INTRODUCTION

Easily transform your Jetson V8 Sport Hoverboard into a go-kart in seconds, with your new All Terrain 2-in-1 Combo V8 Sport Hoverboard + JetKart!

This manual will tell you all you need to know about your new 2-in-1 Combo, from what’s in the box and how to put it all together, to how to maintain it correctly and use it safely. Please read it carefully before your first ride. The more you know about riding safely, the better to avoid collisions, falls, loss of control, and other events that might cause injury. Remember, you’re the one responsible for how you use the 2-in-1 Combo.

Also, before you get going be sure to check for damaged wheels, loose parts, and anything else you think might be a problem. If something doesn’t look right to you, please contact Jetson Customer Support at 1-888-976-9904, or email customerservice@jetsonbike.com.

Jetson and our authorized dealers can’t be held liable for injury or damage caused by riding the 2-in-1 Combo. The rider is responsible for the consequences of ignoring warnings and improper operation of either the V8 Sport Hoverboard or the JetKart Universal Hoverboard Add-On.

If you want to return this product for any reason, be sure to first call or email us before taking it back to the store.
INCLUDED IN THE BOX

CHARGER

V8 SPORT HOVERBOARD

CHARGING CABLE

INCLUDED IN THE BOX

- V8 SPORT HOVERBOARD
- CHARGER
- CHARGING CABLE

Features:

- Adjustable fork
- Light-up wheel
- Adjustable length: From 22” to 45” to accommodate all ages
- Adjustable seat height
- Velcro straps - easily attach and secure JetKart on hoverboard
- Adjustable bracket fits most size hoverboards from 6.5” – 10” platform
- Comfortable Seat
- Foam Grip
- Curved foot rest for better traction
SPECIAL FEATURES
• Bluetooth® Stereo Speakers
• 100% Electric
• Customizable Front LED Lights
• Back Brake Lights
• Durable Rubber Tires
• Water-Resistant
• 3 Skill Modes:
  Beginner/Intermediate/Advanced

SAFETY FEATURES
• Anti-slip grip pads
• UL 2272 Certified
• Flame-Resistant
• Automatic Shut Off Timer

SPECIFICATIONS
• Motor Power: 500 Watts Dual Hub
• Charging Voltage: AC100-240V
• Battery: Rechargeable Lithium-Ion 36v, 4.4 Ah
• Bluetooth® Version: V4.1
• Max Speed: 10 mph
• Travel Distance Per Charge: 12 miles
• Climbing Height: Up to 15°
• Maximum Load: Up to 260 Pounds
• Charge Time: 2-3 hrs
• Low Battery Protection
• Aluminum shell for extreme durability
• Weight: 25 lbs
• Dimensions: 24.8” (W) x 8” (H) x 6.9” (D)
• Wheel Size: 6.5” diameter, wide wheels
• Ride Jetson App Compatible with iPhone® and Android™
PAD SENSORS
There are four sensors under the pads. Never remove the pad, or you will revoke the warranty. When the Jetson V8 Sport is turned on and you step on, it will automatically adjust to the balance mode. Don’t step outside the outline on the pads. Do not put items on the pads; that will prevent the Jetson V8 Sport from switching off, which could cause a collision. The device will not move without putting pressure on at least one sensor.

INDICATOR LIGHTS
1. **Warning Indicator Light (Red)** If red warning light is flashing, there is an issue with the hoverboard (low battery, over speed, power issue, etc.)

2. **Balance Indicator Light (Green)** The hoverboard is in Balance Mode when in use.

3. **Battery Status Indicator Light (Green)** When power is on, the battery status indicator light will be solid green.

4. **Battery Level Indicator Lights (Green)**
   - Three green Battery Level indicator lights, about 71-100% Power
   - Two green Battery Level indicator lights, about 41-70% Power
   - One green Battery Level indicator light, about 11-40% Power
   - No Battery Level indicator lights, about 10% or less Power

**Warning** If battery power goes below 10%, the device will automatically turn off for your safety.
THE RIDE JETSON APP
The Ride Jetson App is available for download from the App Store and the Google Play Store, and unlocks exciting features on your V8 Sport. Simply install the app and connect to your Jetson V8 Sport Hoverboard via Bluetooth® (keep reading for details).

With the Jetson “Ride Jetson” App, you can...
• Watch your real-time speed
• Keep track of your travel time and distance
• Customize the front LED’s color and brightness level
• Compete with friends in challenges
• Share your ride stats on Facebook, Twitter, and Instagram
…and much more!
HOW TO CONNECT TO BLUETOOTH®
Your Jetson V8 Sport is equipped with two Bluetooth modules: one for the App, and one for your Bluetooth speaker. You will need to connect to them separately.

To connect to your Bluetooth speaker:
1. Turn on the Jetson V8 Sport and it will become discoverable on your handheld device.
2. To connect, activate your Bluetooth in your handheld device’s settings.
3. Find the V8 Sport in your handheld device list, and select to connect to play your music.

To connect to the Ride Jetson app:
1. Open the Ride Jetson app on your handheld device.
2. Tap the Bluetooth symbol in the top left corner of the app to find your V8 Sport.
3. Select your hoverboard. Default password is “000000.” (note: To customize your password go to Settings in the App. To factory reset the password please recalibrate the device)
4. You should now be connected and able to use the Ride Jetson app with your V8 Sport.

NOTE: When your app is not connected via Bluetooth, the Bluetooth logo in the app will be white. When your app is connected via Bluetooth, the Bluetooth logo in the app will turn green.

MODE SETTINGS
In the Ride Jetson App you can choose from three settings: Beginner, Intermediate, and Advanced.
- Maximum speed in Beginner operating mode:  Up to 4 mph**
- Maximum speed in Intermediate operating mode: Up to 8 mph**
- Maximum speed in Advanced operating mode:  Up to 10 mph**
**A lot of factors can affect speed and drive distance, such as the weight of the driver, weather conditions, terrain, and overall maintenance of the Jetson V8 Sport.

NOTE: Rider can also manually customize settings outside of preset settings. Other features that can be adjusted in the Ride Jetson App include Steering Sensitivity, Driving Force, Maximum Speed, and Auto Shutdown Time.

HOW TO RECALIBRATE
When the Jetson V8 Sport experiences an error, the running indicator light will turn red. That means it will not operate until it is properly recalibrated. Please do not try getting on the unit until the error has been fixed. To recalibrate, follow these steps:
1. Put the hoverboard on a flat, level surface, with the pads facing up.
2. Press and hold the Power Button for about 5 seconds until the lights on the Jetson V8 Sport flash, and you are notified of a successful calibration.
3. Turn it OFF and then ON again to restart the Jetson V8 Sport. That completes the recalibration, and is now ready for use.
HOW TO CHARGE THE BATTERY
Your Jetson V8 Sport comes with a rechargeable lithium battery. Always use the provided charger only. Before your first ride you must fully charge the Jetson V8 Sport - charge for 8 hours. For every ride after, charge your Jetson V8 Sport until it is fully charged, and NOT LONGER. Do not leave any chargers plugged in overnight, or leave it plugged in past the charge time.

1. Plug one end of the power cord into a grounded AC outlet and the other into the Jetson V8 Sport’s charging port. The red charging light on the charger unit will turn on.
2. The red light will turn green once fully charged. Recharge the Jetson V8 Sport after each use.

(Please note: Always plug the charger into the wall first before the device. If the wall outlet doesn’t have power and you plug the charger into the device first, it will light green, even if the battery is not full. So always plug into the wall first to make sure there is power.)

THE CHARGER OFFERS A CHARGING STATUS ON THE TOP OF THE CHARGER:

**Charging Light Red**  Battery is charging.

**Charging Light Green**  Charging is complete.

Stop riding immediately if the Jetson V8 Sport Hoverboard displays low power.

Don’t use the battery if it emits strange odors, overheats, or begins leaking. If the battery does leak, do not touch any leaking materials, as the battery contains dangerous substances. Do not open the battery and do not insert anything into the battery.

Only use the provided charger for the Jetson V8 Sport. Do not charge the battery if it has over-discharged. It should be discarded for your safety.
HOW IT WORKS

The Jetson V8 Sport Hoverboard uses advanced acceleration sensors to control balance while in use based on the rider’s center of gravity. It also uses automatic control systems to drive the motor efficiently. When you stand on the Jetson V8 Sport, just move your body forward or backward and the motor will automatically control the wheels to help maintain your balance. To turn, first slow down then point right toes downward to turn left, or point left toes downward to turn right. Built-in stabilizing systems maintain forward and backward direction, but they cannot guarantee left and right stability. When you ride, be sure to shift your weight to overcome centrifugal force and improve turning safety.

SAFE RIDING
Always make sure you’re wearing closed-toe, flat shoes, and do not wear loose clothes. Always wear a helmet, elbow pads, and knee pads when riding. Next, find a spacious place, and make sure there are no obstacles in the way. And always be sure the charger is unplugged before riding your Jetson V8 Sport.

Now find the power button. It’s located next to the charging port on the back of the unit. Press it until you hear the Jetson V8 Sport beep and the lights on the top turn green. When you do, it’s on.

Remember that the range of the Jetson V8 Sport depends on how you use it. The battery will run out quicker if you ride at higher speeds and/or up or down an incline.

GETTING ON AND OFF THE JETSON V8 SPORT
When you stand on the Jetson V8 Sport, keep your feet shoulder-width apart. Do not stand on the center portion. Keep a relaxed, upright posture, with your knees slightly bent.

When you are getting on the Jetson V8 Sport, the LED lights should be in the front, and the brake lights should be in the back. Always be careful getting on and off, and while first getting used to your Jetson V8 Sport hold on to stable objects for assistance.

Always step forward when getting on the Jetson V8 Sport and step backward when getting off. Getting on or off any other way may result in a fall and possible injury.

HOW TO RIDE
1. Set the Jetson V8 Sport on flat ground and turn the power on. The green light on top of the unit will light up. If you stand on the Jetson V8 Sport when it is not on a level surface, the notification will sound, the warning indicator will light up red, the Jetson V8 Sport won’t self-balance, and you won’t be able to go for a ride.
2. Put one foot on the pad. That will trigger the pedal switch, which will turn on the green indicator light. After the system enters self-balancing mode, put your other foot on the pad. If the system does not enter self-balancing mode, do not place your other foot on the pad.

3. After standing up successfully, stay upright and maintain your balance to keep the Jetson V8 Sport stationary.

4. Shift your body weight forward gradually to pick up speed. Do not lunge forward or backward. Remember that even slight movements will increase speed, so be cautious as you become accustomed to the Jetson V8 Sport’s controls.

5. Moving Forward: Lean forward on both pads and/or point your toes down.

6. Moving Backward: Lean backward on both pads and/or push your heels down.

7. Turning Right: Point your left toes downward, rotating the platform forward, to instruct the V8 Sport to turn right.

8. Turning Left: Point your right toes downward, rotating the platform forward, to instruct the V8 Sport to turn left.

9. To rotate, slightly tilt one foot forward and the other foot backward.

10. When you are ready to get off, slow down by getting to an upright and stationary position, step off with one foot behind the unit, and then step down with the other.

11. Once you are safely off, power down the Jetson V8 Sport. If you do not turn it off, it will stay on for 10 minutes allowing you to step on and go again without engaging the power button. The Jetson V8 Sport will shut off automatically after 10 minutes.

REMEMBER: ALWAYS ACCELERATE AND DECELERATE AT A SAFE SPEED. ACCELERATING OR DECELERATING TOO QUICKLY MAY RESULT IN LOSS OF BALANCE OR CONTROL, AND POSSIBLE INJURY.

AVOID TURNING SHARPLY AT HIGH SPEEDS, AND RIDING OVER LOOSE OBJECTS, CRACKS, RAISED BUMPS, OR POTENTIALLY HAZARDOUS TERRAIN.

DO NOT RIDE DOWN STEPS OR TURN AROUND QUICKLY ON SLOPES.

DO NOT LIFT THE JETSON V8 SPORT OFF THE GROUND WHEN IT IS TURNED ON, AND DO NOT TURN IT ON IN MID-AIR.
Point right toes downward to turn left
Point left toes downward to turn right

X

√
CARE AND MAINTENANCE

DRIVING RANGE
A lot of factors will affect how far you can go per charge:
• Driving surface: A smooth, flat surface will increase driving distance.
• Weight: More weight means less distance.
• Ambient temperature: Please ride and store the Jetson V8 Sport under recommended temperature, which will increase its longevity and driving distance.
• Maintenance: Timely battery charging and maintenance will increase driving distance.
• Speed and driving style: Maintaining a moderate speed will increase distance. Frequent starting and stopping, acceleration, and deceleration will reduce it.

SPEED LIMIT
The top speed of the Jetson V8 Sport is 10 mph. When you approach the maximum speed, it will try to prevent you from accelerating further. It will automatically tilt back to shift your weight backward. You may feel that you are being pushed back or that you cannot make it go any faster. Do not continue leaning or bending forward to try and increase your speed, or you will fall.

WEIGHT RESTRICTIONS
The maximum load is 260 lbs, and the minimum load is 45 lbs. Going above the maximum weight limit can cause injury, and going below the minimum weight limit will disable control features. If your weight is slightly above 45 lbs and you find the hoverboard shaking, please adjust the sensitivity or force from the Ride Jetson app and it should no longer shake.

TERRAIN
The Jetson V8 Sport behaves differently depending on riding terrain and other conditions. When using it, please keep the following in mind:
• The Jetson V8 Sport is intended for use on smooth, flat surfaces. To prevent loss of traction, always be careful when riding, and learn to identify and avoid slippery and wet surfaces, loose materials, slopes, potholes, and other obstacles.
• Stop and step off the Jetson V8 Sport when you come to unsafe surfaces or terrain.
• The wheels must be able to grip the ground for you to stay upright. Slips occur with loss of traction, potentially causing loss of control and a fall. Abrupt maneuvers and riding over slippery surfaces, bumps, and loose objects and materials may cause the Jetson V8 Sport to lose traction.

PROTECTION FUNCTION
If there is a system error or improper operation during usage, the Jetson V8 Sport may give you a prompt. This will only occur under certain conditions, such as:
• Battery power is too low.
• Surface angle exceeds 20°.
• The angle of the terrain is more than 35° (the motor will shut off after 15 seconds).
• Maximum speed is reached.
• Battery power is low.
• Motor is overheating or overcharging.
• System enters overcharging protection mode (the green indicator will light up).
• A wheel is blocked (the Jetson V8 Sport will shut down after 2 seconds).
• Battery is low but still being used (the Jetson V8 Sport will turn the motor off after 15 seconds).
• Balancing in a neutral position for over 30 seconds.

STORAGE
If you plan on storing the Jetson V8 Sport for a substantial period of time, please do the following:
• Fully charge the battery before storing.
• If you store the Jetson V8 Sport for more than one month, remember to charge it at least every two months.
• If the ambient temperature of your storage area is below 32 degrees Fahrenheit, do not charge. You should bring the vehicle into a warm environment (above 50 degrees Fahrenheit) for charging.
• To protect against dust, cover the Jetson V8 Sport.
• Store the Jetson V8 Sport indoors, in a dry place and at a suitable temperature.
• Do not leave the Jetson V8 Sport plugged into the charger for long periods of time.
Now it’s time to attach the Jetson JetKart Universal Hoverboard Add-On to the Jetson V8 Sport Hoverboard, to turn it into your own go-kart. Here’s what it includes:

Ready to sit back and ride your 2-in-1 Combo? Just assemble the JetKart Universal Hoverboard Add-On, attach it to your hoverboard, and follow the same safe operating instructions as for the Jetson V8 Sport.

TO ASSEMBLE THE JETKART

1. Slide Component B into the front slot of Component A, and secure it using the included tightening nut. Set the length to a comfortable distance, where your legs are slightly bent.

2. Slide Components C and D onto the outside pipes of Component A, and tighten into place using the included washers and bolts. To make sure you’ve attached the handles to the proper sides, check that they curve slightly away from the seat.

3. Slide Component E into Component A and secure it with the tightening nut. Make sure it’s the right height for you.
TO ATTACH THE JETKART
Check that the Jetson V8 Sport is turned off. Then:

1. Make sure the On/Off button of the Jetson V8 Sport faces the front wheel of the JetKart.

2. Place the JetKart parallel to the Jetson V8 Sport, resting the adjustable brackets on the top pads of the hoverboard. Make sure the brackets are tight on the board.

3. Hook one side of the velcro strap to the front of the bracket at the base. Then pull the strap underneath the Jetson V8 Sport and attach the other side of the velcro strap to the back of the bracket at the base. Pull the strap ensuring it is as tight and secure around the Jetson V8 Sport as possible.

4. Repeat Step 3 with the other bracket, making sure that both velcro straps are securely connected to the brackets and snug around the bottom of the Jetson V8 Sport.
GETTING ON:
1. Before taking your seat, make sure your Jetson V8 Sport is charged. Then place it on a leveled surface, facing up and turned off.

2. Carefully lower yourself into the seat. Then place your feet, first one then the other, on the footrests. That way your weight can balance out the JetKart and keep you from falling backwards.

3. Once you’re seated, look down and make sure the Jetson V8 Sport is horizontal and facing up. After you’ve followed all these steps, you can turn on the hoverboard. (Please note: if the hoverboard is not horizontal, and you turn on the device, it will go forward or backwards instantly upon turning on.

HOW TO RIDE:
1. Slowly push down on both handlebars to move forward.

2. Push down on the right handlebar to turn left, and push down on the left handlebar to turn right.

3. Apply more force pushing the handlebars down to accelerate, and pull the handlebars up to slow down.

Remember, when first using your JetKart be sure to start slow and put very light pressure on the handlebars. Applying more pressure on the handlebars will make the JetKart accelerate more rapidly.

SAFETY WARNINGS

Here are some useful tips to make sure you always have a safe ride:

SAFE RIDING
• Children, the elderly, and pregnant women should not use the 2-in-1 Combo.
• Do not ride after drinking or taking prescription medication.
• Do not carry items when riding.
• Prior to each ride, inspect each part of 2-in-1 Combo that you’re using to ensure it has been maintained correctly and is functioning properly.
• Always give way to pedestrians.
• Always comply with local traffic laws and regulations. Remember, the Jetson V8 Sport is a motor vehicle, and is treated as such by local law enforcement. You can and will be arrested for drunk driving. Many cities have restrictions on where you can drive motor vehicles, as well as additional restrictions on driving non-automobiles on streets and highways.
• Be alert to things in front and far away from you.
• Make sure your feet are always placed securely on the pads or foot rests.
• Neither the Jetson V8 Sport Hoverboard nor the JetKart Universal Hoverboard Add-On can be ridden by two or more people. Only one person can ride at a time.
• A rider may not weigh less than 45 lbs. The Jetson V8 Sport is unable to operate properly with such a rider, especially on downhill terrain where the driver will be unable to reduce speed or stop safely.
• When you ride the Jetson V8 Sport Hoverboard or JetKart Universal Hoverboard Add-On along with other hoverboard users, always keep a safe distance to avoid a collision.
• While on the Jetson V8 Sport, your height increases by several inches. Be careful when you pass through doorways.
• When turning, be sure to maintain your balance.
• Do not allow distractions when riding, such as answering the phone or engaging in any other activities.
• Do not ride in the dark.
• Avoid riding in the rain or on smooth surfaces such as snow, ice, and slippery floors.
• Do not ride on roads with obstacles (such as twigs, litter, small stones, etc.).
• Avoid riding in narrow spaces or on steep slopes.
• Avoid riding around flammable gas, steam, liquid, or dust that could cause fire.

CALIFORNIA WARNING
This product contains chemicals, including lead, which are known to the state of California to cause cancer, birth defects, and other medical conditions.

MODIFICATIONS
Do not attempt to disassemble, modify, repair, or replace the Jetson V8 Sport unit or any components of the unit. This will void any warranty, and can lead to malfunctions which may cause injury.
JETKART WARNING
The JetKart Universal Hoverboard Add-On may cause cosmetic damage to the hoverboard.

ADDITIONAL OPERATION CAUTIONS
Do not lift the Jetson V8 Sport off the ground while it is in operation and the wheels are in motion. This can result in freely spinning wheels, which may cause injury to yourself or others nearby. Do not jump on or off the Jetson V8 Sport, and do not jump while using it. Always keep your feet firmly planted on the hoverboard pads or JetKart foot rests while in operation. Always check battery charge before using. Do not ride when battery is low, as
indicated by a twinkling green light or a solid green light.

LIMITED 1 YEAR WARRANTY

TO QUALIFY FOR WARRANTY SERVICE:
1. You must present a copy of the sales receipt from an approved retail partner within 90 days of purchase.
2. This product cannot be used for rental or commercial use.
3. This product cannot be used for competition.

LIMITATIONS OF LIABILITY
- This Limited 1 Year Warranty is non-transferable after the product’s initial sale.
- No unapproved modifications can be made to the product, its performance or otherwise, in order for this Limited 1 Year Warranty to remain in effect.
- No reimbursement is provided for towing, loss of time, loss of use, inconvenience, incidental or consequential damages.
- Warranty is void if weather related water damage is determined. Owner is responsible for storage and protection from weather.
- Jetson® makes no warranty with respect to products or trade accessories not made by Jetson®, including, but not limited to, motors, tires, wheels, and batteries, such products or trade accessories, such items being subject to the original manufacturer’s warranty, if any.
- This Limited 1 Year Warranty does not cover minor surface blemishes, rips, tears, or other cosmetic damages due to normal use, or other intentional or unintentional damage to the product.
- This Limited 1 Year Warranty will not cover any damage which results from the application of improper cleaners, solvents or chemicals to the product, water damage, smoke or soot, or from exposure to saltwater, sea breeze or salt.
- This Limited 1 Year Warranty will not cover any damage which results from aging, such as fading of paint, deterioration of plated surfaces, deterioration of rubber or plastics, or rusting.
- This Limited 1 Year Warranty does not cover improper repair or misdiagnoses of problems.
- This Limited 1 Year Warranty only covers parts due to manufacturer defect.
- Damage due to misuse or neglect, use other than as specified in the Owner’s Manual, or use under abnormal conditions are not covered by this Limited 1 Year Warranty.

OWNER’S WARRANTY RESPONSIBILITIES
As the device’s owner, you are responsible for the performance of the required maintenance. You may be denied a warranty claim solely because of your failure to ensure the performance of all scheduled maintenance. As the owner, you should be aware that you may be denied your warranty coverage if your device or a part has failed due to abuse, neglect, improper maintenance, or unapproved modifications. For any issue regarding your Jetson® product, call toll free 1-(888) 976-9904, or email customerservice@jetsonbike.com.
