

# Indoor Camera

## Pairing with your Constellation Connect Hub

1. Firmly connect the AC power adapter to the camera's Micro USB port.
2. Plug the other end into an AC outlet.
3. The LED will light up solid green for 10 seconds, then blink green for several seconds, and then turn solid red.
4. Press the top button on the camera once. The LED on the front of the camera will blink green.
5. Press the Select button (fig A.). The hub will enter into selection mode.
6. Continue to press and release the Select button until the Wi-Fi LED blinks.

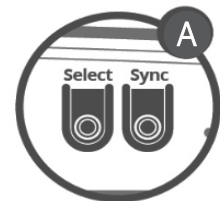

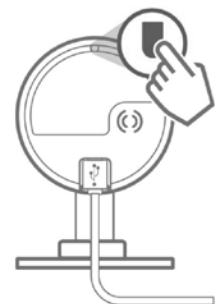

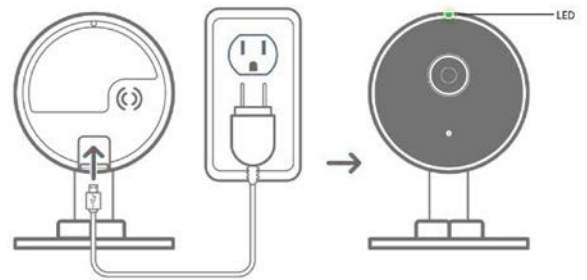

While in WPS mode, the Wi-Fi LED will blink rapidly.

7. Press the Sync button (fig. A) to confirm selection of the Wi-Fi LED and WPS mode.

Note: The hub stays in WPS mode for 2 minutes.

8. Within 2 minutes, an image will appear within the frame when the pairing is successful.

The LED on the front of the camera will turn solid green to indicate the camera was successfully paired.
