

## 5 Ways To Make Sure You Take A Perfect Selfie

This day in age technology is essential especially Smartphones. When my oldest boys I used to carry a small camera in my diaper bag so I would be able to capture those special moments on the go. Thankfully technology has come a long way since then and now camera's built in Smartphones you do not have to carry around a separate camera.

Sometimes this mama wants to take a selfie with my six children but it has been a challenge in the past with bad lightening or sometimes someone would get cut out of the photo. Here are some tips on how to take the perfect selfie:

Try to hold your Smartphone camera higher than your face and not too close to your face. Also do not to take your photo from below because your proportions may seem distorted. You may also look like you have a double chin. No thank you!

When taking a selfie, it's important to get the right angle. This pose can lengthen your neck.

Lightening is important. For instance my Smartphone will not allow me to use my flash when taking a selfie. My selfie's have turned out so dark. [GloLens](#) will definitely lighten up your photo's! This accessory lens illuminates pictures at a wide angle. The three light settings go from morning coffee to midnight sleepovers or dance parties. Plus it's a perfect attachment for most tablets too.

I used to think selfie sticks were silly but they work! A selfie stick allows you to move the smartphone further away which can reduce a lot of your arm extended in the image. You do not want your arm to photo bomb your photo!

If you are taking solo camera shots center them so they are not appearing off balance however, it's perfectly fine if you are not centered if you are including landmarks, etc. in your photo.

Each GloLens comes with a carrying case and USB charging cable. The 12 LED bulbs enhance every scene. Shooters can adjust up to three brightness levels. Easy to use by simply clipping over your camera on your Smartphone!

Available in 3 colors (rose gold, gold or silver). [GloLens](#) are available for purchase for \$22.00. What a perfect stocking stuffer! Visit Fashionit online and grab free shipping for orders online over \$50 with code: FreeShipping50. Be sure to check out [Fashionit's](#) site for all the other cool products they offer!
