

Naphthalene

16 November 2020

Abstract

Global consumption of naphthalene is expected to grow at an average rate of 3% during 2020–25. Mainland China has been the largest market for naphthalene for decades. The demand for naphthalene will vary by region, based on the development of construction chemicals, construction spending, dye and dyestuff production, population, urbanization, and legislation.

The following chart shows world consumption of naphthalene:

In addition to mainland China, Other Asia is also a major consuming region for naphthalene, with production capacity investments for naphthalene and its derivatives. This report includes the analysis of the market around the effect of the COVID-19 pandemic and future developments as well as improvements to Other Asia details—adding new sections such as Indian Subcontinent, Other Northeast Asia, which covers North Korea, South Korea, and Taiwan, and Southeast Asia.

For more detailed information, see the table of contents, shown below.

IHS Markit's Chemical Economics Handbook – *Naphthalene* is the comprehensive and trusted guide for anyone seeking information on this industry. This latest report details global and regional information, including

Key benefits

IHS Markit's Chemical Economics Handbook – *Naphthalene* has been compiled using primary interviews with key suppliers and organizations, and leading representatives from the industry in combination with IHS Markit's unparalleled access to upstream and downstream market intelligence and expert insights into industry dynamics, trade, and economics.

This report can help you

- Identify trends and driving forces influencing chemical markets
- Forecast and plan for future demand
- Understand the impact of competing materials
- Identify and evaluate potential customers and competitors
- Evaluate producers
- Track changing prices and trade movements
- Analyze the impact of feedstocks, regulations, and other factors on chemical profitability
