

LED Lighting

Model(s) – Various

Please Be Advised

Your True refrigerator / freezer may either have a 9VDC LED lighting system or a 24VDC LED lighting system. The lighting systems are not interchangeable and cannot be converted.

Please see below 9VDC components (fig. 1) and 24VDC components (fig. 2) for examples and descriptions.

Fig. 1. 9VDC LED Lighting System

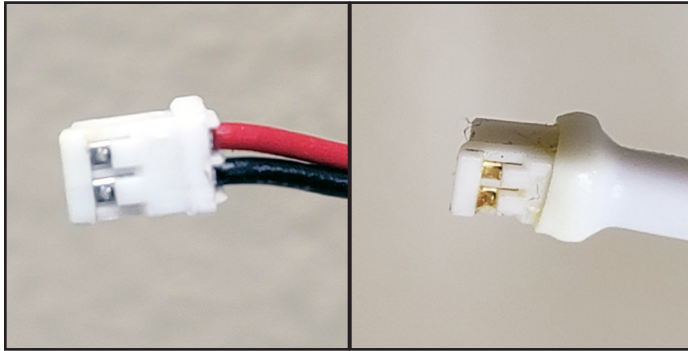

Fig. 1a. White molex-style connectors. All versions of this connector can be used on the LED modules shown.

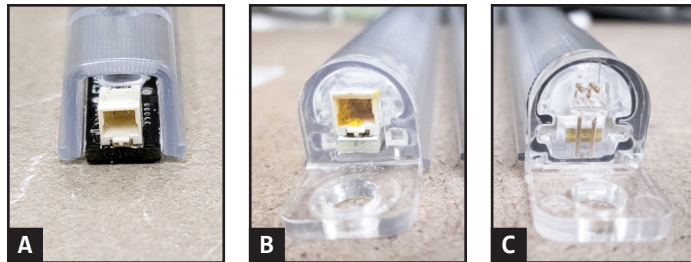

Fig. 1b. LED modules. All versions have a square receptacle for the molex connector. A & B have a white ring around the opening. C does not.

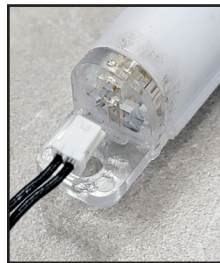

Fig. 1c. Molex will seat fully within the LED modules.

Fig. 2. 24VDC LED Lighting System

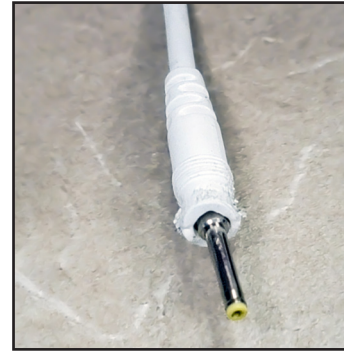

Fig. 2a. White plug-style connector.

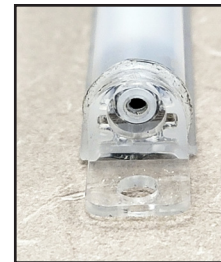

Fig. 2b. LED modules. All versions have a round receptacle for the plug connector.

Fig. 2c. Plug will seat fully within the LED modules.
