

Let's calculate YOUR plastic footprint!

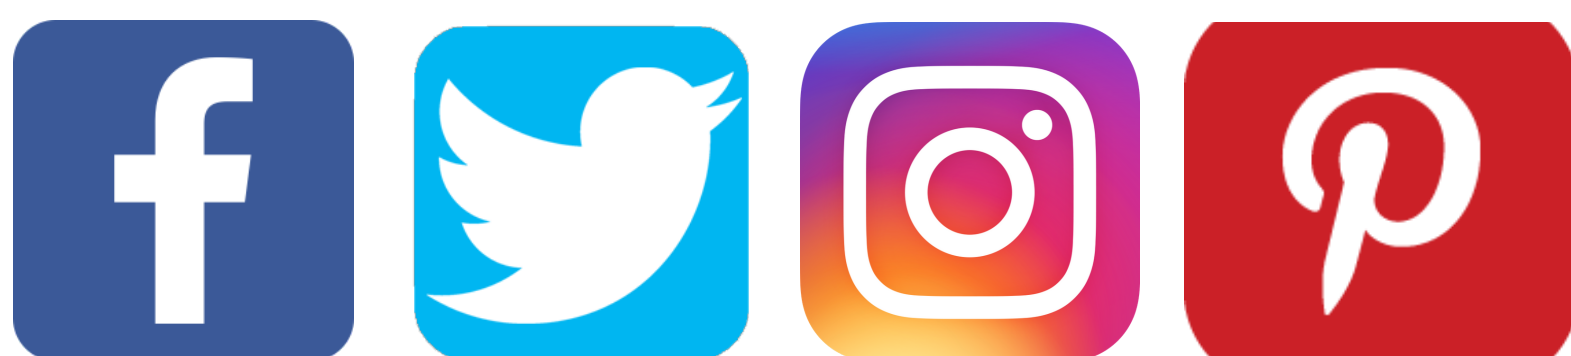

Plastic Item	Number used each day	Oz	Weight in oz
Bag	<input type="text"/>	x0.2	= <input type="text"/>
Bottle	<input type="text"/>	x0.7	= <input type="text"/>
Straw	<input type="text"/>	x0.01	= <input type="text"/>
Cup	<input type="text"/>	x0.4	= <input type="text"/>
Utensils	<input type="text"/>	x0.2	= <input type="text"/>
			Total <input type="text"/>

Add how many items you use per day and multiple the totals with the weights!

What's your total?

www.shore-buddies.com

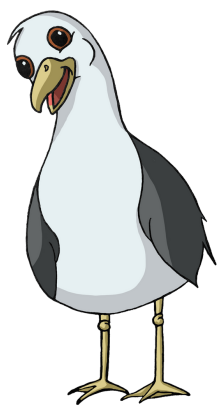

OUR MISSION IS TO SAVE MARINE LIFE AND KEEP PLASTICS OUT OF THE OCEAN.

Per day I use oz of plastic.

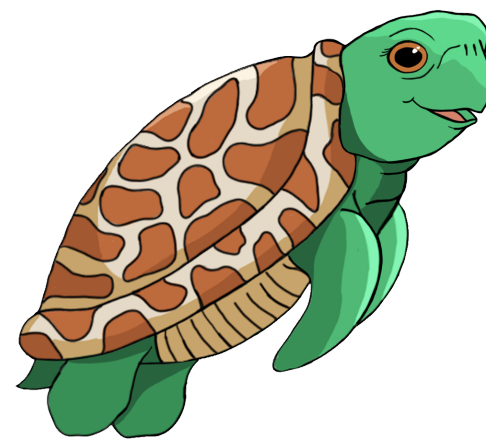

Multiply your total by 350 to find out how much plastic you use in one year oz

Multiply your new total by how old you are to find how much plastic you have used in your lifetime:

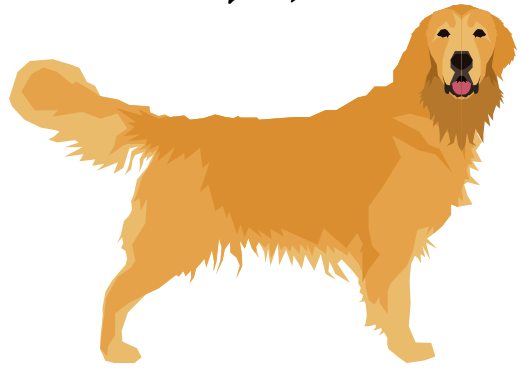

oz $\times 0.6 =$ lbs

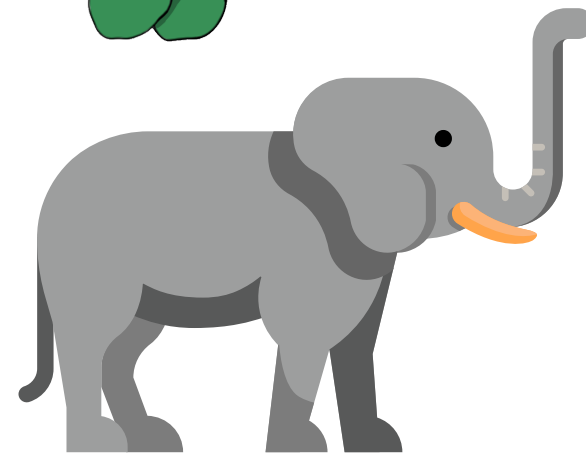

= 2lbs

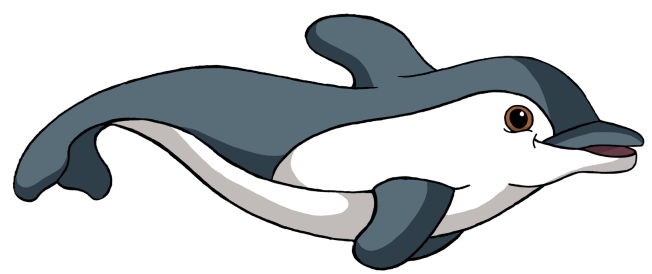

= 800lbs

= 77lbs

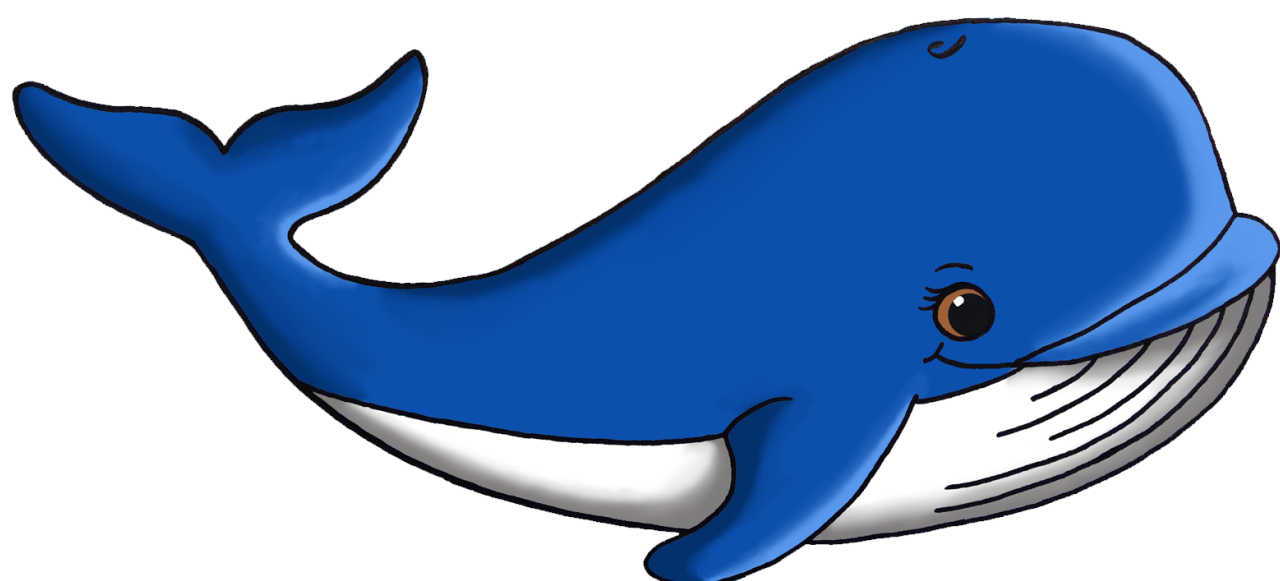

= 9000lbs

= 220lbs

= 12500lbs

= 300000lbs
