GloLens puts a new shine on selfies

You know the pictures. The ones that have that "glow" that show off the best features of supermodels and celebrities. That golden shine that is created with reflectors and professional lighting. What if I told you that you could recreate that for selfies with your smartphone and a \$22 attachment? You need to give the [GloLens](#) a try.

With much of the same effect as professional photographers that use that "ring light," you can now get great looking selfies at home or on the road with the GloLens.

The lighted lens captures pictures at a wide angle. The three light settings go from daybreak to midnight sleepovers or dance parties. No more worries about weather conditions, the GloLens can save the day when it comes to selfies. Perfect for any smartphone, but the attachment also fits most tablets.

Each lens comes with a carrying case and USB charging cable. You'll be amazed how the 12 LED bulbs enhance every scene. Shooters can adjust up to three brightness levels. Choose rose gold, gold or silver. When combined with the U Speaker as a remote control for your phone, the GloLens makes your remote selfie the best ever.

GloLens works wonders when you are attempting that group selfie.

GloLens recently arrived at Francesca stores and immediately became their #1 best-selling item after only a week! They placed a reorder. These and the speakers are also for sale now, in addition to Francesca's, at stores like Popfizz Boutique, ShopBop.com, TheGrommet.com, Books a Million, and more.

Visit [Fashionit online](#) and grab free shipping for orders online over \$50 with code: FreeShipping50. For those that like to shop in person, FashionIt is stocked coast to coast! Find the nearest retailer by zip code at their "Where To Buy" page at www.justfashionit.com.
