

**When selecting a Starburst TV-DISPLAY Mount, there are a few questions that need to be answered.**

**Where is your mounting location?**

TV-Display mounts can typically be mounted on a wall, ceiling, or desk.

---

**What is the screen size of your TV-Display?**

Make sure the TV-DISPLAY mount can accommodate the size of your flat-panel TV-DISPLAY.

---

**What is the weight of your TV-Display?**

Be sure to choose a mount that safely and securely supports your display. Look at the MAX LOAD rating of the TV-Display mount to make sure it can support its weight.

---

**What kind of viewing adjustments do you need?**

Determine if you want to tilt, swivel, and/or rotate your TV-Display. Most Starburst mounts adjust to optimize viewing angles, minimize glare, improve comfort, and reduce eye fatigue.

---

**What is your mounting surface?**

Our Starburst TV-Display mounts include all the hardware required for standard installation on walls with wood or masonry construction, including wooden studs, cinder blocks and or brick. Aftermarket screws are recommended for concrete, metal and/or other special applications. VESA® compliant mounting hole patterns make it easy to match the pattern on your display.
