Thank you for purchasing the BIOS Diagnostic™ stethoscope. Please read these instructions thoroughly and carefully before attempting to use this product.

Assemble and Use

1. Select the eartips that you prefer. For maximum acoustic seal and comfortable fit, the cardiology stethoscope is equipped with comfort sealing eartips. The comfort sealing tip is universal in size, and designed to conform to the ear canal so as to block out ambient noise. The eartips are screwed onto the tips for a secure connection.

   Note: Different sizes of eartips are included. Simply remove eartips from stethoscope and attach the size more suitable.

2. To adjust the angle of the eartubes, hold the tubing in one hand and rotate each eartube to the correct angle as shown in fig. 2.

3. To reduce spring tension, grasp each eartube at its bend and gently pull outwards as shown in fig. 3.

4. To increase spring tension, squeeze the eartubes as shown in fig. 4.

5. When the eartips are in your ears, the eartubes should be pointed forward as shown in fig. 5. Improperly wearing the stethoscope headset can result in poor acoustical seal, and in some cases, complete sound blockage.

6. Only one side of the cardiology stethoscope works at one time. You need to open, or close the bell or membrane by rotating the chest piece. If the membrane is open, the bell will be closed, preventing sound from coming through the bell, and vice versa.

Cleaning

In order to avoid dust accumulation and dirt, always store the stethoscope in its packaging. The outside of the instrument can be cleaned with a damp, soft and lint-free fabric. For disinfection, the stethoscope can be cleaned with a bleach solution mixed with alcohol.

Do not use thermal sterilization or soaking.

Warranty

5 Year Warranty

If this product proves to be defective in material or workmanship within five years of purchase, please return it to the address below. The guarantee does not apply if the defect or malfunction is a result of user abuse, misuse, alteration, modification or damages in transit. It will be repaired or replaced without charge upon receipt of the unit prepaid with $5.00 to cover handling, packaging and return postage. Please include a description of your problem, your full name, address, daytime phone number or email address.

Do not use any scouring cleaning agents!
