# EXTRA WIDE TALKING SCALE

In order to get the utmost accuracy and lifespan of our product, please read the following instruction before use.
Weight memory records (from 01 to 30)

User Name (No. 1 or 2)   Weight Display

Measurement Unit

Function and characteristics
• Voice function (English or French)
• Memory for 2 users. (No. 1 or 2)
• Personal data memory: 30 records for each user
• Auto ON

Definitions of the keys
MODE:
• Turns the scale ON
• Displays user's most recent measured weight
• "TIME" record goes back to "00" when viewing recorded weights
• ▲ Select user's number (No. 1 or 2)
• Checks the user's memory records by pressing once, the historical measurement record on the screen will go forward once (from 01 to 30).
  NOTE: 01 is the most recent measured weight
• ▼/U – Changes measuring unit: kg-lb. You can only operate this key when you turn on the scale and the screen displays "0.0".
• By pressing ▼/U once, the historical measurement record on the screen will go backward once.

NOTES
1. When the display is flashing, no function can be operated.
2. Make sure to place the scale on flat ground.
3. Press "MODE" key or step onto the scale to turn it on.

Weighing without memory function
Place the scale on flat ground and press "MODE" to turn on the scale. The scale then will display "0.0". Step on the scale and your weight will be displayed; and then read out loud twice. Stepping onto the platform steadily will also turn on the scale, and your weight will be displayed and then read out loud twice. The scale will turn off automatically after reading your weight out loud.

Weighing with memory function
Turn on the scale and it will display "0.0". Press the ▲ key and the user number will begin to flash. Press the ▲ key to select user (No.1 or 2). Wait 4 seconds, when scale shows "0.0" step onto the platform and your weight will be displayed and read out loud twice. This weighing data will be saved as the user's most recent weight. Each user can save up to 30 recordings.

Changing the language
Press and hold the "MODE" key for few seconds to turn on the scale. "L – 01" or "L – 02" will be displayed then you can press "MODE" key again to select the language :
"L – 01" for English
"L – 02" for French

Viewing of the historical measurement results
Turn on the scale and it will display "0.0", and then press the ▲ key to select user (No.1 or 2). When the scale shows "0.0", press the "MODE" key which will display the user's latest weight. The memory time will flash; press the ▲ key to view recorded weights from your 1st to your 30th recording. When you are viewing the recorded weights, the scale will not read them out loud.

Deleting memory results
Turn on the scale and it will display "0.0", then press the ▲ key to select user (No.1 or 2). When the scale displays "0.0" press the "MODE" key displaying the users latest weight, then press both "MODE" and "▼/U" for a few seconds. Then all records on that user will be deleted. If you want to delete the other user's records, re–start the scale and repeat the procedure above.

Battery installation
Slide off the battery cover on the back of the scale and connect one 9V battery (not included) onto the proper terminal heads. Slide the battery cover back onto the unit.

Troubleshooting
1."Lo" : weak battery, replace with a new battery (not included).
2."OL" : scale overload.
3."Err": scale incorrect operation.
