- Simple user interface
- 1024-bit encryption, dynamic room codes
- 4K-UHD output for all VIA2 devices
- Secure guest connections with dual network support

Forbes

"VIA is one of 5 new technologies you should integrate into your business."

-Ilya Pozin

Kramer Platforms™

OPEN **AV** PLATFORM

More than just Pro AV, Kramer Platforms™ deliver on the promise and potential of smart AV by providing more on a single device.

With adaptive tools that are as flexible and feature rich as your evolving workflow demands, Kramer Platforms™ grow with you. Leading today, ready for tomorrow.

Collaborate Wirelessly Anywhere

VIA makes presenting, collaborating and sharing content easier and more efficient for any size meeting room, conference room, huddle space, classroom, or training room.

> "VIA has become the connectivity and collaboration foundation for many of our classrooms. Its combination of powerful tools, content security and ease of use for our faculty made it an easy decision for me and my team to deploy."
>
> **Franklin Jackson,** Jr. Classroom Technology & AV Services Manager University of Denver

> "Solves the biggest problems associated with BYOD."
>
> **Tim McCarthy,** UCC Account Manager, Spinitar

Conference room

- Video conferencing / unified communication
- Connect up to 254 different devices
- Full suite of collaborative features

Huddle space

- Budget conscious connectivity and collaboration options
- Connect from any BYOD including iOS, Android & Chromebook
- Vivid HD video playback

Training room

- Present on main display with group control panel
- Advanced content security

VIA Campus²

Wireless Presentation & Collaboration for Education, Training & Meeting Environments

VIA Campus2 delivers next generation dual 4K outputs along with advanced collaboration and engagement tools that enhance interactive learning in education and corporate training environments. View any participant laptop or mobile device on the main display, edit documents together in real time, share any size file, turn the main display into a digital whiteboard, and more.
VIA Campus2 can sit on an internal network like other standard devices and can also be used as a secure wireless access point for guests.
Six user screens can be shown on one main display or up to 12 screens on two displays. Remote students can easily join the class and collaborate in real time with embedded 3rd-party video conferencing and office apps.

VIA Campus²PLUS

Simultaneous Wired & Wireless Presentation & Collaboration

VIA Campus²PLUS delivers all the outstanding features found in the VIA Campus² with the addition of a 4K30 HDMI™ input for simple and seamless wired connectivity. In the age of BYOD collaboration, the option for participants to instantly plug-in and begin is invaluable, VIA Campus²PLUS makes simultaneous wired and wireless presentation & collaboration effortless.
VIA Campus²PLUS can sit on an internal network like other standard devices and can also be used as a secure wireless access point for guests.

VIA Connect PRO

Wireless Presentation & Collaboration for Huddle Spaces

VIA Connect PRO offers a cost-effective solution for providing wireless presentation and collaboration in a variety of huddle spaces. With any laptop or mobile device, meeting participants can share any size file and stream full uninterrupted HD video (up to 1080p60), images and documents.
VIA Connect PRO's whiteboard feature gives you the tools to annotate, sketch out ideas or edit shared documents on the main display from your device.
With VIA Connect PRO you can show up to four user screens on a single main display with mirroring for iOS (MacBook, iPad and iPhone), Lollipop OS 5.0 or newer (Android), Miracast (with the VIAcast dongle) and Chromebook.

VIA Connect PLUS

Simultaneous Wired & Wireless Presentation & Collaboration for Huddle Spaces

More than just a simultaneous wired and wireless presentation and collaboration device, VIA Connect PLUS is a member of the Kramer Platforms™ family offering the flexibility and functionality of a smart AV tool that grows to meet your needs.
Loaded with top tier functionality like the ability to stream high quality video directly from your device, easy drag and drop file sharing of any size, powerful digital signage and integrated video conferencing capabilities. It's no wonder VIA Connect PLUS has earned a well-deserved reputation for raising the benchmark of the modern meeting experience.
VIA Connect PLUS also features a license activated software driven room control processor, HDMI™ input, the ability to show up to four user screens on a single main display and VIA Versa, which allows users to wirelessly connect to the professional grade camera and AV in their meeting spaces easily and instantly.
The platform provides mirroring for iOS (MacBook, iPad and iPhone) Android Miracast (Lollipop OS 5.0 or newer) and Chromebook.

VIA GO²

4K Wireless Connectivity & Advanced Presentation for Any Meeting Space

VIA GO² offers quick wireless connectivity and advanced presentation technology from any Windows 10 PC, MacBook, Android, iOS, or Chromebook device. This compact, yet powerful solution offers a cost-effective way to install cutting-edge wireless presentation in multiple small meeting rooms and huddle spaces.

VIA GO² utilizes dual antennas and MIMO technology, and sits on an internal network like other standard devices (for full management and control).

VIA GO² can be used as a wireless access point for guests, and features mirroring for iOS (MacBook, iPad and iPhone) Android Miracast (Lollipop OS 5.0 or newer) and Chromebook.

VIA Pad

Step-In Touch Pad

Now it's easier than ever to share what's on your PC or laptop with everyone in the meeting.
Using capacitive and proximity technologies, VIA Pad lets you instantly show your screen on the main display. Just plug it in and present. No driver download.
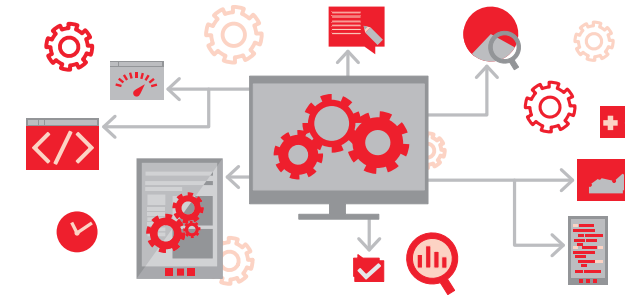

VIA Site Management

VSM makes it simple to control, configure and update multiple VIA devices from a single user-friendly IT management interface. With VIA Site Management, you can configure, manage and monitor devices, view usage and analytic data, and perform VIA firmware updates.

VIA Site Management is also available as an on-cloud solution. Get all the features found in the on-site version plus the flexibility of managing and monitoring your VIA devices remotely and securely.

VIAware

SOFTWARE-ONLY WIRELESS COLLABORATION

VIAware

Wireless Presentation & Collaboration for Education, Training or Any Meeting Environment – As a Software-Only Solution

All the advanced wireless presentation and collaboration tools offered by VIA Campus² can now be used on your own PC. VIAware can be installed on any computer running Windows 10, providing IT managers the versatility they need. VIAware works seamlessly with your existing VIA clients and offers full support for all VIA Quick Connect features, such as QR Code, NFC Tag and VIA Pad.
VIAware is available as a one-time license with optional annual upgrade subscriptions or as a recurring monthly subscription.
