with the world's best sound

# U Speaker MINI Manual

1. Speaker
2. Power on indicator
3. Charging indicator

4. Microphone
5. Power button
6. Micro USB port

## U speaker instructions:

- Play - Turn on the speaker by pressing the power button for a few seconds until you hear a sound indicator and the blue lights come on. Turn on the device you wish to pair with the U speaker and activate the Bluetooth function. Search for Bluetooth pairing name "Uspeaker" and click to pair. The speaker will pair automatically.

- Camera remote control - To take a photo, open your camera app and click the power button on your speaker once to take a picture. The selfie remote control will work with most social media or camera apps
- Charging - When the battery needs to be charged, you will hear a sound indicator that will let you know to plug it in. To charge the device, simply use the included micro USB cable and wait until the red light turns off. This will indicate that the device is fully charged.
- Fix a disabled key board - If you experience that your keyboard has been disabled on your device while connected to the U speaker, double click the power button on your speaker to re-enable your keyboard.
- Magnetic base - The Mini speaker has a magnetic base for easy placement. You can also use the included metal plate to attach to a non-magnetic surface.
- Pair two speakers for stereo surround sound - Prior to pairing, go to your bluetooth settings and select "forget device" on any Uspeaker that shows in range. Next, turn both speakers on and double click on the back button of one of the two Mini speakers. You will hear a sound indicating that the speakers are paired. The one you double clicked on will be your main speaker and will have a blinking light underneath. Go to your Bluetooth settings to find the speaker under the name "Uspeaker" and connect it. You should only have one Uspeaker connected to your device, the second speaker is paired to the first and it will pick up the signal. Now you can play your music and enjoy your stereo surround sound. You can take a selfie picture with your main speaker.
