

# Nylon Fibers

30 November 2020

## Abstract

Nylon fiber is a major application for nylon resin, which is used to produce textile, industrial filaments or other filaments, such as bulk continuous filament (BCF) used in carpet manufacture.

The following chart shows world consumption of nylon fibers:

The market for nylon fibers is different in each region. For example, textile fibers are consumed predominantly in Asian countries and mainland China is the world's largest nylon fiber consumer for textiles. However, staple fiber or bulk continuous fiber (BCF) consumed in the manufacture of carpets is predominant in North America and Europe.

The global market for nylon fibers is expected to grow at an average annual rate of about 3.4% during 2020–25.

## Key benefits

**IHS Markit's Chemical Economics Handbook – *Nylon Fibers*** has been compiled using primary interviews with key suppliers and organizations, and leading representatives from the industry in combination with IHS Markit's unparalleled access to upstream and downstream market intelligence and expert insights into industry dynamics, trade, and economics.

This report can help you

- Identify trends and driving forces influencing chemical markets
- Forecast and plan for future demand
- Understand the impact of competing materials
- Identify and evaluate potential customers and competitors
- Evaluate producers
- Track changing prices and trade movements
- Analyze the impact of feedstocks, regulations, and other factors on chemical profitability
