

Sirocco™ HoseLeash
.. a Belt-clip-Leash .. for managing your Vacuum and Pressure Hoses

How it works...

More powerful vacuum systems allow greater performance and longer lengths of vacuum hose, but the weight of the hose frequently disconnects from the tool being used..

The images above show how the HoseLeash connecting the vacuum hose **to the user's belt** , ..allowing your legs to tow the hose, instead of your shoulders..

This relieves stress your arms and shoulders, and on the vac-hose to tool connection..

..thus improving overall system performance.

Vacuuming Surface Cleaner requires both hands for operation, and the HoseLeash makes it possible.

Assembly...

The **HoseLeash** has an easily adjustable strap.. it is long enough to also manage your pressure hose, and plenty strong enough to last for years, and years.

Questions ?... Call us at 800-400-2532 or your local dealer for answers. We like to help !
