

Care & Maintenance

This battery is a 48V, 10Ah Lithium-Ion battery intended for use only with the Jetson Warren All-Terrain Electric Bike. Read all instructions prior to charging or using your battery. Reference your Warren user manual for more details on using this battery to power your Warren.

Number of pieces: 1

Rated capacity of battery: 10Ah

Charging Guidelines

1. Charge the battery indoors and at a temperature above 32°F (0°C).
2. Charge the battery fully (up to 6 hours).
3. Never leave the battery charging overnight or for extended periods of time.
4. Do not charge your battery with any other charger other than a compatible charger acquired through us.
5. Never power on the Warren while you are charging your battery in its frame.

Battery Precautions

1. Do not use any other battery with your Warren Bike other than a compatible battery acquired through us.
2. Do not use the battery in temperatures below 14°F (-10°C) or above 104°F (40°C).
3. This battery is for use by persons aged 14 and above. Children under 14 should not use, play with, handle, or clean this battery.
4. Persons with reduced physical, sensory, or mental capabilities or lack of experience and product knowledge can use the product with supervision if given proper instruction on safe usage and having understood the hazards involved in use.
5. Do not disassemble the battery.
6. Keep the battery away from fire and excessive heat.
7. Protect the battery from water and moisture.
8. Avoid intense physical impact and severe vibration.
9. If there are any issues with the battery, contact the Jetson Care Team immediately and before charging or using it again.

Storing Your Battery

1. Turn the battery power off on your Warren Bike prior to storing it for extended periods of time (30+ days). Failure to do so may result in a malfunctioning battery.
2. Fully charge the battery before extended periods of storage. (Charging time: up to 6 hours.)
3. Store the bike and battery indoors and in a dry place.
4. When storing the battery in the bike, the charging port cover should remain closed.
5. Store your battery for extended periods of time in environments with air temperatures of:
 - Up to 1 month: 32°F (0°C) - 113°F (45°C)
 - 1 - 3 months: 41°F (5°C) - 104°F (40°C)
 - 3 months - 1 year: 50°F (10°C) - 95°F (35°C)
