Mon.-Fri. 8:00am-5:30pm and Sat. 8:00am-3:30pm Arizona Time. www.sdhqoffroad.com

Installation Instructions:

1. Unbox your SDHQ Lexus GX470 A-Pillar Light Mounts, noting which one is the driver side mount and the passenger side mount. Wipe down the surface of the A-pillar as shown and apply the sticky side of the rubber isolators to the A-pillar, the bottom edge of the isolator should line up with the bend 2nd from the top. (**NOTE:** Be sure to remove to protective plastic covering the non-sticky side of the Rubber Isolator)

2. Prop open your hood and start on the driver side hood hinge with the (2) 12mm bolts, mark the hood and hinge to ensure the hood is still aligned correctly after install. Remove the front bolt attaching the hood to the hinge. Next loosen but do not remove the rear bolt. Position your driver side bracket over the hood hinge aligning the front mounting hole while the rear of the mount is angled away allowing access to the rear bolt. Insert the front bolt through the bracket and loosely thread back in still allowing the mount to rotate.

3. Remove the rear bolt and rotate the mount to align with its hole. Insert bolt through the rear hole of the mount and thread into the hood. Push the mount forward until the rubber isolator is touching the hood. Tighten down bolts while aligning hinge with paint outline of previous location on the hood.

4. Repeat Steps 2-3 for the Passenger Side, while first unclipping the windshield washer hose from the hood hinge, the mount goes between the washer hose and hood hinge when installed. Reinstall Washer hose clip when finished.

5. Enjoy your SDHQ Lexus GX470 A-Pillar Light Mounts!
