

**MADE IN USA**

### **Frequently Asked Questions**

#### **How do I clean my Nalgene Bottle?**

The great thing about Nalgene Bottles is that they are Dishwasher Safe. If you are more comfortable you can wash your bottles by hand.

For the dishwasher; bottles should be placed on top rack only and away from any heating elements.

#### **What type of plastic do you use?**

We use plastic manufactured by Eastman. The plastic is called Tritan and is used in the majority of Nalgene bottles.

#### **Can I freeze my Nalgene Bottle?**

Yes you can. Like most liquids put in the freezer, only fill your bottle about 2/3 full to allow for expansion (and prevent cracking). Most Nalgene bottles can with stand a wide range of temperature variance.
