

How to Put on an Elle Jay Jewelry Wrap Bracelet

- 1) Undo the clasp and let the leather strands hang long and center the wood on the smallest part of your wrist.

- 2) Wrap one side of the leather neatly on one side of the wood.

- 3) And then neatly wrap the other side.

- 4) Turn your wrist over and affix the clasp. There is typically more than one setting that can be used depending on your wrist size.

- 5) Alternatively, the wrap can be worn more loosely (or snugly) either for style or to accommodate a wrist size with the clasp on top, like this.
