**Device Overview**

- **Reversible Wristband**
- **Core**
- **Clasp**
- **Touch Button**
- **Optical Sensor**
- **Metallic contact for charging**

**How to wear your Exercise Tracker**

1. **Wear the Exercise Tracker on your wrist**
   - Put on the wristband with the screen facing up and the band wrapped around your wrist. Slide one band through the loop of the other band, and align the clasp along the band to find the holes where best fit the clasps.
   - Squeeze both clasps into the holes on the wristband until you hear a click, indicating the band is securely fastened.
   - Note: The wristbands are both replaceable and reversible.

2. **Fasten the Exercise Tracker with clasp**
   - Squeeze both clasps into the holes on the wristband until you hear a click, indicating the band is securely fastened.
   - Note: The wristbands are both replaceable and reversible.

3. **Detecting your Heart Rate**
   - Please make sure the wristband is worn as tightly as possible on the wrist without any discomfort, in order to enhance the accuracy of heart rate signals that are detected.
   - Wear the wristband three fingers away from your wrist. When “-----” text appears on the screen, please stay still briefly for about 10 seconds to obtain a heart rate reading.

4. **Charging the Exercise Tracker**
   - To charge your Exercise Tracker, place it in the charging box at the other end of the USB cable. Close the box afterwards, and make sure the Exercise Tracker is securely covered. Plug the USB connector to either a PC or power adapter to start charging.
   - Important Notice: The product is shipped with the screen and keys locked, and will be unlocked once it is charged via USB connection. Please make sure the “Charging” icon appears while it is being charged, indicating the device is connected correctly and getting charged.

5. **Change the wristband**
   - 1. Remove the wristbands by sliding out both bands from the slots on both sides of the core.
   - 2. Insert the new bands into the slots on both sides of the core.
   - Important Notice: Failure to follow the instructions above might cause damage to the device.
Get Started with the Exercise Tracker

1. **Download My Fit Log App**
   - Download My Fit Log app from Google Play or App Store on your smartphone:

Supported Device
- Any Android smartphone (v4.3 and up) with built-in 4.0 Bluetooth connectivity;
- iPhone 4s and later models, iPad 2 and later models, and iPod Touch (with iOS version 7.0 and up).

2. **Set Up the Exercise Tracker**
   - Your Exercise Tracker can be configured directly on the My Fit Log app.
   - **First time setup:**
     1. Charge the device to unlock the key and screen.
     2. Open the My Fit Log app.
     3. A Setup Wizard will be launched automatically.
     4. Follow the on-screen instructions to proceed with more settings.
   - **Set up a new device from Settings:**
     1. Open the My Fit Log app.
     2. Tap the app icon at the upper left corner to open function menu.
     3. Choose Settings.
     4. Tap Setup New Device under MORE DEVICE SETTINGS.
     5. Follow the on-screen instructions to continue.
   - **Note:** Your personal information is used to calculate your Base Metabolic Rate (BMR), which determines your calories burned.

3. **Start Using the Exercise Tracker**
   - **1. Switch between different function modes**
     1. Tap the button twice to wake up the device screen.
     2. Long-press the button on the exercise tracker until you see 4 icons on the screen for mode selection.
     3. Tap the button twice to switch mode.
     4. You will be entering the selected mode in 3 seconds.
   - **2. Change display information**
     Information shown on the screen will vary as you press the button on the exercise tracker to toggle between screens.
   - **3. Exercise Tracker modes**
     **Daily mode:** Analyzes your daily data, including steps taken and calories burned.
     **Sleep mode:** Tracks your sleep pattern and quality.
     **Sports mode:** Starts a workout and displays information including duration, steps taken, calories burned, and distance traveled during the workout.
     **Nap mode:** Awakes you via vibration after a short nap.

4. **Features of the Exercise Tracker and My Fit Log App**
   - **Silent Alarm**
     - Silent alarm of the exercise tracker gives you a wake-up alert via soft vibrations.
     - While in the sleep mode, the alarm can be dismissed by long-pressing the button on the exercise tracker.
   - **Notification**
     - You will be notified with incoming calls, SMS, E-Mail, or alerts from the social apps via vibration.
     - When notified about an incoming call on an Android smartphone, you may reject the call by long-pressing the button on the exercise tracker.
   - **Notification can be set up from:** Open My Fit Log App > Menu > Notification.

5. **Screen Description**
- 1. Connecting
- 2. Disconnected
- 3. Alarm
- 4. Daily Mode
- 5. Date
- 6. Overall Progress
- 7. Battery Status
- 8. Steps
- 9. Calories
- 10. Heart Rate
- 11. Aerobic (Zone 3 and above)
- 12. Duration
- 13. Distance
- 14. Time

The Exercise Tracker has a 1 year warranty to be free of manufacturing defects in materials and workmanship under normal applications for 1 year of the original owner. If this product becomes inoperable due to defect and requires repair, return the product with all component pieces and proof of purchase to Thermor Ltd.

Federal Communications Commission (FCC) Statement 15.21

This equipment complies with FCC RF Radiation Exposure Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Note:
- The use of a non-shielded computer interface cable with this device may result in interferences to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Installation of antenna**

A radio/TV antenna may be installed indoors or outdoors depending on the characteristics of the location where the antenna is to be installed.

Notes:
- In case of doubt, it is advisable to consult a qualified technician.
- To assure maximum performance and safety of the equipment, high-quality cables are recommended.

**Power input type:** DC 5V USB cable

**Charging temperature:** 0° to 45°C (32° to 113°F)

**Battery type:** Rechargeable Li-Poly, 3.7 Vdc

**Power input:** 5V DC via USB cable

**FCC ID:** TPL-BT1500

**Antenna type:** Internal antenna

**Antenna power:** 20mW

**Maximum output power:** 8 mW

**Operating frequency:** 2.402 GHz to 2.480 GHz

**Transmit power:** 20 mW

**Max power output:** 20 mW

**Max RF output power:** 40 mW

**Output power:** 20 mW

**FCC RF Radiation Exposure Statement:**

- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
  1. This device may not cause harmful interference, and
  2. This device must accept any interference received, including interference that may cause undesired operation.

- Duration of operation:
  - The equipment was tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
    - Reorient or relocate the receiving antenna.
    - Increase the separation between the equipment and receiver.
    - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
    - Consult the dealer or an experienced radio/TV technician for help.
