INTRODUCTION

This manual will tell you all you need to know about your new Jetson V8 Hoverboard, from what's in the box and how to put it all together, to how to maintain it correctly and use it safely. Please read it carefully before your first ride. The more you know about riding safely, the better to avoid collisions, falls, loss of control, and other events that might cause injury. Remember, you're the one responsible for how you use the V8.

Also, before you get going be sure to check for damaged wheels, loose parts, and anything else you think might be a problem. If something doesn't look right to you, please contact Jetson Customer Support at 1-888-976-9904, or email customerservice@jetsonbike.com.

Jetson and our authorized dealers can't be held liable for injury or damage caused by riding the V8. The rider is responsible for the consequences of ignoring warnings and improper operation of Jetson V8 Hoverboard.

If you want to return this product for any reason, be sure to first call or email us before taking it back to the store.

INCLUDED IN THE BOX

CHARGING CABLE

CHARGER

V8 HOVERBOARD

FEATURES AND SPECS

SPECIAL FEATURES

- Bluetooth® Stereo Speakers
- 100% Electric
- Customizable Front LED Lights
- Back Brake Lights
- Durable Rubber Tires
- Water-Resistant
- 3 Skill Modes:
Beginner/Intermediate/Advanced

SAFETY FEATURES

- Anti-slip grip pads
- UL 2272 Certified
- Flame-Resistant
- Automatic Shut Off Timer

SPECIFICATIONS

- Motor Power: 800 Watts Dual Hub
- Charging Voltage: AC110-240V
- Battery: Rechargeable Lithium-Ion 36v, 4.4 Ah
- Bluetooth® Version: V4.1
- Max Speed: 12 mph
- Travel Distance Per Charge: 10 miles
- Climbing Height: 20°
- Maximum Load: 300 lbs
- Charge Time: 2-3 Hrs
- Low Battery Protection
- Aluminum shell for extreme durability
- Weight: 31.7 lbs
- Dimensions: 28.25" (L) x 8" (W) x 9.25" (H)
- Wheel Size: 8.5" diameter, wide wheels
- Ride Jetson App Compatible with iPhone® and Android™

- ① Anti Slip Grip Pads
- ② Battery Indicator Lights and Status Light
- ③ LED Headlights

- Caution Light and Brake Light ④
- Power Button ⑤
- Charging Port ⑥
- Wheels ⑦

JETSON V8 OVERVIEW

PAD SENSORS

There are four sensors under the pads. Never remove the pad, or you will revoke the warranty. When the V8 is turned on and you step on, it will automatically adjust to the balance mode. Don't step outside the outline on the pads. Do not put items on the pads; that will prevent the V8 from switching off, which could cause a collision. The device will not move without putting pressure on at least one sensor.

INDICATOR LIGHTS

1. Warning Indicator Light (Red) If red warning light is flashing, there is an issue with the hoverboard (low battery, over speed, power issue, etc.)

2. Balance Indicator Light (Green) The hoverboard is in Balance Mode when in use.

3. Battery Status Indicator Light (Green) When power is on, the battery status indicator light will be solid green.

4. Battery Level Indicator Lights (Green)

- Three green Battery Level indicator lights, about 71-100% Power
- Two green Battery Level indicator lights, about 41-70% Power
- One green Battery Level indicator light, about 11-40% Power
- No Battery Level indicator lights, about 10% or less Power

Warning If battery power goes below 10%, the device will automatically turn off for your safety.

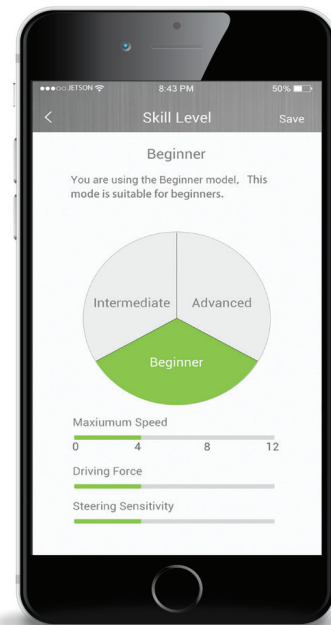

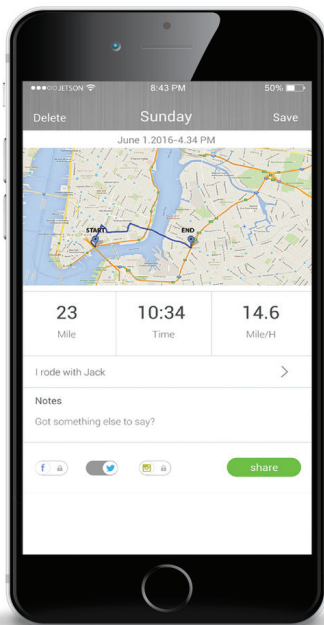

THE RIDE JETSON APP

The Ride Jetson App is available for download from the App Store and the Google Play Store, and unlocks exciting features on your V8. Simply install the app and connect to your Jetson V8 Hoverboard via Bluetooth® (keep reading for details).

With the Jetson "Ride Jetson" App, you can...

- Watch your real-time speed
- Keep track of your travel time and distance
- Customize the front LED's color and brightness level
- Compete with friends in challenges
- Share your ride stats on Facebook, Twitter, and Instagram
...and much more!

HOW TO CONNECT TO BLUETOOTH®

Your V8 is equipped with two Bluetooth modules: one for the App, and one for your Bluetooth speaker. You will need to connect to them separately.

To connect to your Bluetooth speaker:

1. Turn on the V8 and it will become discoverable on your handheld device.
2. To connect, activate your Bluetooth in your handheld device's settings.
3. Find the V8 in your handheld device list, and select to connect to play your music.

To connect to the Ride Jetson app:

1. Open the Ride Jetson app on your handheld device.
2. Tap the Bluetooth symbol in the top left corner of the app to find your V8.
3. Select your hoverboard. Default password is "000000." (note: To customize your password go to Settings in the App. To factory reset the password please recalibrate the device)
4. You should now be connected and able to use the Ride Jetson app with your V8.

NOTE: When your app is not connected via Bluetooth, the Bluetooth logo in the app will be white. When your app is connected via Bluetooth, the Bluetooth logo in the app will turn green.

MODE SETTINGS

In the Ride Jetson App you can choose from three settings: Beginner, Intermediate, and Advanced.

- Maximum speed in Beginner operating mode: Up to 6 mph**
- Maximum speed in Intermediate operating mode: Up to 10 mph**
- Maximum speed in Advanced operating mode: Up to 12 mph**

**A lot of factors can affect speed and drive distance, such as the weight of the driver, weather conditions, terrain, and overall maintenance of the V8.

NOTE: Rider can also manually customize settings outside of preset settings. Other features that can be adjusted in the Ride Jetson App include Steering Sensitivity, Driving Force, Maximum Speed, and Auto Shutdown Time.

HOW TO RECALIBRATE

When the V8 experiences an error, the running indicator light will turn red. That means it will not operate until it is properly recalibrated. Please do not try getting on the unit until the error has been fixed. To recalibrate, follow these steps:

1. Put the hoverboard on a flat, level surface, with the pads facing up.
2. Press and hold the Power Button for about 5 seconds until the lights on the V8 flash, and you are notified of a successful calibration.
3. Turn it OFF and then ON again to restart the V8. That completes the recalibration, and is now ready for use.

HOW TO CHARGE THE BATTERY

Your V8 comes with a rechargeable lithium battery. Always use the provided charger only. Before your first ride you must fully charge the V8 - charge for 4 hours. For every ride after, charge your V8 until it is fully charged, and NOT LONGER. Do not leave any chargers plugged in overnight, or leave it plugged in past the charge time.

1. Plug one end of the power cord into a grounded AC outlet and the other into the V8's charging port. The red charging light on the charger unit will turn on.
2. The red light will turn green once fully charged. Recharge the V8 after each use.

(Please note: Always plug the charger into the wall first before the device. If the wall outlet doesn't have power and you plug the charger into the device first, it will light green, even if the battery is not full. So always plug into the wall first to make sure there is power.)

THE CHARGER OFFERS A CHARGING STATUS ON THE TOP OF THE CHARGER:

Charging Light Red Battery is charging.

Charging Light Green Charging is complete.

Stop riding immediately if the V8 displays low power.

Don't use the battery if it emits strange odors, overheats, or begins leaking. If the battery does leak, do not touch any leaking materials, as the battery contains dangerous substances. Do not open the battery and do not insert anything into the battery.

Only use the provided charger for the V8. Do not charge the battery if it has over-discharged. It should be discarded for your safety.

HOW IT WORKS

The V8 Hoverboard uses advanced acceleration sensors to control balance while in use based on the rider's center of gravity. It also uses automatic control systems to drive the motor efficiently. When you stand on the V8, just move your body forward or backward and the motor will automatically control the wheels to help maintain your balance. To turn, first slow down then point right toes downward to turn left, or point left toes downward to turn right. Built-in stabilizing systems maintain forward and backward direction, but they cannot guarantee left and right stability. When you ride, be sure to shift your weight to overcome centrifugal force and improve turning safety.

SAFE RIDING

Always make sure you're wearing closed-toe, flat shoes, and do not wear loose clothes. Always wear a helmet, elbow pads, and knee pads when riding. Next, find a spacious place, and make sure there are no obstacles in the way. And always be sure the charger is unplugged before riding your Jetson V8.

Now find the power button. It's located next to the charging port on the back of the unit. Press it until you hear the V8 beep and the lights on the top turn green. When you do, it's on.

Remember that the range of the V8 depends on how you use it. The battery will run out quicker if you ride at higher speeds and/or up or down an incline.

GETTING ON AND OFF THE V8

When you stand on the V8, keep your feet shoulder-width apart. Do not stand on the center portion. Keep a relaxed, upright posture, with your knees slightly bent.

When you are getting on the V8, the LED lights should be in the front, and the brake lights should be in the back. Always be careful getting on and off, and while first getting used to your Jetson V8 hold on to stable objects for assistance.

Always step forward when getting on the V8 and step backward when getting off. Getting on or off any other way may result in a fall and possible injury.

HOW TO RIDE

1. Set the V8 on flat ground and turn the power on. The green light on top of the unit will light up. If you stand on the V8 when it is not on a level surface, the notification will sound, the warning indicator will light up red, the V8 won't self-balance, and you won't be able to go for a ride.

2. Put one foot on the pad. That will trigger the pedal switch, which will turn on the green indicator light. After the system enters self-balancing mode, put your other foot on the pad. If the system does not enter self-balancing mode, do not place your other foot on the pad.
3. After standing up successfully, stay upright and maintain your balance to keep the V8 stationary.
4. Shift your body weight forward gradually to pick up speed. Do not lunge forward or backward. Remember that even slight movements will increase speed, so be cautious as you become accustomed to the V8's controls.
5. Moving Forward: Lean forward on both pads and/or point your toes down.
6. Moving Backward: Lean backward on both pads and/or push your heels down.
7. Turning Right: Point your left toes downward, rotating the platform forward, to instruct the V8 to turn right.
8. Turning Left: Point your right toes downward, rotating the platform forward, to instruct the V8 to turn left.
9. To rotate, slightly tilt one foot forward and the other foot backward.
10. When you are ready to get off, slow down by getting to an upright and stationary position, step off with one foot behind the unit, and then step down with the other.
11. Once you are safely off, power down the V8. If you do not turn it off, it will stay on for 10 minutes allowing you to step on and go again without engaging the power button. The V8 will shut off automatically after 10 minutes.

REMEMBER: ALWAYS ACCELERATE AND DECELERATE AT A SAFE SPEED. ACCELERATING OR DECELERATING TOO QUICKLY MAY RESULT IN LOSS OF BALANCE OR CONTROL, AND POSSIBLE INJURY.

AVOID TURNING SHARPLY AT HIGH SPEEDS, AND RIDING OVER LOOSE OBJECTS, CRACKS, RAISED BUMPS, OR POTENTIALLY HAZARDOUS TERRAIN.

DO NOT RIDE DOWN STEPS OR TURN AROUND QUICKLY ON SLOPES.

DO NOT LIFT THE V8 OFF THE GROUND WHEN IT IS TURNED ON, AND DO NOT TURN IT ON IN MID-AIR.

Point right toes downward to turn left

Point left toes downward to turn right

CARE AND MAINTENANCE

DRIVING RANGE

A lot of factors will affect how far you can go per charge:

- Driving surface: A smooth, flat surface will increase driving distance.
- Weight: More weight means less distance.
- Ambient temperature: Please ride and store the V8 under recommended temperature, which will increase its longevity and driving distance.
- Maintenance: Timely battery charging and maintenance will increase driving distance.
- Speed and driving style: Maintaining a moderate speed will increase distance. Frequent starting and stopping, acceleration, and deceleration will reduce it.

SPEED LIMIT

The top speed of the V8 is 12 mph. When you approach the maximum speed, it will try to prevent you from accelerating further. It will automatically tilt back to shift your weight backward. You may feel that you are being pushed back or that you cannot make it go any faster. Do not continue leaning or bending forward to try and increase your speed, or you will fall.

WEIGHT RESTRICTIONS

The maximum load is 300 lbs, and the minimum load is 45 lbs. Going above the maximum weight limit can cause injury, and going below the minimum weight limit will disable control features. If your weight is slightly above 45 lbs. and you find the hoverboard shaking, please adjust the sensitivity or force from the Ride Jetson app and it should no longer shake.

TERRAIN

The V8 behaves differently depending on riding terrain and other conditions. When using it, please keep the following in mind:

- The V8 is intended for use on smooth, flat surfaces. To prevent loss of traction, always be careful when riding, and learn to identify and avoid slippery and wet surfaces, loose materials, slopes, pot-holes, and other obstacles.
- Stop and step off the V8 when you come to unsafe surfaces or terrain.
- The wheels must be able to grip the ground for you to stay upright. Slips occur with loss of traction, potentially causing loss of control and a fall. Abrupt maneuvers and riding over slippery surfaces, bumps, and loose objects and materials may cause the V8 to lose traction.

PROTECTION FUNCTION

If there is a system error or improper operation during usage, the V8 may give you a prompt. This will only occur under certain conditions, such as:

- Surface angle exceeds 20°.
- The angle of the terrain is more than 35° (the motor will shut off after 15 seconds).
- Maximum speed is reached.
- Motor is overheating.
- System enters overcharging protection mode (the green indicator will light up).
- A wheel is blocked (the V8 will shut down after 2 seconds).

- Battery is low but still being used (the V8 will turn the motor off after 15 seconds).
- Balancing in a neutral position for over 30 seconds.

STORAGE

If you plan on storing the V8 for a substantial period of time, please do the following:

- Fully charge the battery before storing.
- If you store the V8 for more than one month, remember to charge it at least every two months.
- If the ambient temperature of your storage area is below 32 degrees Fahrenheit, do not charge. You should bring the vehicle into a warm environment (above 50 degrees Fahrenheit) for charging.
- To protect against dust, cover the V8.
- Store the V8 indoors, in a dry place and at a suitable temperature.
- Do not leave the V8 plugged into the charger for long periods of time.

SAFETY WARNINGS

Here are some useful tips to make sure you always have a safe ride:

SAFE RIDING

- Children, the elderly, and pregnant women should not use the V8.
- Do not ride after drinking or taking prescription medication.
- Do not carry items when riding.
- Prior to each ride, inspect each part of the V8 that you're using to ensure it has been maintained correctly and is functioning properly.
- Always give way to pedestrians.
- Always comply with local traffic laws and regulations. Remember, the V8 is a motor vehicle, and is treated as such by local law enforcement. You can and will be arrested for drunk driving. Many cities have restrictions on where you can drive motor vehicles, as well as additional restrictions on driving non-automobiles on streets and highways.
- Be alert to things in front and far away from you.
- Make sure your feet are always placed securely on the pads or foot rests.
- The V8 can not be ridden by two or more people.
- A rider may not weigh less than 45 lbs. The V8 is unable to operate properly with such a rider, especially on downhill terrain where the driver will be unable to reduce speed or stop safely.
- When you ride the V8 along with other hoverboard users, always keep a safe distance to avoid a collision.
- While on the V8, your height increases by several inches. Be careful when you pass through doorways.
- When turning, be sure to maintain your balance.
- Do not allow distractions when riding, such as answering the phone or engaging in any other activities.
- Do not ride in the dark.
- Avoid riding in the rain or on smooth surfaces such as snow, ice, and slippery floors.
- Do not ride on roads with obstacles (such as twigs, litter, small stones, etc.).
- Avoid riding in narrow spaces or on steep slopes.
- Avoid riding around flammable gas, steam, liquid, or dust that could cause fire.

CALIFORNIA WARNING

This product contains chemicals, including lead, which are known to the state of California to cause cancer, birth defects, and other medical conditions.

MODIFICATIONS

Do not attempt to disassemble, modify, repair, or replace the V8 unit or any components of the unit. This will void any warranty, and can lead to malfunctions which may cause injury.

ADDITIONAL OPERATION CAUTIONS

Do not lift the Jetson V8 off the ground while it is in operation and the wheels are

in motion. This can result in freely spinning wheels, which may cause injury to yourself or others nearby. Do not jump on or off the V8, and do not jump while using it. Always keep your feet firmly planted on the hoverboard pads while in operation. Always check battery charge before using. Do not ride when battery is low, as indicated by a twinkling green light or a solid green light.

LIMITED 1 YEAR WARRANTY

TO QUALIFY FOR WARRANTY SERVICE:

1. You must present a copy of the sales receipt from an approved retail partner within 90 days of purchase.
2. This product cannot be used for rental or commercial use.
3. This product cannot be used for competition.

LIMITATIONS OF LIABILITY

- This Limited 1 Year Warranty is non-transferable after the product's initial sale.
- No unapproved modifications can be made to the product, its performance or otherwise, in order for this Limited 1 Year Warranty to remain in effect.
- No reimbursement is provided for towing, loss of time, loss of use, inconvenience, incidental or consequential damages.
- Warranty is void if weather related water damage is determined. Owner is responsible for storage and protection from weather.
- Jetson® makes no warranty with respect to products or trade accessories not made by Jetson®, including, but not limited to, motors, tires, wheels, and batteries, such products or trade accessories, such items being subject to the original manufacturer's warranty, if any.
- This Limited 1 Year Warranty does not cover minor surface blemishes, rips, tears, or other cosmetic damages due to normal use, or other intentional or unintentional damage to the product.
- This Limited 1 Year Warranty will not cover any damage which results from the application of improper cleaners, solvents or chemicals to the product, water damage, smoke or soot, or from exposure to saltwater, sea breeze or salt.
- This Limited 1 Year Warranty will not cover any damage which results from aging, such as fading of paint, deterioration of plated surfaces, deterioration of rubber or plastics, or rusting.
- This Limited 1 Year Warranty does not cover improper repair or misdiagnoses of problems.
- This Limited 1 Year Warranty only covers parts due to manufacturer defect.
- Damage due to misuse or neglect, use other than as specified in the Owner's Manual, or use under abnormal conditions are not covered by this Limited 1 Year Warranty.

OWNER'S WARRANTY RESPONSIBILITIES

As the device's owner, you are responsible for the performance of the required maintenance. You may be denied a warranty claim solely because of your failure to ensure the performance of all scheduled maintenance. As the owner, you should be aware that you may be denied your warranty coverage if your device or a part has failed due to abuse, neglect, improper maintenance, or unapproved modifications. For any issue regarding your Jetson® product, call toll free 1-(888) 976-9904, or email customerservice@jetsonbike.com.
