

CALCULUS

TABLE OF CONTENTS

OBJECTIVE ONE—FUNCTIONS & LIMITS

TOPIC A: Basic Function Concepts	1
TOPIC B: Limits	
PART 1: Analytic Computation	10
PART 2: End Behavior	15
PART 3: Graphical and Numerical Representations	17
TOPIC C: Asymptotic Behavior	22
TOPIC D: Continuity	25
TOPIC E: Limits of Trigonometric Functions	29

OBJECTIVE TWO—THE DERIVATIVE

TOPIC A: Differentiation Techniques	
PART 1: Derivatives of Algebraic Functions	31
PART 2: Derivatives of Trigonometric Functions	33
PART 3: Evaluation of the Derivative	35
PART 4: Higher Order Derivatives	36
PART 5: Chain Rule and Symbolic Differentiation	37
TOPIC B: Tangent and Normal Lines	39
TOPIC C: Limit Definition and Rates of Change	41
TOPIC D: Implicit Differentiation	43
TOPIC E: Differentiability and Continuity	47
TOPIC F: Approximating the Function and the Derivative	49

OBJECTIVE THREE—APPLICATIONS OF THE DERIVATIVE

TOPIC A: Related Rates	55
TOPIC B: Increase, Decrease, and Concavity	59
TOPIC C: Relative Extrema	67
TOPIC D: Absolute Extrema	70
TOPIC E: Optimization	72
TOPIC F: Mean Value Theorem, Rolle’s Theorem, and Constant Difference Theorem	75
TOPIC G: Rectilinear Motion	78

OBJECTIVE FOUR—INTEGRALS

TOPIC A: Antiderivatives	
PART 1: Basic Formulas and Methods	
◆ Algebraic Fractions	85
◆ Initial Value Problems	87
◆ Antiderivatives Involving Trigonometric Functions	89
PART 2: Change of Variable	91
TOPIC B: Definite Integrals	
PART 1: Computing Definite Integrals	
◆ Using Area to Compute a Definite Integral	95
◆ Fundamental Theorem of Calculus (Part I)	97
◆ Numerical Integration	102
PART 2: Properties of the Definite Integral	104
PART 3: Fundamental Theorem of Calculus (Part II)	107
PART 4: Riemann Sums	109
PART 5: Average Value of a Function	111

OBJECTIVE FIVE—APPLICATIONS OF THE INTEGRAL

TOPIC A: Area Between Two Curves	113
TOPIC B: Volume	
PART 1: Uniform Cross-Sectional Area	116
PART 2: Solids of Revolution	118

TOPIC C: Rectilinear Motion	121
TOPIC D: Total Change	125
OBJECTIVE SIX—TRANSCENDENTAL FUNCTIONS	
TOPIC A: Inverse of a Function and its Derivative	129
TOPIC B: Natural Logarithms and Exponential Function	
PART 1: Natural Logarithms and its Inverse Function	
◆ Properties, Graphs, and Limits	131
◆ Derivatives of Natural Logarithms and the Exponential Function	136
◆ Integrals Involving Natural Logarithms and the Exponential Function	139
PART 2: General Exponential Functions	141
TOPIC C: Inverse Trigonometric Functions	
PART 1: Derivatives of Inverse Trigonometric Functions	144
PART 2: Integrals of Trigonometric Functions	146
TOPIC D: Differential Equations	
PART 1: Separation of Variables	148
PART 2: Exponential Growth and Decay	151
PART 3: Slope Fields	
◆ Graphing a Slope Field	153
◆ Matching a Slope Field to a Differential Equation	157
◆ Matching a Slope Field to a Solution Curve	164
◆ Sketching a Solution Curve	171
APPENDIX—HOW TO ADD MATH GRIDS & TABLES TO AN EXAM	179
