

## *GloLens Will Make Any Selfie Better*

I wasn't a huge selfie queen until I discovered the GloLens from [FashionIt](#). This illuminating lens captures pictures at a wide angle. It has a three light setting that goes from morning coffee to midnight sleepovers or dance parties. The smartphone attachment fits most tablets too. Before I used the GloLens I would take fifty pictures just to post one decent photograph. Now all I have to do is use my GeoLens to get the perfect selfie within the first few pictures.

Each lens comes with a carrying case and USB charging cable. The 12 LED bulbs enhance every scene. Photographers can adjust up to three brightness levels, and they come in rose gold, gold or silver. When combined with the U Speaker as a remote control for your phone, the GloLens makes your remote selfie the best ever!

What fashionista wouldn't love this gadget! It's small enough to fit in a stocking so it will be a big surprise when it is opened. I know my daughter is going to love hers! The GeoLens is so easy to use all you have to do is clip it onto your cell phone and you are ready to take some selfies!

Now is the perfect time to order your GeoLens so that it arrives in time for Christmas. If you don't have a U Speaker then you can order one of those too and any other tech gadget you may need. Visit [FashionIt](#) online and grab free shipping for orders online over \$50 with code: FreeShipping50. Just think you are also supporting a great cause because a portion of their proceeds are donated to SOS Children's, enabling them to provide orphans worldwide with a loving home and better opportunities in life.
