of Irrational Numbers and Expressions		
PART 1: Approximating Square Roots and Cube Roots		
Section a: Approximating Square Roots	12	
Section b: Approximating Cube Roots.....	19	
Section c: Calculator Approximations.....	24	
PART 2: Rational Approximations of Irrational Numbers		
Section a: Comparing Sizes of Rational and Irrational Numbers.....	27	
Section b: Locating Rational and Irrational Numbers on a Number Line	29	
Section c: Estimating the Value of Irrational Expressions	38	
CHAPTER TWO—EXPRESSIONS AND EQUATIONS		
TOPIC A: Integer Exponents.....		41
TOPIC B: Square Roots and Cube Roots		
PART 1: Evaluating the Square Root of a Perfect Square	48	
PART 2: Evaluating the Cube Root of a Perfect Cube	49	
PART 3: Solving Equations of the Form $x^2 = p$, $p > 0$	50	
PART 4: Solving Equations of the Form $x^3 = p$	52	
TOPIC C: Scientific Notation		
PART 1: Translating from Decimal Notation to Scientific Notation.....	54	
PART 2: Translating from Scientific Notation to Decimal Notation.....	55	
PART 3: Comparing Quantities in Scientific Notation and Decimal Notation.....	57	
TOPIC D: Applying Scientific Notation		
PART 1: Performing Arithmetic Operations on Numbers Expressed in Scientific Notation.....	58	
PART 2: Interpreting Scientific Notation Generated by Technology	60	
TOPIC E: Proportional Relationships		
PART 1: Graphs of Proportional Relationships		
Section a: Graphs of Equations of the Form $y = mx$	62	
Section b: Applications of Graphs of Proportional Relationships.....	68	
PART 2: Interpreting Unit Rate of Change as Slope	82	
PART 3: Comparing Proportional Relationships.....	91	
PART 4: Proportional Equations		
Section a: Solving Proportional Equations.....	98	
Section b: Real World and Mathematical Applications	100	
TOPIC F: Linear Equations and Graphs		
PART 1: Slope of a Line		
Section a: Properties of Slope	102	
Section b: Computing Slope.....	104	
PART 2: Equations of the form $y = mx + b$		
Section a: Determining the Equation of a Straight Line Given a Graph	107	
Section b: Determining the Equation of a Line Given Slope and y-intercept.....	109	
Section c: Determining Slope and/or y-intercept from an Equation or a Graph.....	113	
Section d: Determining the Equation of a Line Given Two Points	119	
PART 3: Graphs of Linear Equations		
Section a: Graphing a Line Using a Table of Values	124	

Section b: Graphing a Straight Line Using Slope and y-intercept	132
Section c: Graphing a Straight Line Given Its Equation	133
TOPIC G: Solving First Degree Equations in One Variable	
PART 1: Solutions Employing Inverse Operations	
Section a: Equations with No or an Infinite Number of Solutions.....	141
Section b: Solving First Degree Equations of the Form $ax + b = c$	142
PART 2: Solutions Requiring Combining Like Terms.....	143
PART 3: Solutions Requiring the Distributive Property	144
PART 4: Real World and Mathematical Applications	146
TOPIC H: Systems of Linear Equations	
PART 1: Importance of the Point of Intersection of Two Linear Graphs.....	151
PART 2: Algebraic Solutions	
Section a: Substitution	153
Section b: Linear Combination Method.....	154
Section c: Solving by Inspection.....	155
Section d: Solving by an Algebraic Method of Choice.....	157
PART 3: Graphical Solutions	160
PART 2: Real World and Mathematical Applications	165
CHAPTER THREE—FUNCTIONS	
TOPIC A: Properties of Functions	
PART 1: Defining and Identifying Functions	171
PART 2: Input and Output of a Function	
Section a: Determining Input and Output Values	177
Section b: Relating Input and Output to the Graph of a Function.....	179
TOPIC B: Comparing Properties of Linear Functions	194
TOPIC C: Linear Functions	
PART 1: Graphs of Linear Functions.....	201
PART 2: Linear Functions vs. Non-Linear Functions	208
TOPIC D: Modeling Linear Relationships	
PART 1: Representing Linear Functions Algebraically	
Section a: Writing an Equation of a Linear Function	213
Section b: Constructing a Function to Model a Linear Relationship	222
PART 2: Rate of Change and Initial Value	229
TOPIC E: Qualitative Features of a Function	233
CHAPTER FOUR—GEOMETRY	
TOPIC A: Properties of Transformations	
PART 1: Parts Preserved or Not Preserved	241
PART 2: Verifying Properties of Congruency Transformations	245
TOPIC B: Using Transformations to Verify Congruency.....	250
TOPIC C: Congruency Transformations of the Plane	
PART 1: Line Reflections	256
PART 2: Translations	268
PART 3: Rotations	274
PART 4: Sequences of Transformations	288
TOPIC D: Similarity Transformations	
PART 1: Using Transformations to Verify Similarity.....	291
PART 2: Dilations	298
TOPIC E: Angle Measures	
PART 1: Sum of the Interior Angles of a Triangle.....	310
PART 2: Exterior Angle of a Triangle	319
PART 3: Angles Created When Two Parallel Lines Are Cut by a Transversal	
Section a: Determining Angle Pair Relationships.....	327
Section b: Corresponding Angles	335
Section c: Interior Angles on the Same Side of the Transversal	340
Section d: Alternate Interior and Exterior Angles.....	344
Section e: Intra-Angle Relationships in a Diagram.....	349
Section f: Extended Response Questions.....	349

PART 4: Angle-Angle Criterion for Similarity of Triangles	351
TOPIC F: Pythagorean Theorem and Distance	
PART 1: Proof of the Pythagorean Theorem and Its Converse	355
PART 2: Applying the Pythagorean Theorem and Its Converse	
Section a: Finding the Length of Sides of Right Triangles	361
Section b: Determining Whether a Given Triangle is a Right Triangle	366
PART 3: Distance between Two Points in the Coordinate Plane.....	370
TOPIC G: Solid Geometry	
PART 1: Cylinders	
Section a: Surface Area of a Cylinder	373
Section b: Volume of a Cylinder.....	376
PART 2: Volume of Cones	381
PART 3: Volume of Spheres.....	384
PART 4: Prisms	
Section a: Volume of a Rectangular Prism.....	386
Section b: Volume of a Triangular Prism.....	391
CHAPTER FIVE—STATISTICS AND PROBABILITY	
TOPIC A: Scatter Plots for Bivariate Measurement Data	
PART 1: Constructing and Interpreting a Scatter Plot	395
PART 2: Patterns Associated with a Scatter Plot.....	408
TOPIC B: Informally Modeling a Relationship between Two Quantitative Variables Using Straight Lines.....	417
TOPIC C: Modeling Linear Relationships	
PART 1: Writing an Equation for the Line of Best Fit	427
PART 2: Using a Calculator to Find an Equation for the Line of Best Fit.....	438
TOPIC D: Two-Way Frequency Tables	
PART 1: Constructing and Interpreting Two-Way Frequency Tables.....	444
PART 2: Relative Frequency	449
