

Mechanical Transplanter Company

Model 92 - Mulch Layer

Shown with optional Drip Tape Applicator

MODEL 92 STANDARD FEATURES

- * Leveling pan for very smooth and firm beds
- * Double rollers for easy loading of plastic
- * Roller assembly allows for self starting of plastic, just set the machine down and go!
- * Extra roll holder feeds new roll into machine with just a pull of a lever
- * Bed shaping shoes open furrow for the stretch wheels to hold the plastic while rear cover discs apply soil to edge of plastic
- * Large soil shields keep the plastic surface clean and allows for faster application speeds
- * For use with 36-48" plastic mulch
- * Optional Drip Tape Applicator

Model 92B - Bed Shaper / Mulch Layer

Shapes a 4" bed and lays plastic in one operation

The Model 92 converts to a **Model 92B** Bed Shaper through implementation of deeper wings under the front leveling pan. Rear dirt shield and scrapers level the edges next to the plastic.

- * *Use of 3' plastic makes a bed with an 18" top and 4" high*
- * *Use of 4' plastic makes a bed with a 24" top and 4" high*
- * *The Model 94 Bed Shaper is recommended for wider and taller beds.*
- * *The cutting bar cannot be used with the bed shaper option*
- * *The self-starting feature works on both Model 92 & 92B*
- * *Be advised to rototill the soil before forming beds or laying plastic*
 - * *Optional Drip Attachments available*
