WORLD OF BOSKA - PRO

Cheese Tools for Pros

WELCOME TO THE WORLD OF BOSKA PRO

Since 1896

At BOSKA we make Food Tools for Life and we believe quality is sustainability. Our goal is to design products that last a lifetime. It all began near Gouda, in Holland, where blacksmith Willem Bos made his first cheese tools for the local farmers. From that day on it's our family tradition to create fun & smart Tools for the Cheese Professionals, mongers and retailers. So whether you're cutting, slicing, grating, packing or presenting, we love to help you sell more cheese, have less waste & make mouthwatering presentations. Let's bring the cheese party to the table. Enjoy!

Fourth generation owner of BOSKA,

Martijn Bos

Food Tools for Life

Quality = Sustainability

BOSKA Professional Food Tools are designed to be smart and tough tools that maintain their beauty and quality throughout their lifespan. We promise quality and make every effort to extend their lifetime by using high quality materials and offering spare parts where required. We also want to have a positive impact by making products affordable to as many people as possible.

We are a certified purveyor to the royal household

"By appointment to the court of the Netherlands" is an honorary title awarded by the king to small and medium-sized businesses that occupy a very important position in the region.

A real crowning achievement!

Certified

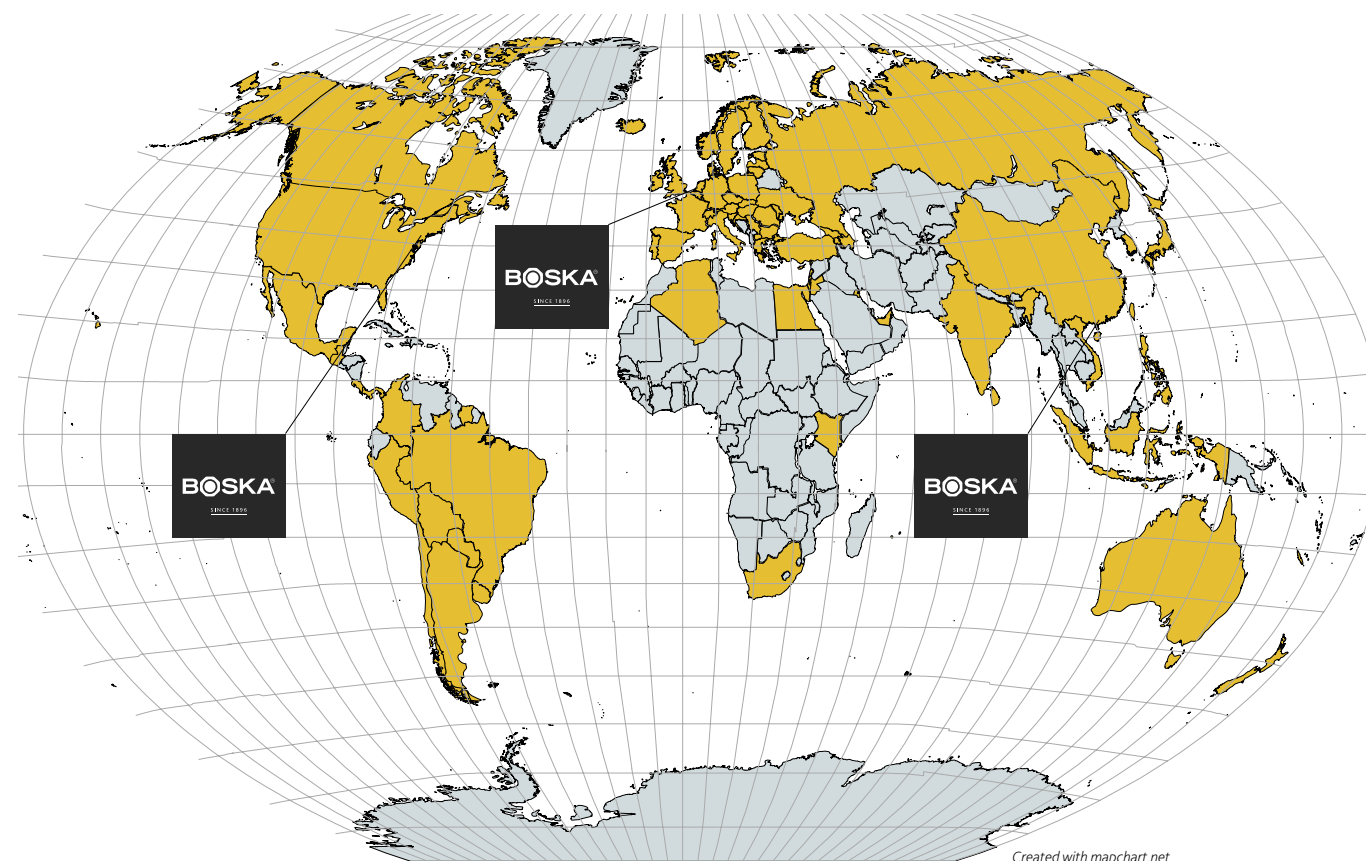

Corporation

Proud to be B Corp™

BOSKA has been a certified B Corp™ company since December 2022. This certification shows that BOSKA prioritizes people, the environment and society. Together we aim to have a positive impact on the world around us. B Corp™ is one of the most respected certifications with respect to sustainability.

Becoming a B Corp™ is just the beginning because, as a company, we work hard every day to help make positive, lasting changes. Each and every day, we endeavor to improve ourselves, which is why this philosophy is reflected in everything we do, from our employment policy to the initiatives we join that contribute to a sustainable society.

CHEESE BRANDS & PRODUCTION

SPONSORING & TRAINING

We support Justdiggit to compensate the CO2 emissions we can not offset yet.

Scan for our environmental and social impact program.

Our Brand Promise

Our mission is to make products that:

- Outperform** our competition when it comes to quality
- Save** time & money
- Ensure **no** cheese is **wasted**
- Make cheese cool and bring **more sales**

This is our direction for our industrial designers. This is our challenge for our production. This is our reason for getting out of bed in the morning.

COUNTER TOOLS & CUTTING WIRES

Choose from a variety of cheese cutters for quick and easy cutting of cheese - and other delicacies - into even slices, cubes, and pieces. The counter tools' stylish design makes them perfect for placing on the counter to create an even stronger impression of professionalism.

INDUSTRIAL MANUAL MACHINES

We are proud of our range of cheese cutting machines. We offer a suitable manual cheese cutting machine for each type of cheese - hard, soft, large or small. When you use one of our authentic cutting machines, you can work quickly, safely and incredibly efficiently.

CHEESE REPLICAS & STORE DEVELOPMENT

These stylish and practical presentation materials, such as replicas, allow you to create an attractive in-store presentation in no time. A good presentation increases visibility and inspiration, which leads to more sales. Also great as decoration in homes, museums, market stalls and elsewhere.

Dutch Design

To live up to the standards BOSKA requires of its products, all BOSKA products are designed in Holland. We believe Quality = Sustainability. Therefore, our design team combines functionality with timeless appearance, products that stand the test of time.

As we design all products ourselves, we also have the ability to adjust our products based on customer feedback. We welcome you to help us make our products even better!

Cheese Cutter *Cheese-O-Matic*®:

Warranty

All our products (consumables excluded) have a minimal warranty of 2 years. For our new Parmesan and HACCP knives we have extended the warranty up to 10 years.

Design awards

BOSKA designs have not gone unnoticed. BOSKA has received numerous international design awards like the iF and Red Dot Design Award.

Dutch Cheese Knives
Semi hard and hard cheese

Cutting waste is a thing of the past
Entrepreneurs prefer to work efficiently. You can cut along all of the edges easily and precisely with a simple rocking motion thanks to the curved blade and the comfortable handles. This allows you to get the most out of the cheese, and it results in minimal cutting waste with minimal effort.

Multi-functional cheese knife
You can easily take on cheeses with this cheese knife. However, you can also use it to conquer pizzas, sausages, cucumbers, tomatoes, melons or bell peppers. Are you a food service entrepreneur or a cheese professional? The Dutch Cheese Knives will take a stand next to every cheese professional!

Durable stainless steel blade
The blade is made of one piece of durable stainless steel. The ergonomic handles make this knife lie perfectly in your hands. If you wash it by hand, then your handiwork will remain perfect for many years to come.

*Dutch
Cheese
Knife*

You can cut through both soft cheeses and hard cheeses with tough rinds with ease with our professional Dutch Cheese Knives. User-friendliness, safety, and efficiency are guaranteed thanks to its unique shape and the handles on both sides. Your knife work will be quick and easy, guaranteed!

ACCESSORIES

The special knives from the Pro series are the result of our long experience in the field of cutting cheese. For each type, hardness and structure, there is a suitable knife. The high handle ensures that your hand remains free of the cutting board or table while cutting. Handy!

Cheese Testers

Test the inside of the cheese

The testers become more narrow towards the end of the tester. When you pull it out, you'll end up with precisely the piece of cheese that you want to taste. That's how you know you're selling cheeses of the right quality. Wash the cheese tester by hand, so that it will last you much longer.

Handy case

The cheese tester case (207100) is a handy accessory to add to your cheese tester. Use the cheese tester daily and keep it safe and secure by your side with this handy case!

Mr. Magneto

Professional HACCP Cheese Knives

Soft to semi-hard cheeses

Red is for red bacterium cheeses, white is for white mold cheeses and blue for blue-veined cheeses. BOSKA also supplies matching cutting boards with the same color coding for each type of cheese.

General purpose knife

The jack-of-all trades of the Boska knives. Thanks to the three holes in the blade, the cheeses do not stick. The serrated blade of this all-purpose knife is very sharp and even cuts through packaging.

Cheese knife for soft cheeses

This very narrow knife prevents the cheese from sticking. Because of the raised handle, your hand remains free from the cutting board. It is non-serrated and easy to clean.

Cheese knife for semi hard cheeses

This knife has a raised handle so your hand remains free of the cutting board when cutting. It is also suitable for larger cheeses, such as Raclette.

ACCESSORIES

HACCP regulation requires every type of cheese to be cut with its own knife. For this reason, we have developed three types of knives made from German high quality steel, each with its own colored handle.

Parmesan Knives

With our sturdy Parmesan knives, you're ready for anything. The blade is made of top quality steel and the extremely sturdy handles can take on any task.

Parmesan Knives

Semi-hard to very hard cheese

Cutting method
With our sturdy Parmesan knives, you're ready for anything. The blade is made of top quality steel and the extremely sturdy handles can take on any task. With the notched blade you easily cut the rind off of hard cheeses. You then use the Parmesan knives and finally the Cracking Knife to split the whole Parmesan.

Raclette Knife

With the Raclette knife you can cut pâté or scrape melting Raclette or other cheese. A cut-to-measure solution.

With the Raclette knife you can cut pâté or scrape melting Raclette or other cheese.

Can also be used as cutting board!

Safe cutting!

Improved version

This updated version of the Cheese-O-Matic® has undergone some major changes. For example, the Cheese-O-Matic® has a new WireSafe handle which ensures that the handle is comfortable to hold while cutting. The cheese stoppers provide firm support so the cheese stays in place. Cheese wheels weighing 8, 12 or 16 kg (18, 27 or 35 lbs) and straight blocks of cheese are also easy to cut on this Cheese-O-Matic®.

Stylish eye-catcher

The Cheese-O-Matic® is a real eye-catcher for the counter. The high-quality cast aluminum design gives this cheese cutter a stylish look. The professional cheese cutter is available in black and red. As part of the 1896 collection, it's a genuine collector's item.

Rock-solid cutting wire

Cutting with the Cheese-O-Matic® is very easy. Open the rind of the cheese with the BOSKA Scoring Knife. Place the cutting wire in the opening and - while holding the handle - pull the wire straight towards you. The wire slides through the cheese easily and straight, without having to apply much force. This way you can easily cut a nice straight piece of cheese.

Years of benefits

Also usable as a cutting board, the Cheese-O-Matic® takes up little space and is easy to use by anyone - regardless of experience - who works with cheese.

Check here the instruction video!

Cheese-O-Matic®

The Cheese-O-Matic® is the perfect cheese cutter for any cheese professional. A practical system for easily cutting an entire wheel of cheese. Whether you're cutting semi-hard or hard cheeses like Gouda cheese and Raclette cheese, with this system you have a great solution for every cheese. By cutting with a wire, you'll get a nice even cut and glide through the cheese much easier than with a knife. What's more, you have no cutting waste and get excellent cutting performance! Even more, a wire is not sharp and very safe!

Unika+

With the Cheese Cutter Unika+, you can cut the most beautiful slices of cheese in a flash. Thanks to the unique wedge-shaped cutting technique, you can cut round wheels of cheeses with less cutting waste. This makes the Unika+ extremely suitable for Raclette cheese and semi-hard cheeses, such as Gouda and Cheddar. Thanks to the chopping movement, the structure of the cheese will remain intact and the flavor will be top-notch.

Soft Cheese Cutter
RoqueForce®
Soft cheese

Faster cutting
The Roqueforce® is equipped with a spring system that makes it possible to cut even faster and straight. This slicer also comes with two cutting boards with color coding, so that you can use different cutting boards for different types of cheese and prevent cross-contamination. A specially designed gutter drains away the moisture released when cutting. The cutting boards are dishwasher safe, so this slicer can be cleaned quickly and easily.

Must-have for cheese specialists
This cheese slicer comes with two cutting wires that are strong enough to last for a very long time. This handy and compact cheese slicer is a must-have for any specialist who works with soft cheeses.

Stylish eye-catcher
The Cheese Dicer Roqueforce® is a real eye-catcher on any counter. The high-quality cast aluminum design gives the dicer a stylish look. The professional cheese cutter is available in black and red. Part of the 1896 collection, it's a genuine collector's item.

ACCESSORIES

Check here the instruction video!

Cheese Cutter **Unika+**
Semi-hard cheese / Hard cheese

Convenient heating element

The Unika+ has a high quality heating element with an on/off button with heat settings. Cutting slices of cheese will be simple and smooth. The heat keeps the cheese from sticking to the knife. In case of old cheese, it'll break less quickly while you're cutting.

User-friendly cutting machine

The Unika+ is easy to use. This makes the cheese cutter perfect for use in supermarkets, specialty cheese shops, and catering companies. With the flick of a wrist, you can set the thickness of the slices using the rotating knobs. You can vary the thickness from 1 to 15mm. This adjustment system ensures a nice and consistent cutting result. The Unika+ is available in 4 colors.

RoqueForce®

The Cheese Dicer Roqueforce® is one of the high-end models in our dicer range. This ergonomic dicer is designed to cut larger quantities of soft cheese like Roquefort and Le Délice de Bourgogne into wedges quickly and efficiently. It also cuts Roche Baron, Camembert, Brie, Gorgonzola, Port Salut and Stilton into equal wedges without cutting loss.

BlockBuster®

The Cheese Dicer BlockBuster® lets you cut perfect cheese cubes in record time. With only a few simple hand movements, you can turn a block of crust-free cheese into symmetrical cubes measuring 8 mm (0.32 in.), 16 mm (0.63 in.) and 24 mm (0.95 in.). Perfect for salad, pizza and other dishes.

BlockBuster® Cheese Dicer
Soft cheese / Semi-hard cheese

Cutting method

Thanks to this fantastic cheese dicer, you no longer need 15 minutes, but only a few minutes to cut an entire block of cheese. And that saves a tremendous amount of time. It also prevents unnecessary cutting loss and lets you cut perfect cubes in the size of your choice. This way, you know exactly how many cubes have been cut and how many customers have sampled a cheese cube. The cheese dicer can be used to cut both soft and semi-hard cheeses, feta and mountain cheese.

The perfect partner

The Cheese Dicer BlockBuster® is the perfect partner for food service companies, caterers, company cafeterias, sports club cafeterias, trade shows and hospitals. It's also a popular product for use in the cheese department of supermarkets or cheese specialty shops. The wires are easy to install and replace. The dicer can also be easily cleaned by simply unclicking all the parts. Perfect for parties and celebrations or if you suddenly feel inspired to serve cheese cubes!

Improved version

This updated version of the Cheese Dicer BlockBuster® has a number of significant improvements. The cutting wires, for instance, can be replaced separately and are easy to adjust for 8 mm (0.32 in.), 16 mm (0.63 in.) and 24 mm (0.95 in.) cubes. The Cheese Dicer BlockBuster® is easy to take apart for cleaning. Another nice feature is that the ABS cutting plateau 300504 is dishwasher safe.

Stylish eye-catcher

The Cheese Dicer BlockBuster® is a real eye-catcher on any counter. The high-quality cast aluminum design gives the dicer a stylish look. This professional cheese dicer is available in black and red. Part of the 1896 collection, it's a genuine collector's item.

Stylish eye-catcher

The Rock is a real eye-catcher on any counter. The high-quality aluminum gives this practical foil and wrap roll holder a stylish look & feel. The foil and wrap roll holder with retro look is available in black and red. As part of the 1896 collection, it's a genuine collector's item.

Sustainable and practical

Thanks to the rubber feet and weight of the foil and wrap roll holder, the Rock remains securely in place. In other words, there is no need to worry that the Rock will slide around during use. This way, you'll have both hands free to neatly wrap cheese and other food products. The solid cast-iron aluminum construction is of exceptional quality and the cap on top makes sure you do not pull out the wrap or foil roll during use. The patented roller system ensures that the foil always stays available and does not roll back. The Rock is the perfect solution for quickly and easily wrapping food products without waste.

The Rock

The Rock space-saving foil and wrap roll holder is the perfect tool for packing not only cheese, but also sandwiches, meats, vegetables and other foods in foil or wrap. You can easily place a 300mm/11.80 inch roll of foil or wrap in the holder and tear off the desired amount along the serrated blade without wrinkling. The brackets behind the serrated edge keep the foil or wrap in place, so the Rock is immediately ready for use again. The Rock is suitable for all types of foils and wraps, including aluminum foil, microwave wrap, plastic wrap and self-adhesive wrap. The Rock is also the perfect holder for rolls of paper.

Divide-O-Matic®

When cutting half a cheese wheel, you want convenience and an effortless cutting process. That's why you should choose this Divide-O-Matic®. Round cheeses can be cut into perfect, almost flat slices. Exactly the way you and your customers want it. This clever cheese cutter is made especially for semi-hard cheeses. Perfect for cutting half a cheese wheel into blocks and straight pieces. The well-designed lever lets you cut through cheeses with ease. Your co-workers will also be able to cut half a cheese wheel into nice pieces in no time.

Parmesan Cutter *Pro* Very hard cheese

Handle
Use the familiar BOSKA Scoring Knife to create an incision in the cheese. Do this across the whole cheese - not just the corners. Place the cutting wire into the notch. Tighten the wire by turning the handle in a clockwise direction. Don't turn it counterclockwise, or the cutting wire might bend. The handle enables you to cut through the cheese with ease. If you create a good incision and never turn the handle the wrong way, you could cut many Parmesan cheeses with one wire.

User-friendly and safe
The machine comes with safety glasses. The wire is 0.8 mm thick. The handle can be folded up, which makes transportation and storage even easier. You can also use the cheese cutter 'separately', as a cutting board. Stop struggling with those hard Parmesan cheeses. Choose user-friendliness and safety!

Check here the instruction video!

Check here the instruction video!

Cheese Cutter *Divide-O-Matic®* Semi hard and hard cheese

Cutting method
When cutting a whole cheese wheel, take out the core first. This is the tastiest part of the cheese. Then cut the desired pieces of cheese, preferably with a wide end. First of all, this will make it easy for the customer to scrape the piece of cheese and second, the piece of cheese will appear larger. Because of this customers will feel like they are buying more cheese.

Easy to use
Simply use the pins on the device to determine the cutting distance, raise the lever and cut right through the cheese with one smooth motion. Super safe, because the cheese can't shoot out from under your knife. An additional benefit is that you can cut the cheese while facing the customer. The tray is made of high-quality plastic. As a result, the board doesn't give off taste and odors. The convenient safety pin ensures safe use of the cutter, reducing accidents with the machine.

Stylish eye-catcher
The Divide-O-Matic® is a real eye-catcher for the counter. The high-quality cast aluminum design gives this cheese cutter a stylish look. The professional cheese cutter is available in black and red. As part of the 1896 collection, it's a genuine collector's item.

Separate knives can be ordered
You can order the knives for the Divide-O-Matic® separately: the Straight Knife For Cheese Cutter Divide-O-Matic® and the Core Knife For Cheese Cutter Divide-O-Matic®. Get the complete set and enjoy it for years to come.

ACCESSORIES

The Parmesan Cutter Pro was specially designed to safely cut up the hardest cheeses in the world. It's a beautiful and super strong machine. You can cut the ever-so-hard Parmesan cheeses into little pieces without a lot of force and with no cutting waste. Why complicate things unnecessarily?

CCP+

You can make neat and straight cuts through every cheese imaginable with ease with the Cheese Commander Pro+. Due to its compact size, this cheese cutter fits on every counter top. It's particularly well-suited to cutting smaller soft cheeses. After each cutting movement, the cutting wire returns to its original position, which makes cutting even easier.

Cheese Commander *Pro+*
Soft cheese / Semi-hard cheese

Safety first

Whether you're a brand new weekend shift worker or an experienced cheese specialist, when you use the Cheese Commander Pro+, you're not only making straight and neat cuts, but you're also working in an **extremely safe** way. That's because you can't accidentally cut yourself with a cutting wire. They are strong, not sharp. The ergonomic grip and the special system of guiding the wire make cutting very easy. The Cheese Commander Pro+ is also NSF certified!

Facing the customer

Cutting cheese to order while facing the customer enhances their in-store experience. By placing the Cheese Commander Pro+ on your counter, you can cut and wrap your cheese while maintaining eye contact and offering extra advice. The 2 types of **non-slip feet** keep the device firmly in its place.

Years of fun cheese cutting

Do you cut a lot of cheese, and did a cutting wire break? No problem! Each Cheese Cutter Cheese Commander Pro+ comes with **6 spare wires**. You can replace the cutting wire in just a few seconds. The Cheese Commander Pro+ is made of super strong plastic, which will last you for many years to come.

Cheese Cutter *Mozzarella*
Soft cheese

Innovative developments

We've managed to create cutting wires with a thickness of 0.3 mm due to innovative technology based on many years of experience in the field. On top of that, they're also as strong as iron. Cut through the Mozzarella slowly and smoothly, and you'll be left with the most beautiful slices. The cheese cutter is easy to use and easy to clean. The device is made of powerful stainless steel. The maximum dimensions of the cheese are 28 x 12 x 10 cm.

Individual cutting wires

In many cutting machines by other manufacturers, the cutting wires are made of one long strand. If it breaks, you have to replace the entire wire. In our Mozzarella cutter, there are short, individual wires. If one of them breaks, you can replace it individually. That means you won't need to repair the entire cutting element. That will save you time and money!

Vacuum Packer V35

Cheese, meat, nuts, and other dry products

The Vacuum Packer V35 is a compact and handy device that vacuum packs cheese, meat, nuts, and other dry products.

Due to the double-sealing bar, you can use harmonica bags with convenient folding seam pockets. The machine is easy to set up manually or automatically. This is so nice and fast, that it sometimes simply takes even our breath away.

These specially made Harmonica Bags are perfect for vacuum packing your cheeses. When you line up the seams of the bags and place it in the vacuum packer that way, your cheese will be sealed extremely tightly. That will keep the cheese fresh for even longer, and your customers will appreciate the show. The vacuum packer together with the Harmonica Bags are a match made in heaven!

Different sizes

The Harmonica Bag comes in four different sizes. Aside from the 140 mm bag, suitable for about 1 kilogram of cheese, there are also 120 mm (+/- 1 pound), 190 mm (+/- 2.5 kg), and 260 mm (+/- 8 kg) bags. The bags come in sets of 500 and 1000 pieces. That means you're good to go for super sealing your cheeses and keeping them nice and fresh!

INDUSTRIAL MANUAL MACHINES

We are proud of our range of cheese cutting machines. We offer a suitable manual cheese cutting machine for each type of cheese - hard, soft, large or small. When you use one of our authentic cutting machines, you can work quickly, safely and incredibly efficiently. All our Industrial Machines (except the Emmental Cutter Wood) are easily cleaned with a high-pressure cleaner!

Brie & Soft Cheese Cutter
Soft cheese

Using this Brie Divider is a major time-saver. Stack two wheels of Brie on top of each other, with a maximum height of 13 cm, and you'll still be gliding through the cheese ever so smoothly. The wires are already installed, so you don't have to guess at how large the wedges should be. When you cut with a knife, you do have to guess every time. When you use the Brie Divider, you are cutting very safely, because you can't cut yourself on a cutting wire. Aside from that, this wire cutter is really simple to clean. We have different products for different number of wedges.

Hotelblock Cutter

Soft cheese / Semi-hard cheese

For cutting rectangular pieces or blocks of rindless cheese, such as Cheddar, Blue Stilton, or butter, this is the perfect solution.

The Hotelblock cutter can be adapted to all your needs: you can very simply determine the cutting pattern by adding and removing wires and dividers.

Possibilities:

- Maximum 25 wires in the cutting frame
- Minimum distance between the wires is 10 mm / 0.39 inch
- Maximum size of the cheese: 510 x 410 x 120 mm / 20.1 x 16.1 x 4.7 inch

Can be combined with 510055 Mobile Undercarriage. Specially made for many of BOSKA's professional machines. Easy to move and secure.

Semi-hard cheese

With the Cheese Cuber Pro, you cut perfect cubes, bars or French fry-shaped cheese quickly and easily. It is the solution for those who process salad cheese or for party service. The Cheese Cuber Pro with pivot table increases the convenience even more by cutting a large number of cubes even faster. You've never finished your work quite so fast. The max size of the cheese cubes is 175x175x150 mm / 6.9 x 6.9 x 5.9 inch.

Freshpack Cutting Unit
Semi hard / hard cheeses

All the benefits of the Cheese-O-Matic and Divide-O-Matic are now united in one cutting unit. With this total solution for cutting whole cheeses, you save a lot of time. Cut the cheese in half with the Cheese-O-Matic, remove the heart with the Divide-O-Matic with heart knife and divide the cheese, with the aid of the Divide-O-Matic, into pieces of your choice using the straight knife.

Cheese Blocker Pro

You'll always end up with perfect, beautiful cubes or bars, because you're using a wire to cut. On top of that, when you use a wire, you encounter less resistance while cutting, which means that you don't have to exert a lot of force. The cutting wires are simple to attach and can be replaced individually. If a wire breaks, you'll be back up and running in no time. The wire cutter is easy to disassemble, which makes it easy to clean.

CHEESE REPLICAS & STORE DEVELOPMENT

These stylish and practical presentation materials, such as replicas, allow you create an attractive in-store presentation in no time. A good presentation increases visibility and inspiration, which leads to more sales. Also great as decoration in homes, museums, market stalls and elsewhere.

Coolstep

You can ensure an optimal distribution of temperatures thanks to the holes in the Coolstep. The holes provide an optimal air circulation. As a result, your products will stay at top quality for as long as possible.

Presenting system *Coolstep* For all types of cheese

A simple and cool presentation
You can present your products in a well-organized way with the Coolstep, thanks to the sleek and strong aluminum frame. You can easily build a well-organized counter arrangement with the associated elements. The flexible system is also quick to install and modify. It's that easy!

Available in different sizes
The Coolstep is available in different sizes and can be placed both horizontally and vertically in every cold counter. You can expand the system with a riser set, a T-shaped divider, and a fresh pack display. Time to wash up? Do so by hand with some (not too hot) dish water.

Coolstep Riser Set
The Coolstep Riser Set may be small, but it's a pretty big deal around here! You can raise the elements of the flexible presentation system diagonally or flat in 2 cm steps. By presenting in different layers or presenting at an angle, you can improve the visibility of your products. It will definitely increase your revenue!

Presenting system *Foodstep* For all types of cheese

Variety is the spice of life. This can also be done by experimenting with a new display case decor. The contemporary Foodstep, finished with a subtle, matte black marble motif, has high-quality platters for all your cheeses. The different components can be varied endlessly. Your display, buffet or deli case can therefore be furnished entirely as you wish. With raised sets, you can then place the various components at the desired height. Step right up!

The Foodstep Corner Presentation, 3 Steps, is perfect for presenting your worldly cheeses in the corners of your cheese counter. The cheeses will be visible from all angles due to the different levels and heights with this presentation. With the Foodstep, you can provide optimal air circulation and generate more revenue. The Foodstep takes on the temperature of its surroundings, which makes it perfect for presenting cheeses and cold cuts. You can also set the Foodsteps to your desired height with the included Height Sets. Step right up!

ACCESSORIES

Cheese Crates

Create the atmosphere of the Paris Rungis market halls where the cheeses are sold in natural, wooden crates. Our stackable crates are made of dried and oiled beech wood and are therefore suitable for use in cooling. They will not mold or change colours! You can achieve a great effect by stacking the crates vertically, creating a handy division. With our riser sets, you can set the crates at the desired height.

Replicas

You could almost take a bite, that's how real our cheese replicas are. With these true-to-life "look-alikes," an impressive and professional shop presentation is a piece of cake. It is the ideal way to exhibit more cheese with less inventory. The display case is full, while you need to cut less in advance. In this way, you sell much more fresh cheese. Cheese replicas are also designed to promote cheese brands. They are available in every model, every color, every brand. But, don't forget to ask for permission to the brand owner.

10 Sales Tips

Make More Money & Have Less Waste:

- 1 **SHOW** - Show a lot of dairy!
- 2 **INVENTORY** - Keep it fresh!
- 3 **TASTE** - Tasting is key.
- 4 **HELP** - Focus on the 5 types of cheese!
- 5 **COOL** - Time for the cheesemonger!
- 6 **FACE** - Always face your customer!
- 7 **INSPIRE** - Share knowledge & ideas.
- 8 **FRESH** - Cut fresh in the store!
- 9 **PRE-PACK** - Pre-pack high sellers.
- 10 **CROSS-MERCHANDISE** - Sell the right products.

Presentation

In the counter:

Use our foodsteps or coolsteps as a basis for a presentation that is lifted. Use crates and dummies, so you need less real cheese in your presentation, which limits waste and ensures you supply fresh cheese to your customer. Offer your customer some fresh cheese cubes or slices!

Behind the counter or in the shopping window

A nice wall of branded or unbranded cheese replicas, encouraging the customer to enter the store, trigger the customer to buy a specific branded, and radiate craftsmanship.

Dutch Cheese Knife

Scoring Knife

Cutting tools

Ensure that you prevent cross contamination by using our coloured HACCP cutting boards and knives. A scoring knife is a basic tool for every cheesemonger, and for the hard cheeses you need a Dutch cheese knife.

For different types of cheese we have developed the ultimate 1896 counter tools collection, which can all be used when facing the customer. Also think about cutting wires, we have them in different sizes.

Packing

To extend the lifetime of the cheese, use our vacuum machine + bags. Especially convenient during holiday season. We have also developed a foil dispenser that will not slide around when used.

V35 Vacuum Packer

A set of cheese replicas

Cheese Cutter *Unikat*
for cutting slices of Gouda or Raclette cheese

Soft Cheese Cutter *RogueForce*
for the monger that cuts and sells a lot of soft cheeses!

Cheese Cutter *Cheese-O-Matic*
wire cutter for semi-hard/hard cheese

Cheese Cutter *Divide-O-Matic*
with heart knife

Cheese Dicer *BlockBuster*
for the monger that cuts a lot of cubes

Foil Dispenser *Rock*
+ 3 rolls of foil

PROMOTE YOUR BRAND

WITH OUR FOOD TOOLS FOR LIFE

Do you want us to make a *unique* gift with your own print?

Do you have a special *campaign* for customers?
