

LiquiLevel FD

FLOAT & DIAL TANK LEVEL INDICATOR

Mechanical clock gauge for measuring tank contents by a float that is installed inside the tank and goes up and down with the level. Whilst also popular for oil and diesel storage tanks, it is most commonly used as a domestic heating oil tank gauge. LiquiLevel FD is also suitable for Waste oil, urea solution (AdBlue), vegetable oil, rainwater and other liquids. Supplied as standard with 1 1/2" BSP Male for easy and quick installation to the top of the storage tank.

ADVANTAGES & FEATURES

- High measuring accuracy
- Fill height determination according to float principle
- Subsequent marking for the maximum filling height, which corresponds to the maximum permissible filling volume
- Odour-proof design.

TECHNICAL SPECIFICATION

- Measurement accuracy: $\pm 3\%$
- Close to test pressure: up to 100 mbar
- Float Dimensions: 38 mm \varnothing x 92mm long
- Measuring range 0 to 250 cm
- Material: Housing: ABS
- Float: PE-HD (white)
- Connection: 1.5" male screw thread
- Dial diameter: 73 mm
- Weight: 0.175 kg
- Adjustable dial face to suit tanks up to 2.5 metres high
- Installation and user manual included.
