Thank you for purchasing the BIOS Diagnostics™ stethoscope. Please read these instructions thoroughly and carefully before attempting to use this product.

The stethoscope must be placed on the desired area of the body using only reasonable pressure.

Assembly and Use

1. For maximum acoustic seal and comfortable fit, the dual head stethoscope is equipped with comfort sealing eartips. The comfort sealing tip is universal in size, and designed to conform to the ear canal so as to block out ambient noise. The eartips are screwed onto the tips for a secure connection.

2. To adjust the angle of the eartubes, hold the tubing in one hand and rotate each eartube to the correct angle as shown in fig. 2.

3. To reduce spring tension, grasp each eartube at its bend and gently pull outwards as shown in fig. 3.

4. To increase spring tension, squeeze the eartubes as shown in fig. 4.

5. When the eartips are in your ears, the eartubes should be pointed slightly forward into the ear canal.

Cleaning

In order to avoid dust accumulation and dirt, always store the stethoscope in its packaging. The outside of the instrument can be cleaned with a damp, soft, and fluff-free fabric. For disinfection, the stethoscope can be cleaned with a fabric moistened with alcohol. Do not use thermal sterilization or soaking.

Warning

Never bring the stethoscope into contact with liquid and make sure that no liquid penetrates the housing! Since the stethoscope is not designed for operations, simple cleaning and/or disinfection with a surface disinfectant with an alcoholic base is sufficient.

This stethoscope has a dual head to hear high or low frequencies, simply rotate the chestpiece 180°.

DELUXE DUAL HEAD STETHOSCOPE

5 Year Warranty

For the best diagnostic experience, please use a stethoscope that is properly fitted to your ears. Improperly wearing the stethoscope headset can result in poor acoustical seal, and in some cases, complete sound blockage.

The stethoscope is designed to be used on the desired area of the body using only reasonable pressure.
