DL-HD70LS-H2 Owners Manual

Important Safety Instructions

- » Please completely read and verify you understand all instructions in this manual before operating this equipment.
- » Keep these instructions in a safe, accessible place for future reference.
- » Heed all warnings.
- » Follow all instructions.
- » Do not use this apparatus near water.
- » Clean only with a dry cloth.
- » Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- » Use only accessories specified or recommended by Intelix.
- » Explanation of graphical symbols:

- ◊ Lightning bolt/flash symbol: the lightning bolt/flash and arrowhead within an equilateral triangle symbol is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product enclosure which may be of sufficient magnitude to constitute a risk of shock to a person or persons.
- ◊ Exclamation point symbol: the exclamation point within an equilateral triangle symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

- » **WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPARATUS TO RAIN OR MOISTURE AND OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, SHOULD NOT BE PLACED ON THIS APPARATUS.**
- » Use the mains plug to disconnect the apparatus from the mains.
- » **THE MAINS PLUG OF THE POWER CORD MUST REMAIN READILY ACCESSIBLE.**
- » Do not defeat the safety purpose polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of your obsolete outlet. **Caution! To reduce the risk of electrical shock, grounding of the center pin of this plug must be maintained.**
- » Protect the power cord from being walked on or pinched particularly at the plugs, convenience receptacles, and the point where they exit from the apparatus.
- » Do not block the air ventilation openings. Only mount the equipment per Intelix’s instructions.
- » Use only with the cart, stand, table, or rack specified by Intelix or sold with the equipment. When/if a cart is used, use caution when moving the cart/equipment combination to avoid injury from tip-over.
- » Unplug this apparatus during lightning storms or when unused for long periods of time.
- » **Caution! Shock Hazard.** Do not open the unit.
- » Refer to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Product Overview

The DigitaLinx DL-HD70LS-H2 extender set transmits HDMI 2.0 audio and video, up to 4K@60Hz 4:4:4/8 bit color with HDR support, and bidirectional IR up to 70 meters away using a single solid core, shielded Category 6 twisted pair cable. The extender set support HDCP versions up to 2.2. With its slim design the DL-HD70LS-H2 is easy to install in the tightest of spaces. Built in re-clocking circuitry ensures that extender set is backwards compatible with older HDMI version chip sets.

The extender system uses 2:1 data compression when the signal surpasses 10Gbps, anything under 10Gbps will never be compressed. System supports flexible power so entire extender circuit can be powered by either the TX or RX side. Supports static HDR (HDR10) only when data rate exceeds 18Gbps, supports dynamic HDR (HDR10+ / Dolby Vision) when data rate is 10Gbps or less.

Built-in surge protection helps ensure hassle-free and robust installations. The 18 volt power supply is secured with a screw-on connector to prevent the power from being accidentally disconnected.

The DL-HD70LS-H2 is sold only as a set. The individual transmitter and receiver are not compatible with other HDBaseT devices due to proprietary PoE circuitry.

Package Contents

- DL-HD70LS-H2 Extender Set
- Quick Install Guide
- (1) IR Emitter
- (1) IR Broadband Receiver (30-50KHz)
- (1) DC18V 1A power supply with US, UK, EU and AU power adapter plugs
- (4) Mounting clips with mounting screws
- (1) IR-AC IR coupler cable

Front and Rear Panels

Transmitter / Receiver View

1. **DC 18V** - Locking power supply port (receiver)
2. **HDBT IN** - HDBaseT input; RJ45 connection
3. **IR IN** - 3.5mm IR input port for connection to IR receiver or 3rd party IR system
4. **IR OUT** - 3.5mm IR output port for connection to IR emitter
5. **HDMI OUT** - HDMI output port for connection to display
6. **DC 18V** - Locking power supply port (transmitter)
7. **HDBT OUT** - HDBaseT output; RJ45 connection
8. **IR IN** - 3.5mm IR input port for connection to IR receiver or 3rd party IR system
9. **IR OUT** - 3.5mm IR output port for connection to IR emitter
10. **HDMI IN** - HDMI input port for connection to HDMI video source

Front Panel LED States for Transmitter / Receiver

POWER (RED)- Solid when device is powered ON

STATUS (BLUE)- When blinking the device is working properly

HDCP (BLUE) - Solid when HDMI signal is encrypted; blinking when non-HDCP protected content is transmitted; OFF when no content is being transmitted

LINK (GREEN)- Solid when successful link between transmitter and receiver is established; off or blinking indicates a physical link error

Installation Instructions

Quick Start

1. Connect video source to transmitter HDMI IN
2. Connect display technology to receiver HDMI OUT
3. Connect transmitter and receiver together with a shielded Category 6 cable
4. Connect IR control (optional)
5. Apply power to either transmitter OR receiver to power entire circuit

Connecting a Video Source

HDMI Input (Transmitter)

Connect an HDMI source device to the HDMI input on the DL-HD70LS-H2 transmitter labeled *HDMI IN* using an HDMI cable that is less than or equal to 5 meters in total length. For HDMI source devices that are further away, an active HDMI cable may be required to complete the connection.

Connecting a Display

HDMI Output (Receiver)

Connect the display to the HDMI output on the DL-HD70LS-H2 receiver labeled *HDMI OUT* using an HDMI cable that is less than or equal to 5 meters in length. It is recommended to keep the DL-HD70LS-H2 receiver near the display input as it is not recommended that an active HDMI cable be used on the HDMI output on the DL-HD70LS-H2 receiver.

HDBaseT Connection

Connect one end of a Category cable to the DL-HD70LS-H2 transmitter labeled *HDBT OUT*, then connect the other end of the Category cable to the DL-HD70LS-H2 receiver labeled *HDBT IN*

Twisted Pair Wiring

Use TIA/EIA-568B wiring for Category 6 connection between send and receive units.

To ensure proper performance of the DL-HD70LS-H2, it is recommended that you use solid core, shielded Category 6 F/UTP cabling at a minimum. Category 5e F/UTP may perform well up to a certain length but may not support power over HDBaseT reliably longer distances.

When using shielded category cabling **ALWAYS...**

-use shielded connectors
-properly ground the category cable

For optimized performance use the following Liberty Wire and Cable branded cabling;

Category 6 plenum; 24-4P-P-L6SH
 Category 6A plenum; 24-4P-P-L6ASH

Category 6 NON-plenum; 24-4P-L6SH
 Category 6A NON-plenum; 24-4P-L6ASH

Connecting IR Control

The DL-HD70LS-H2 is capable of transmitting bi-directional IR signals through the HDBaseT circuit. The DL-HD70LS-H2 comes with 1 IR receiver (eye) and 1 IR emitter (flasher) so you can control devices from either end of the extender circuit.

Passing IR Signals:

The DL-HD70LS-H2 is capable of passing IR signals between 33 and 55 KHz. To prevent damage to any of the electronics, the extenders should be powered off while inserting or removing any IR components. Inserting an IR transmitter into the IR IN port may damage the IR circuit for that extender.

Source Device Control using IR

Attach the IR emitter to the IR receiver of the source device, insert the TS 3.5 mm plug of the emitter to the IR OUT port of the DL-HD70LS-H2 transmitter. Insert the TS 3.5 mm plug of the IR receiver (eye) to the IR IN port of the DL-HD70LS-H2 receiver. Point the source device IR remote at the display location where the IR receiver is located, IR signals will now travel through HDBaseT to the DL-HD70LS-H2 transmitter side where the IR emitter is attached to the source device.

Remote Display using IR

Attach the IR emitter to the IR receiver of the display device, insert the TS 3.5 mm plug of the emitter to the IR OUT port of the DL-HD70LS-H2 receiver. Insert the TS 3.5 mm plug of the IR receiver (eye) to the IR IN port of the DL-HD70LS-H2 transmitter. Point the source device IR remote at the source device location where the IR receiver is located, IR signals will now travel through HDBaseT to the DL-HD70LS-H2 receiver side where the IR emitter is attached to the display device.

Source / Display Control from Control System

To pass 3rd party IR system signals through the DL-HD70LS-H2, such as a control system, connect the TS connector of the IR-AC coupling cable (provided) to the IR output port of the control system and connect the TRS connector of the IR-AC cable to the IR IN to either transmitter or receiver of the DL-HD70LS-H2.

Apply Power

Connect the included power supply to the transmitter or receiver and lock the power supply to the power connector by twisting the locking collar clockwise. It is not required that both the transmitter and receiver be powered simultaneously.

Application Diagrams

HDMI Extension / Bi-Directional IR Control

Technical Specifications

Supported Audio and Video	
Video Compliance	HDMI 2.0+, HDCP2.2, and CEC (Consumer Electronics Control)
Input / Output Resolution Support	<i>SMPTE</i> : Up to 4096x2160@60Hz (4:4:4 chroma sub-sampling / 8 bit deep color) <i>VESA</i> : Up to 1920x1200
Maximum Pixel Clock	600MHz
Embedded Audio	Up to PCM 8 channel, Dolby Digital, DTS, TrueHD, DTS-HD Master Audio and Dolby Atmos
IR Carrier Frequency Range	30-50kHz at 5 volts
HDBaseT Signal Characteristics	
Maximum Distance	<i>1080p</i> : 70 meters / 231 feet <i>4K@60Hz 4:4:4</i> : 40 meters / 132 feet
Cable Requirements	Solid core shielded Category 6 F/UTP or greater with TIA/EIA-568B crimp pattern
Bandwidth	18 Gbps (compressed) / 10.2 Gbps (uncompressed)
Chassis and Environmental	
Dimensions (H x W x D)	15.2 mm x 136 mm x 74 mm (.60 in x 5.37 in x 2.92 in)
Product Weight	.24kg / 0.53lbs for each transmitter / receiver
Operating Temperature	0° to +45° C (+32° to +113° F)
Storage Temperature	-20°C to 70°C (-4°F to 158°F)
Operating Humidity (Environment)	10% to 90%, Non-condensing
ESD Protection	Human-body Model: ±8kV (Air-gap discharge) ±4kV (Contact discharge)
Surge Protection	Voltage: ±1 kV
Power	
Maximum Power Consumption	12.8 watts
Power Supply Input Voltage	100-240V AC at 50-60 Hz
Power Supply Output Voltage	18V DC
Regulatory	CE, FCC, RoHS
Other	
Standard Warranty	5 Years
Included Items	Quick Guide, Power Supply, Adapter Plugs (US, EU, AU, UK), (4) Mounting Brackets, (4) Mounting Screws, (1) IR-AC IR adapter cable (1) IR Emitter and (1) IR Receiver

Distances and picture quality may be affected by cable grade, cable quality, source and destination equipment, RF and electrical interference, and cable patches.
