

Ammonium Phosphates

2 December 2019

Abstract

Ammonium phosphates are consumed almost exclusively as fertilizers, supplying both nitrogen and phosphorus to plants. Driven by population growth and strongly influenced by general economic drivers, global consumption of ammonium phosphate will continue to grow at an average annual growth rate of 2.3% during the period 2019–24. China is the largest producer, consumer, and exporter. Africa and the Middle East are among the regions with the largest increases in ammonium phosphate production, consumption, and exports in the past five years, and this trend will continue in the forecast period.

This report provides an excellent insight into the global market for ammonium phosphate. It has been compiled using primary industry research and brings together elements of other IHS Markit reports in the Chemical Economics Handbook (CEH) fertilizers-related reports.

The following pie chart shows world consumption of all solid ammonium phosphates in 2019:

For more detailed information, see the table of contents, shown below.

IHS Markit's Chemical Economics Handbook – Ammonium Phosphates is the comprehensive and trusted guide for anyone seeking information on this industry. This latest report details global and regional information, including

Key benefits

IHS Markit's Chemical Economics Handbook – *Ammonium Phosphates* has been compiled using primary interviews with key suppliers and organizations, and leading representatives from the industry in combination with IHS Markit's unparalleled access to upstream and downstream market intelligence and expert insights into industry dynamics, trade, and economics.

This report can help you

- Identify trends and driving forces influencing chemical markets
- Forecast and plan for future demand
- Understand the impact of competing materials
- Identify and evaluate potential customers and competitors
- Evaluate producers
- Track changing prices and trade movements
- Analyze the impact of feedstocks, regulations, and other factors on chemical profitability
