#6 – 32 S.S Washer and Nylock Nut

#6 – 32 x ¾" S.S Button Head Bolts

Switch Pros Hardware
***READ ALL INSTRUCTIONS THOROUGHLY FROM START TO FINISH BEFORE BEGINNING INSTALLATION! ***

Installation Instructions:

1. Unbox all parts. Familiarize yourself with the parts and the diagram above.

2. If you are installing the Keypad into the headliner of a vehicle with an overhead console, it will need to be removed before installation. If you are installing the Keypad into another location, verify the Keypad, Bezel and Backer all fit without any interference. Begin planning out your wiring once fitment is verified.

3. In your vehicle, align the Acrylic Backer on your headliner. Double check clearance behind the headliner to mount and wire the Switch Pros Keypad. Mark the (8) mounting holes and Switch Pros Keypad harness hole as shown right. (9100 backer shown)

4. Use a sharp pick to create the holes for mounting the Keypad. Use a razor blade to cut the hole for the harness. Use the 5/32" and ¾" bits respectively if mounting to a tougher surface.

For questions or help with the installation, please call SDHQ Offroad @ 480-633-2929
Mon.–Fri. 8:00am–5:30pm and Sat. 8:00am–3:30pm Arizona Time. www.sdhqoffroad.com

5. Install the Switch Pros supplied threaded studs into the back of the Keypad. Install the Keypad into the SDHQ Keypad Bezel. Pull the Keypad harness through the hole and align the Keypad and Bezel.

6. Align the Acrylic Backer behind the headliner and pull the Keypad Harness through the hole. Place the Acrylic Backer over the threaded studs on the Keypad. Use the Switch Pros Nylock nuts to secure the backer.

7. Insert the (4) supplied #6 bolts through the mounting holes on the SDHQ Bezel. Use the supplied washers and nylock nuts to secure the bezel to the backer. Tighten all hardware.

8. Finish wiring your Switch Pros. Enjoy your new SDHQ Switch Pros Keypad Mount!
