

TECHNICAL PRODUCT INFORMATION

2.0 MIL GLOSSY CLEAR PERM (Laser Only)

Face

A clear film engineered for superior mechanical strength, dimensional stability and optical clarity. This film provides heat and chemical resistance. This film is gloss top-coated to ensure optimum ink adhesive for black and color laser, flexo, offset and rotary screen printing.

Caliper:	2.0 mil.
Elongation MD	178%
Elongation TD	154%

Adhesive

A cold temperature emulsion acrylic permanent which exhibits good initial tack to a variety of substrates. Adhesion to rigid plastics, film, glass and painted metals is good. Die-cuts cleanly. Designed for laser applications and is a good choice for roll-to-sheet applications.

Labeling temperature min	35°F
Service temperature range	- 10°F ... 200°F

Liner

3.4 mil. White Kraft

Brightness	81.5%
Opacity	88.5%
Substance wight	55 lbs./ream (25x38)
Tensile strength MD	35 lbf/in.
Tensile strength TD	15 lbf/in.

The above are typical technical values and are given in good faith based upon our most up to date knowledge and experience. As the products are used outside our control we cannot take responsibility for any damage which may be caused using this product.

Shelf life: From date of manufacture 1 year at 72°F and HR50%.
