what is homeopathy?

Homeopathy is a system of medicine that is over 200 years old. It is based on the premise that certain natural substances are able to stimulate the body's own healing mechanisms, allowing the body to heal itself. Homeopathy is the second most widely used form of medicine worldwide. Allopathic or traditional medicine that is most common in the U.S. is fourth worldwide.

Like treats like and less is more

Homeopathy is based on these foundations. The ingredients we use will be the same ingredient that could cause the symptom you are looking to relieve. The extreme dilution of these ingredients reminds the body to heal itself without causing the symptom. For example, we use Allium Cepa in our AllergEase formula to stop watery eyes. Allium Cepa is derived from the onion, that is like treats like. Vaccination, flu and allergy shots as we know them today were born from these homeopathic foundations.

Sprayology's homeopathic dilutions range from 1X to 200C. We use a variation of dilutions within this range to cause the body to react differently. Some doses stimulate change, others balance the body and some inhibit or stop the symptom. The unique ingredients and dilution pairings we use is what makes Sprayology's formulas so innovative and effective.

FDA-Regulated

Homeopathic medicines are prepared and marketed in accordance with FDA Compliance Policy Guide No. 7132.15. Manufacturers of homeopathic medicines are registered with the FDA and licensed by state regulatory agencies. Homeopathic products are required legally to tell you the benefits and indications of such products, unlike supplements which cannot. Most natural products and vitamins are not FDA-Regulated, but 23 of the 25 Sprayology formulas are FDA-Regulated.

what is sprayology®

Sprayology is a proven brand offering FDA-Regulated all-natural homeopathic and vitamin oral sprays. Our delivery system offers a more convenient, enjoyable and effective way to take vitamins and minerals with no stomach upset. This is a life-saver for people who cannot swallow pills.

Sprayology uses only the finest ingredients available and prepares them to exacting laboratory conditions.

- Safety approved for ages 2 and up
- No contraindications
- No negative side effects
- Effective

Spray it in your mouth!

It's that simple. Sprayology works faster and more completely because you spray it under your tongue, where it is rapidly absorbed into the bloodstream.

Our three FDA-Regulated collections are packaged in green, mauve and violet. Our vitamin collection is packaged in orange. Read on to learn more about each formulation specifically.

SPRAYOLOGY FACT

Harper's BAZAAR stated, "For those who need to jump-start slow-growing hair, Sprayology's potent Hair + Nail Tonic is a good choice."

"I heard about the wonderful results of Sprayology and decided to try it. I have always had a full head of thick hair and I noticed it was thinning and I was not thrilled. I ordered the Hair + Nail Tonic for myself and for my two sisters and daughter. I have been using it now for almost two months and can definitely see a difference. The thinning areas are filling in and overall my hair is much fuller and very shiny looking. I also checked with my sisters and daughter and they all said the same. Not only is this a great product but it is very affordable. I like the idea that there are no chemical side effects that you can get with other hair regrowth products. This is a great product."

Sprayology reinvents the vitamin as it invigorates a generation of time-deprived professionals. These pioneering nutritional supplements are sprayed into the mouth and under the tongue, where they are absorbed. Unlike the traditional capsule form, oral sprays bypass the digestive system, which can degrade the restorative properties of nutrients, so more nourishment makes it into the bloodstream.

Vitamins are vital nutrients that our bodies need for energy and to prevent disease. Our bodies cannot make vitamins, so we must take them as part of our diet through the foods we eat and through supplementation.

The key to a supplement's effectiveness is its ability to transport an appropriate amount of the active ingredient into the bloodstream in a timely manner. Spraying the vitamin means no pills to swallow and no upset stomach. Additionally, the spray is convenient and tastes great!

ENERGY FOR BODY AND BRAIN

The nutrients in this formula have been shown to be beneficial for:

- energy levels
- prevention of birth defects
- the nervous system
- a healthy heart

VITAMIN BENEFITS

Vitamin B-12

- Key player in our body's system of enzymes (substances that promote chemical reactions in the body)
- Maintains a healthy nervous system
- Works in unison with Folic Acid to build the genetic material of cells, specifically, the blood cells in bone marrow
- Provides nutritional reinforcement for people who have little or no animal protein, consume alcohol regularly or take antibiotics

Folic Acid

- Lowers the level of homocystine, an amino acid that damages the lining of blood vessels and increases plaque formation
- Production of red blood cells
- Essential for woman trying to become pregnant and during the first 3 months of pregnancy to help protect against neural tube defects, spina bifida, cleft palate or cleft lip
- Helps prevent heart disease later in life
- Extremely beneficial for all ages

"I am very happy with the Sprayology products. I have had seven operations and 70 percent of my intestines removed. I spent twenty months in the hospital and was told that I receive no nutritional value from food. Doctors told me that sublingual absorption (in the mouth, under the tongue) was the only way to receive nutrients. Since using Sprayology my blood tests all show improvement. I take both Daily Multi and B-12 + Folic Acid."

– Cynthia S.

Power of Observation on Selling

How a person physically feels shows on the outside. Health shows positively and negatively, it also can be shown on our face and in our actions. For example, a very stressed person may be short tempered and distracted or someone who is exhausted may have dark circles under their eyes and slumping shoulders. More obvious signs could be sneezing, holding stomach, acne or weight issues. Being observant of your customers will help you direct them to the products they need to feel better! When you see outward signs or signals, ask questions to help lead you to the best product recommendation for your customer.

frequently asked questions

Is it safe to combine several Sprayology products together?

YES. Our medical staff takes into consideration the very active modern lifestyle when developing Sprayology products and has designed them to work in conjunction with each other. Spraying different products at the same time will not decrease their effectiveness or harm you.

Can homeopathic remedies be taken along with pharmaceutical medications or other natural supplements?

YES. It is safe to take homeopathy while taking other drugs, herbs or supplements. There are no known drug-to-drug interactions or contraindications. Homeopathy will not interfere or interact with pharmaceutical drugs or natural remedies. Homeopathy is safe to add to your daily regimen.

Can I use Sprayology if I am pregnant or nursing?

Although Sprayology is homeopathic and contains no negative side effects, we recommend that you consult a health care professional before using Sprayology products if you are pregnant or nursing.

How long should I take a Sprayology product before seeing an improvement?

The response time varies for different people and for particular products. As an example, response can occur anytime within a few minutes, in the case of our DigestivEase, and up to several days for Woman Power. For most Sprayology products, customers report a noticeable response within a few days. In addition, factors including diet, lifestyle and medical history can affect response time.

Are Sprayology products safe for children?

YES. Our products are safe for children ages 2-12. While some Sprayology products are intended for an age appropriate group (i.e. PMS Support), all sprays are FDA-Regulated and safe for ages 2 and up. We recommend that a health care professional be consulted for children under two years of age or if you are pregnant or nursing.

Is the alcohol content of the formula safe?

YES. The alcohol content of the formulas are safe unless one is allergic to alcohol. Alcohol is used in our products because it makes the sprays more effective, allows for quicker absorption into the body and keeps the products fresh. All Sprayology homeopathic products contain 9% organic alcohol. The amount of alcohol in a dose is comparable to the amount of alcohol in a ripe banana.

Can homeopathy be taken with food, drink, peppermint, caffeine, etc?

We have found that the "15 Minute Rule" is a sufficient window between taking homeopathy and consuming food or drink. Simply take your remedies 15 minutes before or after eating, drinking or brushing your teeth.

After my condition has improved, should I continue taking the Sprayology product?

YES. We recommend that Sprayology products be taken for a few days after symptoms have subsided for short-term conditions such as a cold, and on a longer-term basis for longer-term conditions such as low sexual desire.

Is homeopathy affected by extreme temperatures?

Homeopathic remedies should not be exposed to temperatures greater than 121° C (249.8° F). We do not recommend refrigerating or freezing homeopathic remedies.
