

Mechanical Transplanter Company

Nursery Planters

1980 - Mid sized nursery unit can plant seedlings as close as 7." The plant holders run at ground speed for ideal plant placement with no J-rooting. Includes 4"x12" shoe, 28" coulter, and 14" covering discs.

2000 - Large nursery unit, similar to 1980, but 1/3 larger. Has offset pockets for taller plants and gauge wheel drive for accurate plant spacings. Includes: 6" x 12" shoe, 16" covering discs and large plant boxes with foot operated conveyors to bring plants forward.

Model 1980-3 Three row 1980 with special framework for row spacings as close as 21"

Model 1980-2 Two row 1980 nursery unit planting seedling 7" apart in row

Model 2000-2 Two row 2000 planting large seedlings. Note straight evenly spaced plants and large capacity plant boxes

580 - has large pockets and a 3" wide shoe, designed to handle broad rooted plants such as daylilies and nursery stock. The 580 can be used as a single row unit or in a mulit-row system on toolbar with rows as close as 22". The 580 can also be used in our bed planter frame with rows as close as 11" apart.

FSD - 3 Row Fertilizer Side Dresser with optional cultivator. The FSD is custom made for 1-4 rows for nurseries, orchards, vineyards, vegetables or flowers. It includes 300# hoppers and gauge wheel drive system for setting rates.

550LU - Mid sized bed planter unit designed to plant taller seedlings with up to an 18" top. It has a 1-1/2 x 10" shoe and plant spacing from 3-1/2."

550L-5 Standard bed planter frame will hold up to five 550LU units for 11" rows or 6-525 units for 9" row spacings.

525-9 ROW - The standard 525 bed planter units are available from 1-12 rows depending on framework and spacing desired. Shown is a 9 row planting 7" rows and 2-1/2" in row spacing.

1000 - A very versatile unit for planting anything from vegetables to smaller nursery stock, flowers or cell-type plants. Includes patented float wheel direct drive system shown with optional double disc poly shoe, rubber packers and cushion seats.

Christmas Tree / Nursery Units

A complete line of tree planters all with patented plant holders for faster planting and accurate spacings

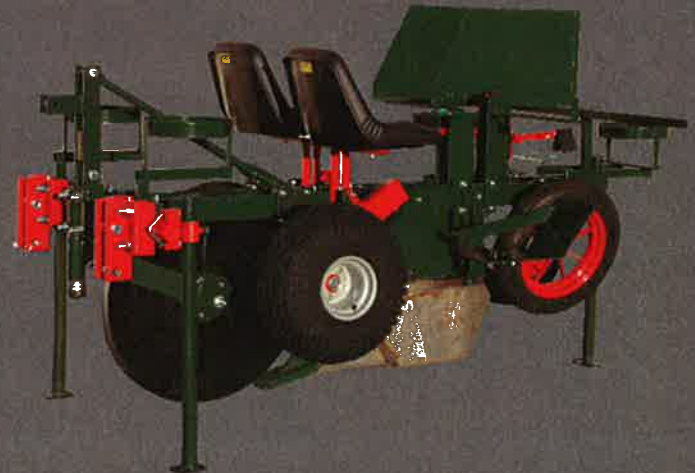

CT- 4 NEW light duty unit for smaller growers. Includes: 20" coultter, 10" deep shoe, V-3 plant holders, quick change spacings, weight bracket, cushion seat and 3-Point hitch.

CT- 5 Similar to the CT-4 except includes scalper shown with optional second seat.

CT- 8 Heavy duty mid-size tree planter for tough conditions. Includes: 28" coultter, 12" deep shoe, gauge wheels, three weight brackets, extra tall plant boxes, V-3 pockets, protected foot rests and cushion seat.

CT-12 The largest MTC tree planter available. Features a 32" coultter, 14" deep shoe, large offset pockets for tall plants up to 30" tall. Direct drive gauge wheels for accurate spacings, subsoiler tooth to break up tough soil and cushion seats. This planter is the ultimate for tree planting!

Model 5000 High Speed Cell Transplanters

The Model 5000 is a fast, compact unit for planting plant grown in trays. One man operation, easy to adjust depth and shoe width to fit different size cells make it the ultimate high speed transplanter.

The perennial growers' field shown in the above photo uses a variety of different models. These include the Model 1000, Model 580, and Model 5000.

The above 9-Row 5000 bed planter has more than doubled planting speeds for this Oregon Nursery. Note the uniform depth of the plants and smooth packing the Model 5000 gives.

Separate brochures are available on all models shown. Please call or check out our website.
