

#SC21v Vacuuming Surface cleaner

Control overspray from pressure washing sidewalks, warehouse floors, tile surfaces and more. Sanitize with up to 250°F as fast as you can walk, and have **dry floors in minutes** !
Add our filtration for Re-Use and have the ultimate in water conservation too !
 Our Closed Loop Cleaning Systems are revolutionary in enviro-compliance and time savings.
 When the pressure washing and wash water control are done **simultaneously**...(aka.. **NO Rinsing** !)
 you have a **net increase in workspeed** which quickly **pays for** the equipment !

With the convenience of the **Auto Pump-Out** feature you'll never have to stop working to dump your tanks.

Vacuums, hoses and waste tanks are sold separately

Quick-couple trigger handle for easy removal and attachment of spray wand

High pressure water filter insures clean spray nozzles

Hand held "SideKick" **cleaning wand** conveniently located onboard for cleaning in corners and tight areas

Triple vacuum intake tubes remove **90-98%** of dirty wash water during cleaning process

Stainless steel outer shell for added strength and rust resistance.

12" version Works great with 3 to 4gpm and a shop-vac !

Choose from several powerful yet **affordable** vacuum options to power your new reclaim system... Performance pays for itself !!

Wheeled carriage for easy portability over uneven terrain and to minimize or eliminate back strain. ..while the vacuum sucks against the ground.

Model	Max PSI	Max GPM	Max Temp.	SHIP WT
SC-12v	4000	4	230° F	12 lbs.
SC-12v+	..modified vers.. requires only 75 CFMs to work !			
SC-21v	5000	8	230° F	39 lbs.
SC-30v	4500	14	230° F	50 lbs.
SC-40v	4500	20	230° F	70 lbs.

The #1 MOST important reason to own these is instant-capture, but.. When you see your quality of clean improve too.. So don't be surprised..
The vacuum draws the water away from the spray area, removing the water-puddle from slowing the spray-impact. Also allowing for a faster-spinning spray-bar.. = more WorkSpeed !

21" vacuum version requires only 170 CFMs and **4 gpm at 4000 psi** "brings it to life" but.. 5.5 to 6.5 gpm at 4000+ is best ... to 98% capture ! **21"** can go up to **5000 sq.ft/hr**, **30"** version requires **450cfm min.** but if you want to go **FAST**, and you have the equipment to run it.. you go like crazy !! do up to **20,000 sq.ft/hr. !**
40" vers. requires **500-650cfm ..** for up to **40,000 sq.ft/hr.**
7000 psi versions also available.

3 and 4 nozzle SprayBars are available for the **21"** and **40"** version with **dual 20"** rotors
 3 nozzle arms are **standard** on the **30"** and **40"** versions. **call with every question !**

Sirocco Vacuums and **BulldogPro PressureWashers** are manufactured by..
