

Ezi Rider - Folding Electric Bike

RVMEGA
RETAIL • RENTALS • REPAIR

Specially designed for NZ market

Making your journey easy.

The Ezi Rider, Fold-up, electric cruiser bicycle makes your ride around easy and fun, no matter your age.

Features:

- Speed 0 - 27km/hr and more depending on power + pedal assistance
- Motor: 300 Watt Brushless Hub Motor by Ananda
- Gears & Speed: 7-Speed Shimano (Tourney) Gear System
- Front Shocks : Zoom fork shocks by HL Corporation (silver model only)
- Battery Components: Samsung
- Triple Mode Electric Bike
- Throttle Power: No pedaling required
- Power Assist (PAS): " Adds power to your pedalling
- Pedal Power Only - Just like a normal bike
- Frame: Light weight strong Aircraft grade 600 Aluminium with no high bar enabling an easy and safe dismount
- Compact for travelling and storage: Bike folds up making it highly PORTABLE for transporting in motor homes or to take on holidays
- PEDALS: New design with reflectors and foldup ability for storage
- Lights: The new type of LED lights front and back producing a very bright beam and illumination with very little power consumption
- POWER Controller: 3 power level Robust LED light display. No problem to see settings in bright sunlight
- Bicycle balance: Battery placed in the centre of gravity below seat
- Braking: Front V brakes and rear wheel has enclosed disk brakes
- Security: One Key operation to operate bike and to lock battery in place
- Stand: Rear wheel placement
- Carrier: The bracing is more complex and very strong compared to most bikes. Its easy to add a pannier bag for ones shopping or for ones day cycling requirements. We have these as extras on this site. We don't consider baskets on the front handle bars as a safe riding option for balance and control of the bike. Using the rear carrier is a safer option.
- Wheels: 20" wheels. Uses high pressure tubes. (low cost) if needed. 20" wheels gives the bike a lower profile and enables more torque and efficiency of motor drive to the wheels than the larger wheels.
- General Comment: Many bikes will put strain on your POSTURE. This bike you can see by the photos, one is sitting upright with no strain on shoulders and arms
