

### **Feeding for Condition – Omega Rice**

Omega Rice effortlessly promotes condition by using a specialist recipe of palatable Stabilised Rice Bran, Linseed Pellet and Omega 3 with the added benefit of limestone to optimise the digestive process. The energy supplied in Omega Rice is high in oil which is well recognised for slow release energy so is less likely to encourage any excitable behaviour. Omega Rice is an excellent product for sales and show preparation but has the added bonus of being used for fussy feeders or veterans struggling to maintain condition. It is an energy dense, high calorie feed that is used as a top dress to your existing feed that has been found to improve skin health and coat condition so your horse will gleam and stand out from the crowd.

Anti-oxidants are also important when trying to promote condition for horses as any cells that may be damaged and in need of repair will need to be restored back to normal before they can begin to grow. Omega Rice provides a rich and natural source of these and has been fortified with Vitamin E to promote optimum nutritional health.

This is a proven product that our retailers and customers love due to the fact it is so versatile and safe to use for horses and ponies suffering from EMS, Laminitis, EGUS and other disorders that may affect condition.
