

*Stone grill shown in 36P Configuration

Product Description

The KabobMaster Stone Series Grills are charcoal grills designed to be installed in outdoor kitchen and BBQ islands. The grills are designed to fit within a countertop rectangular cutout as a “built in grill.” Once installed the grill must be lined with “split fire bricks” to ensure insulation to the surrounding surfaces of the kitchen or BBQ island (bricks not included).

The grill features a 12 gauge galvanized steel fire box, with stainless steel lid and handle. The fire box is built from a single sheet with 90 degree bends on all four sides to prevent bending and warping from any heat source.

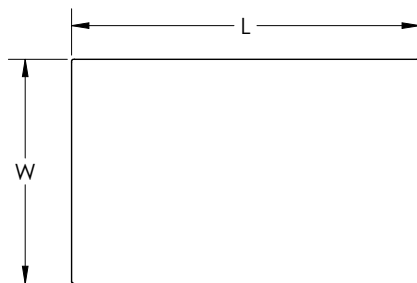

All grills come with cutouts (slots) on the front and rear sides for skewer placement. The “P” option denotes the circular punches which are added for ease of integration with the KabobMaster Rotisseries.

Use of wood, charcoal and mesquite woods are suitable and recommended heat sources for all Stone Series Grills

Materials: Galvanized steel with stainless steel lip and lid

Installation

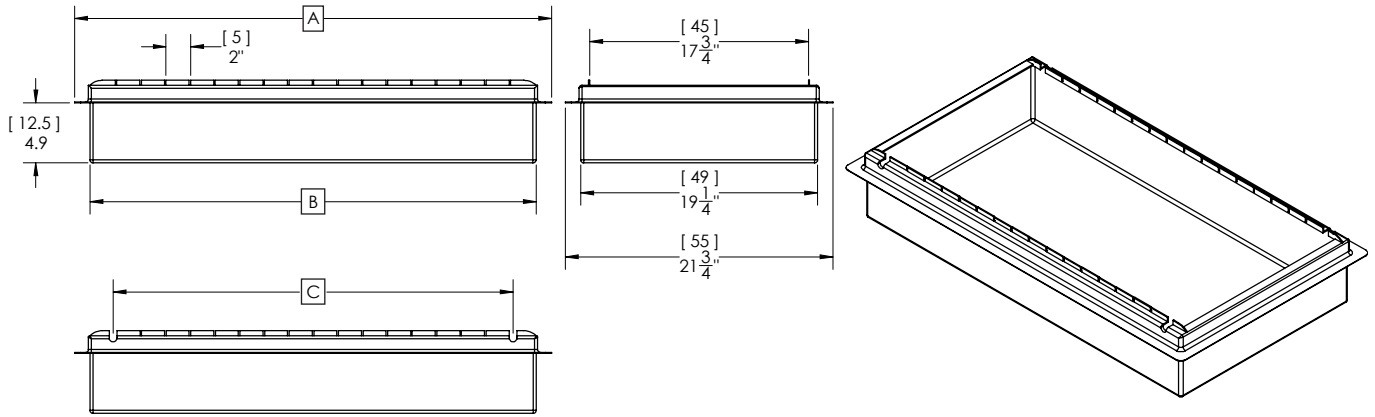

The KabobMaster Stone Series Grills are designed to drop into a countertop. Once the grill is installed, the user must line the inside of the grill with split fire bricks (not included) to protect the countertop from high temperatures. The cutout needs to be at least 6 in. [15 cm.] deep. However, it is recommended to keep the area below your grill clear for better heat dissipation. If you plan to add a KabobMaster rotisserie, leave 7 in. [18 cm] of room behind the grill to provide adequate space for the rotisserie.

Countertop Cutout

Model	Cutout Dimensions	
	L	W
Stone 30	31 in. [79 cm.]	20 in. [51 cm.] All Stone Grills have the same width
Stone 36	37 in. [94 cm.]	
Stone 42	43 in. [109 cm.]	
Stone 48	49 in. [125 cm.]	
Stone 60	61 in. [155 cm.]
