

# ALGEBRA 1 COMMON CORE MATH

## TABLE OF CONTENTS

### CHAPTER 1—NUMBERS & QUANTITIES

#### TOPIC A: The Real Number System

##### PART 1: Properties of Real Numbers

Section a: Commutative, Associative, and Distributive Laws .....

Section b: Additional Properties of Real Numbers .....

##### PART 2: Operations With Numbers in Radical Form

Section a: Simplification of Numbers in Radical Form .....

Section b: Addition and Subtraction of Numbers in Radical Form .....

Section c: Multiplication of Numbers in Radical Form .....

Section d: Division of Numbers in Radical Form .....

##### PART 3: Mathematical and Real-World Applications .....

#### TOPIC B: Rules of Exponents

##### PART 1: Employing Rules of Positive Integer Exponents

Section a: Multiplication of Powers .....

Section b: Raising a Power to a Power .....

Section c: Division Rules .....

Section d: Simplifying Expressions Using Rules of Exponents .....

##### PART 2: Negative Integer and Zero Exponents .....

##### PART 3: Mathematical and Real-World Applications .....

### CHAPTER 2—ALGEBRA

#### TOPIC A: Understanding Algebraic Expressions .....

#### TOPIC B: Equivalent Forms of an Algebraic Expression

##### PART 1: Factoring a Polynomial

Section a: Finding the Greatest Common Factor .....

Section b: Factoring the Difference of Two Perfect Squares .....

Section c: Factoring by Grouping the Terms .....

Section d: Factoring Trinomial Expressions .....

Section e: Factoring a Polynomial Completely .....

##### PART 2: Completing the Square .....

#### TOPIC C: Operations With Polynomial Expressions

##### PART 1: Adding Polynomial Expressions .....

##### PART 2: Subtracting Polynomial Expressions .....

##### PART 3: Multiplying Polynomial Expressions

Section a: Product of a Monomial and a Polynomial .....

Section b: Product of Two Binomials .....

Section c: Products of Polynomials .....

Section d: Applying and Representing Products of Polynomials Geometrically .....

##### PART 4: Mixed Operations .....

#### TOPIC D: Equations and Inequalities

##### PART 1: First Degree Equations in One Variable

Section a: Understanding 1st Degree Equations .....

Section b: Solving 1st Degree Equations .....

Section c: Mathematical and Real-World Applications .....

##### PART 2: First Degree Inequalities in One Variable

Section a: Solving Algebraically .....

Section b: Representing the Solution Set Graphically .....

Section c: Mathematical and Real-World Applications .....

##### PART 3: Compound Equations and Inequalities .....

##### PART 4: Quadratic Equations

Section a: Solving by Taking a Square Root .....

Section b: Solving by Completing the Square .....

Section c: Solving by Factoring .....

- Section d: The Quadratic Formula.....
- Section e: The Nature of the Roots.....
- Section f: The Discriminant of a Quadratic Function.....
- Section g: Mathematical and Real-World Applications.....
- PART 5: Literal Equations and Formulas.....
- PART 6: Solving Algebraic Proportions.....
- TOPIC E: Equations and Inequalities in Two Variables
  - PART 1: The Solution Set of an Equation in Two Variables.....
  - PART 2: Linear Inequalities in Two Variables
    - Section a: Representing the Solution Set Graphically.....
    - Section b: Mathematical and Real-World Applications.....
- TOPIC F: Systems of Linear Equations and Inequalities
  - PART 1: Understanding Systems of Linear Equations and Inequalities.....
  - PART 2: Solving Systems of Linear Equations Algebraically
    - Section a: Elimination Method.....
    - Section b: Substitution Method.....
  - PART 3: Solving System of Linear Equations and Inequalities Graphically
    - Section a: Graphical Solutions to Systems of Linear Equations.....
    - Section b: Graphical Solutions to Systems of Linear Inequalities.....
  - PART 4: Mathematical and Real-World Applications.....

### **CHAPTER 3—FUNCTION THEORY**

- TOPIC A: Understanding Functions
  - PART 1: Properties of Functions
    - Section a: Defining and Representing Functions.....
    - Section b: Identifying a Function.....
  - PART 2: Domain and Range of a Function.....
  - PART 3: Function Notation.....
- TOPIC B: Sequences
  - PART 1: Introduction to Sequences
    - Section a: Understanding Sequences.....
    - Section b: Arithmetic Sequences Versus Geometric Sequences.....
  - PART 2: Arithmetic Sequences.....
  - PART 3: Geometric Sequences.....
  - PART 4: Recursive Definitions.....
  - PART 5: Mathematical and Real-World Applications.....
- TOPIC C: Average Rate of Change.....
- TOPIC D: Analyzing Functions
  - PART 1: Basic Key Features of All Functions.....
  - PART 2: Linear Functions
    - Section a: Key Features of Linear Functions.....
    - Section b: Graphs of Linear Functions.....
  - PART 3: Quadratic Functions
    - Section a: Key Features of Quadratic Functions.....
    - Section b: Using Various Forms to Represent a Quadratic Function.....
    - Section c: Graphing Quadratic Functions.....
    - Section d: Mathematical and Real-World Applications.....
  - PART 4: Polynomial Functions.....
  - PART 5: Exponential Functions
    - Section a: Properties of Exponential Functions.....
    - Section b: Graphing Exponential Functions.....
  - PART 6: Finding Solutions to Equations of the Form  $f(x) = g(x)$ .....
  - PART 7: Additional Functions
    - Section a: Absolute Value Functions.....
    - Section b: Square Root Functions.....
    - Section c: Cubic and Cube Root Functions.....
    - Section d: Piecewise-Defined Functions.....
    - Section e: Step Functions.....
- TOPIC E: Building New Functions From Existing Functions (Transformations)

PART 1: Reflections .....	
PART 2: Translations .....	
PART 3: Dilations .....	
TOPIC F: Constructing and Comparing Growth and Decay Models	
PART 1: Linear Growth and Decay Models.....	
PART 2: Exponential Growth and Decay Models	
Section a: Understanding Exponential Growth and Decay .....	
Section b: Constructing Growth and Decay Models .....	
PART 3: Comparing Growth and Decay Models .....	

**CHAPTER 4—DESCRIPTIVE STATISTICS**

TOPIC A: Representing and Interpreting Data With Various Plots	
PART 1: Shapes of Dot Plots, Box Plots, and Histograms .....	
PART 2: Computing and Interpreting the Spread of Data Sets	
Section a: Range and Interquartile Range .....	
Section b: Mean Absolute and Standard Deviation .....	
TOPIC B: Summarizing, Representing, and Interpreting Data on Two Categorical and Quantitative Variables	
PART 1: Using Two-Way Frequency Tables .....	
PART 2: Representing the Relationship Between Two Variables	
Section a: Scatter Plots .....	
Section b: Linear Regression.....	
Section c: Residuals and Residual Plots.....	
Section d: Non-Linear Regression.....	
TOPIC C: Interpreting Linear Models	
PART 1: The Linear Correlation Coefficient.....	
PART 2: Correlation vs. Causation.....	

**APPENDIX—HOW TO ADD MATH GRIDS & TABLES TO AN EXAM** .....
